Construction Cost Management Learning From Case Studies:

Construction Cost Management Keith Potts, Nii Ankrah, 2008-04-30 The Latham and Egan Reports have seen some significant changes in the role of the construction cost manager Keith Potts examines the key issues and best practice in the cost management of construction projects under traditional contracts and new methodologies All stages within the life cycle of a project are considered from pre contract to tendering and post contract Construction Cost Management Keith F. Potts, 2008 Aimed at students of surveying and construction management programmes this book uniquely embraces cost management in both the building and civil engineering sectors in the UK and overseas and should thus prove useful to practitioners Seminar questions are included at the end of each chapter with additional links to over 100 project case studies in order to reinforce the learning experience back cover **Construction Cost Management** Keith Potts, Nii Ankrah, 2014-01-23 In this updated and expanded second edition Keith Potts and Nii Ankrah examine key issues in construction cost management across the building and civil engineering sectors both in the UK and overseas Best practice from pre contract to post contract phases of the project life cycle are illustrated using major projects such as Heathrow Terminal 5 Crossrail and the London 2012 Olympics as case studies More worked examples legal cases case studies and current research have been introduced to cover every aspect of the cost manager's role Whole life costing value management and risk management are also addressed and self test questions at the end of each chapter support independent learning This comprehensive book is essential reading for students on surveying and construction management programmes as well as built environment practitioners with cost or project management responsibilities Cost Management of Construction Projects Donald Towey, 2013-06-12 The cost manager quantity surveyor plays a pivotal role in the financial and contract management of construction projects although the exact nature of the service they provide depends on the project employer's terms of engagement This can mean acting as consultant in a range of roles including cost and advisory services for budget setting to initiate a project cost management through the design and construction phases contract administration and acting as the client side project manager to oversee the entire building process Cost Management of Construction Projects focusses on the cost manager quantity surveyor engaged by the project client and discusses key elements that help drive project success including measurement based on the New Rules of Measurement published by RICS procurement cost planning contract administration and project cost management With examples it provides a thorough guide to the role in the workplace and in the field directly addressing the day to day situations faced by the cost manager quantity surveyor Donald Towey MRICS has extensive experience of the construction industry His experience began as an estimator with a glass glazing contractor in Manchester Following a number of positions with UK contractors he relocated to Australia and has worked with a number of developers and main contractors as well as doing freelance work He is currently working in contracts management in Sydney *Target Cost Contracting Strategy in Construction* Daniel W.M. Chan, Joseph H.L.

Chan,2016-10-14 The problems inherent in the traditional design bid build procurement method often lead to the adversarial working relationships within the construction industry Target cost contracts accompanied by a gain share pain share arrangement serving as a cost incentive mechanism have emerged in the United States the United Kingdom Australia and Hong Kong with the aim of achieving better value for money and more satisfactory overall project performance under a collaborative working relationship This book presents the underlying principles practicalities and a series of short case studies of applying the target cost contracting strategy Principles begin with the fundamentals then cover the development of target cost contracting in major countries cities definitions of target cost contracting perceived benefits potential difficulties and critical success factors for implementation Practices include the target cost contracting approach and process in general the key risk factors risk assessment model risk allocation and risk mitigation measures for target cost contracts in particular together with a conceptual framework for the performance measurement of target cost contracts Several short real life case studies from the United Kingdom Hong Kong Australia and New Zealand are provided for further illustration The book will appeal to a wide spectrum of readers from industrial practitioners to undergraduate students researchers and academics interested in construction contracts and procurement methods *Building Cost Planning for the Design Team* Jim Smith,D M Jaggar,Peter Love,2016-02-26 Cost management of all building projects has become increasingly important as clients in the public and private sector demand the highest quality cost planning services with accurate budgeting and cost control All members of the design team must integrate their activities to ensure that a high quality project is delivered on time and within budget This book considers building cost planning and cost control from the client and the design team s perspective where all decisions whether concerned with design cost quality time value or sustainability are taken as being interrelated The latest Royal Institute of British Architects RIBA Plan of Work and the New Rules of Measurement for Early Stage Estimating and Cost Planning issued by the Royal Institution of Chartered Surveyors RICS have been incorporated into this new text The book follows the building design cost planning process from the crucial inception stages and then through all the design stages to the completion of the technical design contract documentation and the tender It provides a template for good cost planning practice An essential addition to this third edition is the introduction of integrated design and documentation processes captured in building Information modelling BIM on line cost databases and computerised methods of cost planning The integrated approaches are explained and provide vital information and knowledge for practitioners involved in building projects All stakeholders involved in development and design and client teams in public and private sector policy making and implementation need to understand the new approaches to design management processes and how cost planning and design approaches are adapting to using the new technology in practice The interactive style using in text and review questions makes this ideal for students and practitioners alike in property architecture construction economics construction management real estate engineering facilities management and project management **Modern**
