Global Production and Consumption of Fast Food and Instant Concentrates Simakova, Inna Vladimirovna, Strizhevskaya, Victoria Nikolaevna, Perkel, Roman Lvovich, Rakhmanova, Galina Yuryevna, 2022-01-07

Globalization and industrialization have caused serious changes to the food and services markets which have led to an increase in the consumption of fast food in the daily diet. Annually the number of fast food restaurants increases and volumes of the industrial production of fast food products grow. The systematic consumption of fast food has many risks such as developing alimentary diseases and serious chronic illnesses. This increasing consumption is a critical problem as younger generations are primary consumers of fast food. *Global Production and Consumption of Fast Food and Instant Concentrates* compares healthy and fast foods, considers an ecological hygienic assessment of the impact of fast food on the body in observations of people and in experiments in vivo and discusses key questions of the interrelation of food and health. Covering topics such as nutrition and food culture, it is ideal for food industry professionals, scientists, medical professionals, researchers, academicians, practitioners, instructors, and students.

Chicken Paul R. Josephson, 2020-05-19 Why has the chicken become the meat par excellence, the most plentifully eaten and popular animal protein in the world consumed from Beijing to Barcelona? As renowned historian Paul Josephson shows, the story of the chicken's rise involves a whole host of factors from art to nineteenth century migration patterns to cold war geopolitics. And whereas sheep needed too much space or the cow was difficult to transport, these compact, lightweight birds produced relatively little waste, were easy to transport and could happily peck away in any urban back garden. Josephson tells this story from all sides: the transformation of the chicken from backyard scratcher to hyper-efficient industrial meat product has been achieved due to the skill of entrepreneurs who first recognized the possibilities of chicken meat and the gene scientists who bred the plumpest and most fertile birds. But it has also been forced through by ruthless capitalists and lobbyists for big farmer at the expense of animal welfare and the environment. With no sign of our lust for chicken abating, we're now reaching a crisis point: billions of birds are slaughtered every year after having lived lives that are nasty, brutish, and short. The waste from these victims is polluting rivers and poisoning animals. We're now plunging egg first into environmental disaster. Alongside this story, Josephson tells another of an animal with endearing characteristics who arguably can lay claim to being man's best friend long before the dog reared its snout or the cat came in from the cold. Lionized in medieval romances and modern cartoons, the chicken's relationship to humanity runs deep: by treating these animals as mere food products, we become less than human.

Big Chicken Maryn McKenna, 2017-09-12 In this eye-opening exposé, acclaimed health journalist and National Geographic contributor Maryn McKenna documents how antibiotics transformed chicken from local delicacy to industrial commodity and human health threat, uncovering the ways we can make America's favorite meat safer again. What you eat matters for your health, for the environment, and for future generations. In this riveting investigative narrative, McKenna dives deep into the world of modern agriculture by way of chicken, from the farm where it's raised directly to your dinner table. Consumed more than any other meat in the United States, chicken is emblematic of today's mass food processing practices and their profound influence on our lives and health. Tracing its meteoric rise from scarce treat to ubiquitous global commodity, McKenna reveals
