Constructing Translation Competence Lodz Studies In Language:

Constructing Translation Competence Paulina Pietrzak, Mikołaj Deckert, 2015 The volume provides current methodological insights into translation didactics It investigates both theoretical and practical aspects of translator training with a view to exchanging knowledge and resources among those who contribute to the complex and challenging endeavour of constructing translation competence

The Role of Theory in Translator Training Daniela Di Mango, 2018-11-26 Translation study programs have always been torn between the expectations placed on them to provide students with a comprehensive education at an academic level but at the same time to prepare them for the demands of the professional translation market There is furthermore an ongoing debate about a supposed gap between translation theory and practice Several often opposing claims have been put forward concerning the usefulness of theory to professionals and students and how and when to best implement theoretical courses in translation curricula The aim of this book is to provide an overview of the different opinions and expectations that have been put forward in the literature and to test some of these claims empirically on student subjects who have been trained with either a practical or a theoretical focus on translation It thus gives insights into the role of both theoretical and practical aspects in translator training and the ways in which each of them can contribute to the development of translation competence

Translation Education Junfeng Zhao, Defeng Li, Lu Tian, 2020-10-02 This book features invited contributions based on the presentations at the First World Interpreter and Translator Training Association WITTA Congress held in Guangzhou China in November 2016 Covering a wide range of topics in translation education it includes papers on the latest developments in the field theoretical discussions and the practical implementation of translation courses and programs Given its scope the book appeals to translation scholars and practitioners education policymakers and language and education service providers

Terminology Management for Translators María Fernández-Parra, 2025-08-08 Professional translators are the crucial link between businesses and their success in international markets The content they convey across languages very often includes specialised terminology But how much exactly should translators know about terminology and its management and how should they deal with it Can translators write like experts without being experts What tools and technologies can assist translators in the management of terminology This book provides the results of new research in this area in order to address these questions in detail For professionals this book provides a fresh view on practices in terminology management based on empirical data For translator trainers it provides a thorough overview of the aspects of terminological theories that are useful for translators shows how the theory can underpin the design and creation of terminological databases for translators and offers a wide range of ideas for discussion exercises and examples For students and trainee translators it explains why they should bother with terminology management at all and offers guidance on acquiring storing and using their terminological resources efficiently dispelling common misconceptions about terms and terminological work With clear explanations and summaries activities

discussion points further reading and links to resources this book is the ultimate introductory text and reference resource covering everything translators ever wanted to know about the terminological side of their work

Quality Assurance and Assessment Practices in Translation and Interpreting Huertas-Barros, Elsa, Vandepitte, Sonia, Iglesias-Fernández, Emilia, 2018-07-27 The development of translation memories and machine translation have led to new quality assurance practices where translators have found themselves checking not only human translation but also machine translation outputs As a result the notions of revision and interpersonal competences have gained great importance with international projects recognizing them as high priorities Quality Assurance and Assessment Practices in Translation and Interpreting is a critical scholarly resource that serves as a guide to overcoming the challenge of how translation and interpreting results should be observed given feedback and assessed It also informs the design of new ways of evaluating students as well as suggesting criteria for professional quality control Featuring coverage on a broad range of topics such as quality management translation tests and competency based assessments this book is geared towards translators interpreters linguists academicians translation and interpreting researchers and students seeking current research on the new ways of evaluating students as well as suggesting criteria for professional quality control in translation

Relevance Theory Agnieszka Piskorska, 2013-01-16 The present volume covers a variety of topics which are at the centre of interest in pragmatic research understanding and believing reference politeness communication problems stylistics metaphor and humour Next to innovative theoretical proposals there are interesting analyses and discussions

The Pragmatics of Humour Across Discourse Domains Marta Dynel, 2011 Brings together a range of contributions on the linguistics of humour This title elucidates the whole gamut of humorous forms and mechanisms such as surrealist irony incongruity in register humour mechanisms of pun formation as well as interpersonal functions of conversational humour

Technical Translations Patrizia Giampieri, Claudia Mary Forshaw Labruzzo, 2021-05-18 This book explains and shows how corpora and the web as corpus can be consulted successfully to deliver technical translations in a first and second language It follows a step by step approach and provides insights into term search collocation retrieval and uses of words in contexts of various technical fields You will become acquainted with online and offline corpora the web as corpus and will be able to deliver native like translations in different sectors The fields tackled by this book are various and include economics business medicine and journalism This book is unique because not only does it clearly show how corpora and the web can be consulted to obtain relevant and reliable information in the field of technical translations but it also provides the reader with a collection of electronic texts which can be consulted to translate the documents proposed in each chapter In this way the user will learn how to use corpora successfully by self practising and will have free databases in economics business and medicine for his her own use For these reasons this is both a reference book for lecturers or technical translators and a self study practice guide for students in translation studies The ideal level of English is at least B2

Beyond the Ivory Tower Brian James

Baer, Geoffrey S. Koby, 2003-01-01 This volume is divided into three sections The first explores the pedagogical interventions that are focused on the performance of translation The second part discusses approaches to translator training The third part examines some of the pedagogical opportunities and challenges **Seeing Through Multilingual Corpora** Stig

Johansson, 2007-01-01 Through electronic corpora we can observe patterns which we were unaware of before or only vaguely glimpsed The availability of multilingual corpora has led to a renewal of contrastive studies We gain new insight into similarities and differences between languages at the same time as the characteristics of each language are brought into relief The present book focuses on the work in building and using the English Norwegian Parallel Corpus and the Oslo Multilingual Corpus Case studies are reported on lexis grammar and discourse A concluding chapter sums up problems and prospects of corpus based contrastive studies including applications in lexicography translator training and foreign language teaching Though the main focus is on English and Norwegian the approach should be of interest more generally for corpus based contrastive research and for language studies in general Seeing through corpora we can see through language
