Cross Cultural Perspectives On The Impossibility Of Global Bioethics Philosophy And Medicine:

Cross-Cultural Perspectives on the (Im)Possibility of Global Bioethics J. Tao Lai Po-wah, 2013-11-21 The contributions to this volume grew out of papers presented at an international conference Individual Community Society Bioethics in the Third Millennium held in Hong Kong Special Administrative Region of the People's Republic of China between 25-28 May 1999. The conference was organized by the Centre for Comparative Public Management and Social Policy and Ethics in Contemporary China Research Group in the Faculty of Humanities and Social Sciences at the City University of Hong Kong. The conference brought together scholars from east and west to investigate the challenges to caring and to traditional moral authorities that would confront bioethics in the third millennium. They explored the implications of moral loss and moral diversity in post-traditional and post-modern societies and how these would shape the character of medical care and bioethics discourse in the new era. A proceedings volume under the same title of Individual Community Society Bioethics in the Third Millennium was published in May 1999 for the conference meeting. **Bioethics and Moral**

Content: National Traditions of Health Care Morality H. Tristram Engelhardt Jr., L.M. Rasmussen, 2013-11-11 This volume explores the plurality of moral perspectives shaping bioethics. It is inspired by Kazumasa Hoshino's critical reflections on the differences in moral perspectives separating Japanese and American bioethics. It offers a rich perspective of the range of approaches to bioethics and brings into question whether there is unambiguously one ethics for bioethics to apply.

Reframing Disease Contextually Mary Ann Gardell Cutter, 2003-12-31 This volume will be of interest to philosophers of medicine, bioethicists and philosophers, medical professionals, historians of western medicine and health policymakers. The book provides an overview of key debates in the history of modern western medicine on the nature, knowledge and value of disease. It includes case studies of e.g. AIDS, genetic disease and gendered disease. **Person, Society and Value** Paulina Taboada, K.F. Cuddeback, P. Donohue-White, 2002-05-31 From a symposium marking the halfway point in their two-year research, scholars of philosophy and medicine from the US, Europe and Chile explore how the World Health Organization's definition of health can be both personalist and operational. The 11 papers cover health in relation to the human person, human well-being and society. The general conclusion is that answering philosophical questions regarding such matters as the essence and value of human health is crucial for solving political problems such as how to legislate health care policy. The International Academy of Philosophy undertook the project with funding from the Swiss National Science Foundation. Annotation copyrighted by Book News Inc. Portland, OR. *Cross-cultural Perspectives in Medical Ethics* Robert M.

Veatch, 2000 *Cross Cultural Perspectives in Medical Ethics* Second Edition is an anthology of the latest and best readings on the medical ethics of as many of the major religious, philosophical and medical traditions that are available today. **Global Health and International Community** John Coggon, Swati Gola, 2013-09-12 Global health arguably represents the most pressing issues facing humanity. Trends in international migration and transnational commerce render state boundaries

increasingly porous Human activity in one part of the world can lead to health impacts elsewhere Animals viruses and bacteria as well as pandemics and environmental disasters do not recognize or respect political borders It is now widely accepted that a global perspective on the understanding of threats to health and how to respond to them is required but there are many practical problems in establishing such an approach This book offers a foundational study of these urgent and challenging problems combining critical analysis with practically focused policy contributions The contributors span the fields of ethics human rights international relations law philosophy and global politics They address normative questions relating to justice equity and inequality and practical questions regarding multi organizational cooperation global governance and international relations Moving from the theoretical to the practical Global Health and International Community is an essential resource for scholars students activists and policy makers across the globe

Public Health Disasters: A Global Ethical Framework Michael Olusegun Afolabi, 2018-08-27 This book presents the first critical examination of the overlapping ethical sociocultural and policy related issues surrounding disasters global bioethics and public health ethics These issues are elucidated under the conceptual rubric Public health disasters PHDs The book defines PHDs as public health issues with devastating social consequences the attendant public health impacts of natural or man made disasters and latent or low prevalence public health issues with the potential to rapidly acquire pandemic capacities This notion is illustrated using Ebola and pandemic influenza outbreaks atypical drug resistant tuberculosis and the health emergencies of earthquakes as focal points Drawing on an approach that reckons with microbial existential and anthropological realities the book develops a relational based global ethical framework that can help address the local anthropological ecological and transnational dynamics of the ethical issues engendered by public health disasters The book also charts some of the critical roles that relevant local and transnational stakeholders may play in translating the proposed global ethical framework from the sphere of concept to the arena of action This title is of immense benefit to bioethics scholars public and global health policy experts as well as graduate students working in the area of global health public health ethics and disaster bioethics

Life the Human Being between Life and Death Anna-Teresa Tymieniecka, Zbigniew Zalewski, 2013-11-11 Medicine s crucial concern with health is perennial but its reflection concepts means change with the advance of science and social life We present here a fascinating panorama of current medical discussions with their philosophical underpinnings and queries as they have evolved from the past The role of Tymieniecka s phenomenology of life is brought forth as the system of philosophical reference

Globalizing Feminist Bioethics Rosemarie Putnam Tong, 2018-03-08 Globalizing Feminist Bioethics is a collection of new essays on the topic of international bioethics that developed out of the Third World Congress of the International Association of Bioethics in 1996 Rosemarie Tong is the primary editor of this collection in which she Gwen Anderson and Aida Santos look at such international issues as female genital cutting fatal daughter syndrome use of reproductive technologies male responsibility pediatrics breast cancer pregnancy and drug testing
