CICS Transaction Gateway for Z/OS Version 6.1 Nigel Williams, 2006 **The Complete Guide to CICS Transaction Gateway Volume 1 Configuration and Administration** Rufus Credle, Sue Bayliss, Leigh Compton, Robert Jones, Manuela Mandelli, Richard Mercadante, IBM Redbooks, 2014-08-08 In this IBM Redbooks publication you will gain an appreciation of the IBM CICS Transaction Gateway CICS TG product suite based on key criteria such as capabilities scalability platform CICS server support application language support and licensing model Matching the requirements to available infrastructure and hardware choices requires an appreciation of the choices available In this book you will gain an understanding of those choices and will be capable of choosing the appropriate CICS connection protocol APIs for the applications and security options You will understand the services available to the application developer when using a chosen protocol You will then learn about how to implement CICS TG solutions taking advantage of the latest capabilities such as IPIC connectivity high availability and Dynamic Server Selection Specific scenarios illustrate the usage of CICS TG for IBM z OS and CICS TG for Multipatforms with CICS Transaction Server for z OS and IBM WebSphere Application Server including connections in CICS configuring simple end to end connectivity all platforms with verification for remote and local mode applications and adding security XA support and high availability **CICS and SOA: Architecture and Integration Choices** Chris Rayns, Mark Cocker, Regis David, Subhajit Maitra, Dan Millwood, Ian Mitchell, Phil Wakelin, Nigel Williams, IBM Redbooks, 2012-03-26 The service oriented architecture SOA style of integration involves breaking an application down into common repeatable services that can be used by other applications both internal and external in an organization independent of the computing platforms on which the business and its partners rely In recent years CICS has added a variety of support for SOA and now provides near seamless connectivity with other IT environments This IBM Redbooks publication helps IT architects to select plan and design solutions that integrate CICS applications as service providers and requesters First we provide an introduction to CICS service enablement and introduce the architectural choices and technologies on which a CICS SOA solution can be based We continue with an in depth analysis of how to meet functional and non functional requirements in the areas of application interface security transactional scope high availability and scalability Finally we document three integration scenarios to illustrate how these technologies have been used by customers to build robust CICS integration solutions **Extend the CICS Explorer: A Better Way to Manage Your CICS** Chris Rayns, Scott Clee, Taku Miura, Shayla Robinson, Yusuke Tamura, John Taylor, Steve Wall, IBM Redbooks, 2010-05-03 CICS Explorer™ is the latest significant evolution in the management and analysis of your CICS environment It is a statement of intent from the CICS Development organization which is determined to ensure you can manage your CICS estate in a simple and easily extensible way using a combination of the following approaches Tried and trusted CICS expertise and technology The widely accepted user interfaces and integration power of the open source Eclipse platform Web 2 0 and RESTful programming this

technology underpins the CICS Explorer concept This IBM Redbooks publication shows how you can use the extensible design of CICS Explorer to complement the functionality already provided with added functionality tailored to the needs of your business We show you how to perform the following tasks Install the CICS plug in SDK into your eclipse environment Develop a simple plug in for the CICS Explorer Deploy the plug in into CICS Explorer We provide several useful examples of plug ins that we developed during the residency using the methodology we describe The starting point for the book is that you already have CICS Explorer installed and configured with connectivity to your CICS region or CICSplex and that you are looking for ways to customize CICS Explorer CICS Transaction Server from Start to Finish Chris Rayns,Sarah Bertram,George Bogner,Chris Carlin,Andre Clark,Amy Ferrell,Gordon Keehn,Peter Klein,Ronald Lee,Erhard Woerner,IBM Redbooks,2011-12-07 In this IBM Redbooks publication we discuss CICS which stands for Customer Information Control System It is a general purpose transaction processing subsystem for the z OS operating system CICS provides services for running an application online where users submit requests to run applications simultaneously CICS manages sharing resources the integrity of data and prioritizes execution with fast response CICS authorizes users allocates resources real storage and cycles and passes on database requests by the application to the appropriate database manager such as DB2 We review the history of CICS and why it was created We review the CICS architecture and discuss how to create an application in CICS CICS provides a secure transactional environment for applications that are written in several languages We discuss the CICS supported languages and each language s advantages in this Redbooks publication We analyze situations from a system programmer s viewpoint including how the systems programmer can use CICS facilities and services to customize the system design CICS for recovery and manage performance CICS Data access and where the data is stored including Temporary storage queues VSAM RLS DB2 IMSTM and many others are also discussed *Understanding SOA Security Design and Implementation* Axel Buecker,Paul Ashley,Martin Borrett,Ming Lu,Sridhar Muppidi,Neil Readshaw,IBM Redbooks,2008-05-29 Securing access to information is important to any business Security becomes even more critical for implementations structured according to Service Oriented Architecture SOA principles due to loose coupling of services and applications and their possible operations across trust boundaries To enable a business so that its processes and applications are flexible you must start by expecting changes both to process and application logic as well as to the policies associated with them Merely securing the perimeter is not sufficient for a flexible on demand business In this IBM Redbooks publication security is factored into the SOA life cycle reflecting the fact that security is a business requirement and not just a technology attribute We discuss an SOA security model that captures the essence of security services and securing services These approaches to SOA security are discussed in the context of some scenarios and observed patterns We also discuss a reference model to address the requirements patterns of deployment and usage and an approach to an integrated security management for SOA This book is a valuable resource to senior security officers architects and security administrators

Security Functions of IBM DB2 10 for z/OS Paolo Bruni, Marcelo Antonelli, Hyun Baek, Rick Butler, Ernie Mancill, IBM Redbooks, 2011-09-14 IBM DB2 9 and 10 for z OS have added functions in the areas of security regulatory compliance and audit capability that provide solutions for the most compelling requirements DB2 10 enhances the DB2 9 role based security with additional administrative and other finer grained authorities and privileges This authority granularity helps separate administration and data access that provide only the minimum appropriate authority The authority profiles provide better separation of duties while limiting or eliminating blanket authority over all aspects of a table and its data In addition DB2 10 provides a set of criteria for auditing for the possible abuse and overlapping of authorities within a system In DB2 10 improvements to security and regulatory compliance focus on data retention and protecting sensitive data from privileged users and administrators Improvements also help to separate security administration from database administration DB2 10 also lets administrators enable security on a particular column or particular row in the database complementing the privilege model This IBM Redbooks publication provides a detailed description of DB2 10 security functions from the implementation and usage point of view It is intended to be used by database audit and security administrators *IBM Z Integration Guide for Hybrid Cloud* Nigel Williams, Richard Gamblin, Rob Jones, IBM Redbooks, 2020-05-05 Today organizations are responding to market demands and regulatory requirements faster than ever by extending their applications and data to new digital applications This drive to deliver new functions at speed has paved the way for a huge growth in cloud native applications hosted in both public and private cloud infrastructures Leading organizations are now exploiting the best of both worlds by combining their traditional enterprise IT with cloud This hybrid cloud approach places new requirements on the integration architectures needed to bring these two worlds together One of the largest providers of application logic and data services in enterprises today is IBM Z making it a critical service provider in a hybrid cloud architecture The primary goal of this IBM Redpaper publication is to help IT architects choose between the different application integration architectures that can be used for hybrid integration with IBM Z including REST APIs messaging and event streams
