A Guide to Neuropsychological Testing for Health Care Professionals Eric R. Arzubi, Elisa Mambrino, 2010-04-20 Neuropsychological assessments are now widely used to identify learning disabilities and shape educational interventions However many special education teachers speech therapists lawyers pediatricians psychiatrists

rehabilitation counselors and a host of other helping professions know very little about how to interpret and act on information contained in neuropsychological assessments. The neuropsychological evaluations discussed in this text help shed light on a wide variety of psychiatric and medical conditions including learning disabilities, severe and persistent mental illness, traumatic brain injury, neuropsychiatric disorders with accompanying chronic cognitive deficits, and acquired or congenital neurological conditions. This book emphasizes the breadth and depth of neuropsychological assessments and the many practical uses they have, such as treatment planning, diagnosis, interventions, and many more. The authors offer practical guidance on neuropsychological testing and assessment across the lifespan from pediatric through geriatric patients. The book is designed specifically for those professionals with little to no training in neuropsychology that need to apply knowledge gleaned from neuropsychological assessments. Key topics discussed include neuropsychological testing and psychoanalysis; using neuropsychological instruments in school settings; possibilities and limitations of using neuropsychological information in vocational rehabilitation planning; neuropsychology and speech language therapy.

The Clinical Education and Supervisory Process in Speech-Language Pathology and Audiology Elizabeth McCrea, Judith Brasseur, 2024-06-01

As with the actual practices of speech language pathologists and audiologists, clinical education and supervision practices work best when they are grounded not only in concept and theory but also in research. Designed to act as a complete guide to both the theory and the research, *The Clinical Education and Supervisory Process in Speech Language Pathology and Audiology* provides the most up to date information on these crucial topics. Following in the footsteps of their mentor Jean Anderson, Drs. Elizabeth McCrea and Judith Brasseur have taken on the task of assembling important current research and best practices in clinical education and supervision into one comprehensive resource. With their prestigious team of contributing authors, this text represents the culmination of decades of study and real world best practices. *The Clinical Education and Supervisory Process in Speech Language Pathology and Audiology* covers clinical education and supervision across five unique constituent groups: clinical educators of graduate students, preceptors of audiology externs, mentors of clinical fellows, supervisors of support personnel, and supervisors of professionals transitioning between work settings. It also includes the latest information on certification and accreditation requirements for preparation in supervision. Topics include: Foundations; Anderson's Continuum of Supervision; Components of the Process; Expectations for Supervision; Practical Research in Supervision; Literature from other Disciplines; Obtaining Feedback About the Supervisory Process; The Ethics of Clinical Education and Supervision; Supervisor Self Study and Accountability; Interprofessional Education and Practice in Clinical Education and Supervision. Chapter appendices add numerous ancillary materials allowing readers to easily adopt the most successful processes and strategies the research has revealed. Sample scripts of supervisory conferences, self assessment tools, action plan tools, and analysis systems can all be found inside. *The Clinical Education and Supervisory Process in Speech Language Pathology and Audiology* is intended as a primary resource for anyone in those

professions in any setting who is engaged in the process of clinical education and supervision With this text as their guide clinical educators and supervisors will be able to ground their practices in the vast compiled research and study contained within *Speech, Language, and Hearing Programs in Schools* Pamela O'Connell,1997 To help you better serve special needs children PRO ED presents *Speech Language and Hearing Programs in Schools A Guide for Students and Practitioners* While other resources may provide the basics this book brings a comprehensive approach to improving your students communications skills Three logically organized interrelated sections Foundation Program Implementation and Contemporary Issues help readers increase their knowledge base by gaining a solid understanding of the principles and practices underpinning today s learning disability movement
