Chinas International Petroleum Policy Praeger Security International:

China, Oil and Global Politics Philip Andrews-Speed, Roland Dannreuther, 2011-05-12 China's rapid economic growth has led to a huge increase in its domestic energy needs. This book provides a critical overview of how China's growing need for oil imports is shaping its international economic and diplomatic strategy and how this affects global political relations and behaviour. Part One is focused on the domestic drivers of energy policy; it provides a systematic account of recent trends in China's energy sector and assesses the context and processes of energy policy making and concludes by showing how and why China's oil industry has spread across the world in the last fifteen years. Part Two analyses the political and foreign policy implications of this energy driven expansion and the challenges this potentially poses for China's integration into the international system. It examines a number of factors linked to this integration in the energy field including the unpredictabilities of internal policymaking, China's determination to promote its own critical national interests and the general ambition of the Chinese leadership to integrate with the international system on its own terms and at its own speed. The highly topical book draws together the various dimensions of China's international energy strategy and provides insights into the impact of this on China's growing international presence in various parts of the world.

China and International Security Donovan C. Chau, Thomas M. Kane, 2014-04-17 The first work of its kind, this strategic assessment of China's national security reveals the nation's intentions, capabilities and threats and their implications for the United States and the world. As China continues to develop the strategic means to advance its national interests in Asia and around the world, assessing its role in international security is the greatest strategic challenge now faced by the United States and its allies. *China and International Security* facilitates this critically important understanding, analyzing topics that range from strategic geography and orientation to gender ratios. Using detailed case studies and sharing expert insights, the work provides historical, internal and contemporary analyses that reveal the nature and character of China's national security. This three volume set is written for scholars, students and policymakers. The volumes offer in depth articles penned by intelligence professionals and journalists as well as entries by scholars in fields as diverse as international politics, history and strategic studies. While other works may attempt to predict the future of China's rise or the nature of China's future bilateral relationships, none so thoroughly examines the totality of China's domestic, regional and international security and their implications.

China's Energy Security Giulia Romano, Jean-Francois Meglio, 2016-06-10 A secure supply of energy is essential for all nations to sustain their economy and indeed their very survival. This subject is especially important in the case of China as China's booming economy and consequent demand for energy is affecting the whole world and in turn potentially driving realignments in international relations. Moreover, as this book argues, energy security should be considered more broadly to include issues of sustainability, environmental protection and the domestic organisation of energy policy and energy supply. This book presents a comprehensive picture of China's energy security. It covers all energy sectors: coal, oil, gas.

Security and Profit in China's Energy Policy Øystein Tunsjø, 2013-11-19 China has developed sophisticated hedging strategies to insure against risks in the international petroleum market It has managed a growing net oil import gap and supply disruptions by maintaining a favorable energy mix pursuing overseas equity oil production building a state owned tanker fleet and strategic petroleum reserve establishing cross border pipelines and diversifying its energy resources and routes Though it cannot be secured China's energy security can be insured by marrying government concern with commercial initiatives This book comprehensively analyzes China's domestic global maritime and continental petroleum strategies and policies establishing a new theoretical framework that captures the interrelationship between security and profit Arguing that hedging is central to China's energy security policy this volume links government concerns about security of supply to energy companies search for profits and by drawing important distinctions between threats and risks peacetime and wartime contingencies and pipeline and seaborne energy supply routes the study shifts scholarly focus away from securing and toward insuring an adequate oil supply and from controlling toward managing any disruptions to the sea lines of communication The book is the most detailed and accurate look to date at how China has hedged its energy bets and how its behavior fits a hedging pattern

The Chinese State, Oil and Energy Security Monique Taylor, 2014-04-23 Monique Taylor analyses the policy rationale and institutional underpinnings of China's state led or neomercantilist oil strategy and its development set against the wider context of economic transformation as the country transitions from a centrally planned to market economy

China's Trade Policy on International Air Transport Chrystal Zhang, Kareem Yarde, 2020-08-09 This book is a political economic analysis of China's transformation to become a global aviation power It aims to identify the driving forces that have shaped China's ever evolving international air transport policy direction and goals in the past four decades and further determines how and to what extent these driving forces have shaped China's considerations and strategies when executing its policy goals through bilateral air services negotiations The findings reveal that China's international air transport policymaking has remained in the domain of the country's aviation regulator which has enjoyed an exclusivity to exercise its power on the air transport sector The book argues that China's international air transport policy direction is in alignment with the country's overall strategic mission and its goal is set to support the country's endeavour to realise the China dream It concludes that factors at all levels interact with each other with a far reaching impact on the country's policy direction and goal setting however these factors are constrained by time and circumstances The book is a must read for a wide array of audiences including but not limited to scholars and industry professionals who have an interest in China's political economy policymaking international trade government behaviour corporate political activities air transport aviation liberalisation and bilateral negotiations

China's Foreign Policy Stuart Harris, 2014-07-02 China's inexorable rise as a major world power is one of the defining features of the contemporary political landscape. But should we heed the warnings of a so-called China threat? Is China set to become the next superpower? Or will its ambitions be tempered by economic and political realities both at home and abroad? In this insightful and balanced analysis, noted China expert Stuart Harris explores China's present foreign policy and its motivations, focusing in particular on the extent to which China will co-operate with the West in years to come. He considers what factors international or domestic will influence the foreign policies being shaped in Beijing, including how far the Chinese regime will adhere to existing global norms and the evolving international system. In contemplating this uncertain future, Harris assesses the considerable challenges and vulnerabilities likely to impact on Chinese foreign policy, leading it to be cautious and hesitant or assertive and aggressive on the international stage. Concise and authoritative, this book will be essential reading for anyone seeking a clearer understanding of the international relations of one of the world's most important powers.

Energy Security Cooperation in Northeast Asia Bo Kong, Jae H. Ku, 2015-04-24 Drawing on cutting-edge research from leading scholars, this book investigates state preferences for regime creation and assesses state capacity for executing these preferences in Northeast Asia's energy domain, defined as the geographical area comprising the following countries: Russia, Mongolia, China, Japan, South Korea, and North Korea. It examines questions pertaining to how states perceive the need and necessity for establishing a regime when it comes to the issue of energy and how much commitment they make to the effort in Northeast Asia. The book analyses the factors that shape each country's fundamental energy interests in the region, how these interests impact their attitudes toward engaging the region on energy security, and the way they carry out their regional engagement. Based on countries' interests in promoting institutionalized regional energy cooperation and their capacity for forging that cooperation, the collection assesses each state's role in contributing to an energy regime in Northeast Asia. It then concludes with a critique on the decade-plus quest for energy security cooperation in Northeast Asia and suggests ways forward for facilitating regional energy security cooperation. This book will be of great interest to scholars and students of environmental policy, energy policy, security studies, Asian studies, and international relations.

The Political Economy of State-owned Enterprises in China and India X. Yi-chong, 2012-09-24 Focused on unique features of economic development, this edited volume examines the nature and structure of corporate governance of several key state-owned enterprises in China and public sector units in India in five strategic sectors: oil and natural gas, steel, coal, electricity, generation, and banking industries.
