Christianity And Process Thought Spirituality For A Changing World:

Christianity and Process Thought Joseph A. Bracken, 2008-03-16 Joseph A Bracken S J introduces the process relational metaphysics of Alfred North Whitehead and other process theologians as he tries to reconcile the sometimes conflicting views of traditional Christian doctrines and the modern scientific world To present this material in an accessible manner to a wider audience Bracken reworks Whitehead's model of the God world relationship showing that God is involved in an ongoing ever changing relationship with humans and other creatures He also discusses the work of other contemporary theologians to help Christians come to terms with their role in our multi dimensional pluralistic society Bracken examines divine and human creativity the collective power of good and evil divine providence and human freedom prayer altruism and the basic question What is truth He shows how Whitehead's process thought approach to these issues can in fact harmonize traditional Christian beliefs and contemporary culture benefiting both faith and reason Understanding the God world relationship subtly influences our attitude toward ourselves toward other human beings and indeed toward all of God's creatures says Bracken His revision of Whitehead's metaphysical vision in terms of a cosmic community shows how modern views of the world and God can be accepted and kept in balance with the traditional biblical views found in the Christian faith and how this balance can help Christians make better choices in a world shaped both by contemporary natural science and by traditional Christian spirituality

Process Thought and Roman Catholicism John Becker, Marc A. Pugliese, 2022-03-21 This collection of essays explores convergences and divergences between process thought and Roman Catholicism with the goal of identifying reasons for why process philosophy and theology has not had the same impact in Roman Catholic circles as in Protestantism and of constructively navigating avenues of promising engagement between Process thought and Roman Catholicism In creatively considering the Roman Catholic tradition from the vantage point of Process thought different theoretical perspectives are brought to bear on Catholic characteristics of historical theology fundamental theology systematic theology moral theology social justice and theology of religions While the contributors draw upon a broad range of resources from the disciplines of the physical and social sciences philosophy and ethics from a process perspective the primary methodology employed is theological reflection

Handbook of Whiteheadian Process Thought Michel Weber, 2013-04-30 Gathering 115 entries written by 101 internationally renowned experts in their fields the Handbook of Whiteheadian Process Thought aims at canvassing the current state of knowledge in Whiteheadian scholarship and at identifying promising directions for future investigations through internal cross elucidation and external interdisciplinary development Two kinds of entries are weaved together in order to interpret Whitehead secundum Whitehead and to read him from the vantage point of interdisciplinary and crossdisciplinary research The thematic entries provide i a broad contextualisation of the issue at stake ii a focus on Whitehead's treatment if any or of a possible Whiteheadian treatment of the issue iii a history of relevant scholarship iv a personal assessment by the Author The

biographical entries provide i a brief vita of the targeted thinker ii a sketch of his/her categories relevant to the Whiteheadian scholarship iii a personal assessment of the actual or possible Whiteheadian semantic transfer to or from the thinker The Oxford Handbook of Omnipresence ,2025-06-04 The idea that something can be present at every place has engendered much discussion both in the past and at present Typically omnipresence is thought to be a divine attribute but the question as to how something can be omnipresent has not been historically confined to the status of a divine being The Oxford Handbook of Omnipresence offers an insight into historical accounts of omnipresence and its developments in ancient medieval modern and contemporary thought It further widens the study of omnipresence by including less widely studied strands of thought on this topic from mystical process theological feminist theological and phenomenological perspectives Additionally whilst the study of omnipresence has typically focused on Christian thinkers the volume broadens the range of voices on this attribute further by including Jewish Islamic Buddhist Sanskrit and Donghak accounts The Handbook provides an introduction to the main facets of omnipresence both historical and contemporary and opens up new avenues for research that are yet to be fully explored **Minjung and Process** Hiheon Kim,2009 This book reconstructs the legacy of Korean minjung theology by reformulating its essential ideas in a dialogue with process thought In a minimal sense this study is a theological reinterpretation of the doctrine of the minjung messiah an idea which historically suffered from a misunderstanding that minjung theology created a messianic confusion while replacing christology and soteriology by a radical anthropology This erroneous conception occurred when the idea was placed within the philosophically dualistic framework of traditional doctrines in which the work of minjung is totally separated from the work of Christ In order to avoid such a dualistic understanding the author critically adopts process panentheism and makes minjung ideas more communicable and more comprehensive in current theological religious and philosophical debates Beyond defending the idea of the minjung messiah he also argues for an inclusive minjung hermeneutics that promotes the fundamental insight of minjung theology in philosophical clarity Through minjung hermeneutics minjung theology expands its practical concern and overcomes the theoretical nihilism in postmodern studies **The Beauty of Balance** Young Woon Ko,2009-12-22 These essays examine the significance of balance between the opposites in order to understand God and the world The author argues that opposites the subject and object mind and nature good and evil truth and falsehood are not separated from each other but interdependent in the relational paradigm Each cannot exist without the other Creative advancement is achieved by their dynamic tensions The paradoxical relationship between the opposites is not posited in the mechanistic model in which opposites are recognized as separate entities and thereby antagonists rather they are dialectical and creative in the organic model Based on this organic model the relationship between God and the world is not hierarchical but interdependent In the organic model God is not described simply as a transcendent reality in a dualistic structure of God and the world God reveals God self in harmonious order and pattern as the ultimate principle formed in the world In other words God reveals God self

in the relative contexts of the opposites good and evil true and false Unlike Aristotle's Law of Contrast God is both A transcendent and A immanent which is the basic logic of the organic model In this context God is different from eternal reality such as Plato's Idea or the transcendent God developed in the Western tradition In this text the author explores how the complex of divine reality entails the dialogue of differences in a constructive way using inter religious dialogue and religion nature dialogue as examples The author also brings the theme of paradox into his discussion to connect the West with the East and explore how it can be a positive method of understanding God and the world in the organic model which can in turn be a key to the understanding of the common good

