Review for the CLEP College Mathematics Examination Michael O'Donnell,Robert O'Donnell,Robert Floyd,2003 Video study guide for the mathematics section of the CLEP exam accompanied by paper study guide [An Image Processing Tour of College Mathematics](#) Yevgeniy V. Galperin,2021-02-10 An Image Processing Tour of College Mathematics aims to provide meaningful context for reviewing key topics of the college mathematics curriculum to help students gain confidence in using concepts and techniques of applied mathematics to increase student awareness of recent developments in mathematical sciences and to help students prepare for graduate studies The topics covered include a library of elementary functions basic concepts of descriptive statistics probability distributions of functions of random variables definitions and concepts behind first and second order derivatives most concepts and techniques of traditional linear algebra courses an introduction to Fourier analysis and a variety of discrete wavelet transforms all of that in the context of digital image processing Features Pre calculus material and basic concepts of descriptive statistics are reviewed in the context of image processing in the spatial domain Key concepts of linear algebra are reviewed both in the context of fundamental operations with digital images and in the more advanced context of discrete wavelet transforms Some of the key concepts of probability theory are reviewed in the context of image equalization and histogram matching The convolution operation is introduced painlessly and naturally

in the context of naive filtering for denoising and is subsequently used for edge detection and image restoration. An accessible elementary introduction to Fourier analysis is provided in the context of image restoration. Discrete wavelet transforms are introduced in the context of image compression and the readers become more aware of some of the recent developments in applied mathematics. This text helps students of mathematics ease their way into mastering the basics of scientific computer programming.
