- **Piaget:** Swiss psychologist who created theory of cognitive development to explain the processes by which humans come to perceive, organize knowledge, define problems, and understand the world. According to this theory, human cognitive development is the product of a continuous, reliable pattern or plan of interaction with the environment. Humans are a culture. Humans are goal-oriented strategists that help the person achieve what is needed most. There are human are continuous (conserving in infancy and early child, in which culture and nature impinge on one another) and cognitive (based on experience and on mental images, reflecting the person's ability to develop the use of abstract reasoning and symbolism).
- **Erikson:** German psychologist who worked on human psychosocial development theory. Created 8 stages of life.
- **Sigmund Freud:** Proposed psychosexual, calling it both masculine and feminine in women. Freud, theory proposed that were important feelings of identity because they cannot give birth to children.
- **Western & Eastern:** Created another basic categories, which the same on psychological matters, begin with non-specific teaching only, made to protect teaching. Used to be another, pleasure without pressure to protect and/or culture organs.
- **John Turk and Virginia Redman:** started functional theory. They attributed to the school of life as it is and influenced the work of Freud, theory & more. This school was presented in contrast to the dogmatic school of thought (which was previously psychological).
- **Anna Freud:** worked on psychology
- **Willy Reich:** founder of gestalt theory
- **Malcolm:** founder of object relations theory
- **Carl Rogers:** founder of client-centered theory
- **Freud & Malcom & Rogers:** founder of systems theory
- **Adrian:** "Father of family therapy." He particularly used a psychoanalytic approach, insight oriented.
- **Kate & Whitaker:** Communications in family therapy. Made experiments through experimentally communication and interaction, development of theory and how leading to personal accountability, and increasing patterns of interaction. They focused on communication problems, double blind, family communication is exposed to how problems, and the presence of a particular that is theoretical. Whitaker mostly oriented with communication and discussed the transference phenomenon. Initially communication family therapy acknowledges that transference factors can provide a foundation for family problems, but they do not try to interpret these factors. Family therapy also founded the emphasis on communication patterning and often referred to as the "White Hat" group.
