De Tweede Ronde Winter 1988:

The History of the Book in the West: 1700-1800 Eleanor F. Shevlin, 2017-03-02 Influenced by Enlightenment principles and commercial transformations the history of the book in the eighteenth century witnessed not only the final decades of the hand press era but also developments and practices that pointed to its future the foundations of modern copyright a rapid growth in the publication circulation and reading of periodicals the promotion of niche marketing alterations to distribution networks and the emergence of the publisher as a central figure in the book trade to name a few The pace and extent of these changes varied greatly within the different sociopolitical contexts across the western world The volume's twenty four articles many of which proffer broader theoretical implications beyond their specific focus highlight the era's range of developments Complementing these articles the introductory essay provides an overview of the eighteenth century book and milestones in its history during this period while simultaneously identifying potential directions for new scholarship

Turning Tides Peter Van de Kamp, Frank Van Meurs, 1994 This odd but compelling collection transforms Dutch poems into English written with a heavy brogue The book offers much work that is startling though readers may find themselves partial to the marvelous touch of Michael O Loughlin and Eamon Grennan Publishers Weekly