Strangers in This World Hussam S. Timani, Allen G. Jorgenson, Alexander Y. Hwang, 2015 Immigration is one of the most hotly debated topics today But the question involves more than politics and emotion it includes such critical issues as law justice human rights human dignity and freedom *Strangers in This World* is a collection that brings together an international consortium of scholars to reflect on the religious political anthropological and social realities of immigration through the prism of the historical and theological resources insights and practices across an array of religious traditions The volume reflecting the diversity of religious cultures is nevertheless unified in arguing that immigration is an important aspect of the major religions and is found at their core The contributors unfold this important dimension of the religious traditions and explore the ways that the theme of immigration connects to vital points of theological reflection and practice in Hinduism Buddhism Judaism Christianity Islam and Native American religious traditions At root the volume is about our collective journey together as immigrant peoples who have stories and settlements to share as well as challenges and struggles to overcome that may be faced through the resources our many faiths offer

Transdisciplinary Perspectives on Transitions to Sustainability Edmond Byrne, Gerard Mullally, Colin Sage, 2016-06-17 Demonstrating how a university can in a very practical and pragmatic way be re envisioned through a transdisciplinary informed frame this book shows how through an open and collegiate spirit of inquiry the most pressing and multifaceted issue of contemporary societal unsustainability can be addressed and understood in a way that transcends narrow disciplinary work It also provides a practical exemplar of how far more meaningful deliberation understandings and options for action in relation to contemporary sustainability related crises can emerge than could otherwise be achieved Indeed it helps demonstrate how only through a transdisciplinary ethos and approach can real progress be achieved The fact that this can be done in parallel to or perhaps underneath the day to day business of the university serves to highlight how even micro seed initiatives can further the process of breaking down silos and reuniting C P Snow's two cultures after some four centuries of the relentless project of modernity While much has been written and talked about with respect to both sustainability and transdisciplinarity this book offers a pragmatic example which hopefully will signpost the ways others can will and indeed must follow in our common quest for real progress

The One, the Many, and the Trinity Marc A. Pugliese, 2011-04-15 Process metaphysics is frequently minimized or dismissed as a result of a failure to grasp its genuine

significance Developments of the last several centuries in philosophy science and physics fostered a revolution in metaphysics This book surveys the reasons for process philosophy and theology its genesis and historical development It considers Alfred Whitehead s metaphysics and Charles Hartshorne s and others treatment of process theology The One the Many and the Trinity analyzes perhaps the most ambitious and robust system of process thought developed from a Roman Catholic perspective that of Joseph A Bracken S J Bracken brings together traditional Christian Trinitarian theism with process thought while integrating into a fundamentally Whiteheadian metaphysics a litany of diverse sources including Aristotelianism Thomism German Idealism Anglo American Idealism social theory existentialism postmodern thought and contemporary philosophy of science The book goes on to examine Bracken s process response to the problem of the one and many from a more traditional Catholic philosophical and theological perspective ABOUT THE AUTHOR Marc A Pugliese is assistant professor of theology at Brescia University PRAISE FOR THE BOOK Pugliese offers an extremely well informed careful and accurate reading of the philosophy of Joseph Bracken certainly the greatest Catholic advocate of process theology in the second half of the twentieth century With this book Pugliese has provided the most extensive reconstruction and critique of Bracken s thought yet available Philip Clayton Ingraham Professor of Theology Claremont School of Theology

God, Evolution, and Animal Suffering Bethany N. Sollereder, 2018-10-29 After the publication of On the Origin of Species in 1859 theologians were faced with the dilemma of God creating through evolution Suddenly pain suffering untimely death and extinction appeared to be the very tools of creation and not a result of the sin of humanity Despite this paradigm shift the question of non human suffering has been largely overlooked within theodicy debates overwhelmed by the extreme human suffering of the twentieth century This book redresses this imbalance by offering a rigorous academic treatment of the questions surrounding God and the suffering of non human animals Combining theological philosophical and biblical perspectives this book explores the relationship between God and Creation within Christian theology First it dismantles the popular theological view that roots violence and suffering in the animal kingdom in the fall of humanity Then through an exploration of the nature of love it affirms that there are multiple reasons to suggest that God and creation can both be good even with the presence of violence and suffering This is an innovative exploration of an under examined subject that encompasses issues of theology science morality and human animal interactions As such it will be of keen interest to scholars and academics of religion and science the philosophy of religion theodicy and biblical studies
