The book explains CISCO CCNA CCENT internetworking routing and switching concepts and guarantees the certification to the readers with a unique presentation in the field of internetworking. It is written like usual textbooks. The learning questions at the end of a chapter represent a review to the information presented in that chapter as well as provide an easy way for the preparation of the real exam. The questions are made to focus on the important information. You have two options to read the questions and their answers either by using the built-in exam engine at the end of each chapter or by reading the questions and their answers in the EBook. With more than 840 pages, the book includes explanatory text and provides new types of test formats to simplify both the exam and the presenting of the information to the readers, including over 2200 challenging multiple choices, single answer, multiple choices, multiple answers, fill in the blank, testlet, drag and drop, and simulation test formats.
