Conscious Decisions of the Heart Wiltshire John (author),1901 **Consciousness of the Heart and Dimension of the Holy Spirit** Joseph Sener,2016-11-17 Humans have developed visible and invisible aids like science and religion for survival on Earth and searched for gifts of knowledge which is Gods will and His wisdom We wanted to know why we are on Earth Why we remember the past but not the future and who we really are We search for truth and like to be reminded that the knowledge of the truth belongs to creator God who dwells in higher dimensions **Cries of the Heart** Max Oliver,2011-09 writes poetry from his soul His words are happy and painful reminders of the realities of human life His words do rhyme but they also ring with truth regarding the everyday issues that matter most God the Scriptures attitudes love family church laughter tears aging death judgment and eternity When you read these poems you will not need a dictionary but you will need and want to have a heart that is filled with personal experiences that you can easily recall and ponder This is poetry that will touch your heart your intellect your emotions and your will Dr Lindsey Garmon *A New Republic of the Heart* Terry Patten,2018-03-06 A vision to address our environment economy politics culture and to catalyze the radical whole system change we need now Recasting current problems as emergent opportunities Terry Patten offers creative responses practices and conscious conversations for tackling the profound inner and outer work we must do to build an integral future In practical and personal terms he discusses how we can all become active agents of a transformation of human civilization and why that is necessary to our continued survival Patten s narrative focuses on two aspects of existence our dynamic but fractured and threatened world and our underlying wholeness and unity Only by honoring both of these realities simultaneously can we make sustainable changes in ourselves our communities our body politic and our planetary life support system A New Republic of the Heart provides a comprehensive understanding and inspiring vision for being the change in a way that can address the most intractable problems of our time Patten shows how we can come together in our communities for conversations that matter and describes new communities enterprises and forms of dialogue that integrate both inner personal growth work with outer awareness activism and service What Can Neuroscience Learn from Contemplative Practices? Zoran Josipovic,Bernard J. Baars,2016-09-22 A recent wave of brain research has advanced our understanding of the neural mechanisms of conscious states contents and functions A host of questions remain to be explored as shown by lively debates between models of higher vs lower order aspects of consciousness as well as global vs local models Baars 2007 Block 2009 Dennett and Cohen 2011 Lau and Rosenthal 2011 Over some twenty five centuries the contemplative traditions have also developed explicit descriptions and taxonomies of the mind to interpret experiences that are often reported in contemplative practices Radhakrishnan Rinbochay reflexivity or self knowing associated with consciousness the sense of self and consciousness and aspects of consciousness that are said to continue during sleep These real or claimed aspects of consciousness have not been fully integrated into scientific models so far This Research Topic in

Consciousness Research aims to provide a forum for theoretical proposals new empirical findings integrative literature reviews and methodological improvements inspired by meditation based models We include a broad array of topics including but not limited to replicable findings from a variety of systematic mental practices changes in brain functioning and organization that can be attributed to such practices their effects on adaptation and neural plasticity measurable effects on perception cognition affect and self referential processes We include contributions that address the question of causal attribution Many published studies are correlational in nature because of the inherent difficulty of conducting longitudinal experiments based on a major lifestyle decision such as the decision to commit to a mental practice over a period of years We also feature clinical and case studies integrative syntheses and significant opinion articles
