Cross Cultural Risk Perception Cross Cultural Risk Perception:

Cross-Cultural Risk Perception Ortwin Renn, Bernd Rohrmann, 2013-03-14 Cross Cultural Risk Perception demonstrates the richness and wealth of theoretical insights and practical information that risk perception studies can offer to policy makers risk experts and interested parties The book begins with an extended introduction summarizing the state of the art in risk perception research and core issues of cross cultural comparisons The main body of the book consists of four cross cultural studies on public attitudes towards risk in different countries including the United States Australia New Zealand France Germany Sweden Bulgaria Romania Japan and China The last chapter critically discusses the main findings from these studies and proposes a framework for understanding and investigating cross cultural risk perception Finally implications for communication regulation and management are outlined The two editors sociologist Ortwin Renn Center of Technology Assessment Germany and psychologist Bernd Rohrmann University of Melbourne Australia have been engaged in risk research for the last three decades They both have written extensively on this subject and provided new empirical and theoretical insights into the growing body of international risk perception research *Cross-cultural Differences in Risk Perception, But Cross-cultural Similarities in Attitudes Towards Perceived Risk* Elke U. Weber, Christopher Hsee, 1998

The Reality of Precaution Jonathan B. Wiener, Michael D. Rogers, James K. Hammitt, Peter H. Sand, 2013-05-13 The Precautionary Principle has sparked the central controversy over European and U S risk regulation The Reality of Precaution is the most comprehensive study to go beyond precaution as an abstract principle and test its reality in practice This groundbreaking resource combines detailed case studies of a wide array of risks to health safety environment and security a broad quantitative analysis and cross cutting chapters on politics law and perceptions The authors rebut the rhetoric of conflicting European and American approaches to risk and show that the reality has been the selective application of precaution to particular risks on both sides of the Atlantic as well as a constructive exchange of policy ideas toward better regulation The book offers a new view of precaution regulatory reform comparative analysis and transatlantic relations

Cultural Analysis Aaron Wildavsky, 2018-02-06 As a result of a lifetime of incomparably wide ranging investigations Aaron Wildavsky concluded that politics in the United States and elsewhere was a patterned activity exhibiting recurring regularities Political values beliefs and institutions were neither endlessly varied nor haphazardly organized They tended to exhibit a limited range of variation and were organized in discoverable predictable ways In Cultural Analysis the fourth collection of his essays posthumously published by Transaction Wildavsky argues that American politics public law and public administration are the contested terrain of rival inescapable political cultures Analysts of American politics distinguish liberals from conservatives and Democrats from Republicans but do not explain how these categories of political allegiance develop maintain themselves or change Wildavsky offers a cultural functional explanation for ideological and partisan coherence and realignment Wildavsky also felt that these dualisms did not adequately capture the ideological and partisan

variation he observed on the political landscape Like others he detected another recurring strain of political allegiance that of classical liberalism or libertarianism People of this political stripe valued freedom more than equality the primary political value of contemporary liberals and also more than order the primary political value of conservatives The value of Wildavsky's reconceptualization of the ideological and social foundations of political conflict compromise and coalition is assessed here by Wildavsky's former colleagues and students at the University of California Berkeley Dennis Coyle Richard Ellis Robert Kagan Austin Ranney and Brendon Swedlow

Psychological Perspectives on Risk and Risk Analysis Martina Raue, Eva Lerner, Bernhard Streicher, 2018-09-18 This authoritative collection goes beyond economic statistics and probability data to offer a robust psychological understanding of risk perception and risk taking behavior Expert contributors examine various risk domains in life and pinpoint cognitive emotional and personality factors contributing to individual differences in risk taking as well as the many nuances social demographics e.g. culture gender bring to risk decisions Coverage takes competing theories and studies into account to identify mechanisms involved in processing and acting on uncertainty And implications and applications are demonstrated in varied fields from updated risk models for the insurance sector to improved risk communication in health services to considering risk perception in policy decisions A sampling of the topics Personality and risk beyond daredevils risk taking from a temperament perspective Cognitive developmental and neurobiological aspects of risk judgments The group effect social influences on risk identification analysis and decision making Cognitive architectures as a scaffolding for risky choice models Improving understanding of health relevant numerical information Risk culture as a framework for improving competence in risk management Psychological Perspectives on Risk and Risk Analysis will be of great interest to researchers in and outside of psychology including decision making experts and behavioral economists Additionally this volume will appeal to practitioners who often have to make risky decisions such as managers and physicians

Proceedings of the 1st International Conference in Safety and Crisis Management in the Construction, Tourism and SME Sectors, **Handbook of Risk and Crisis Communication** Robert L. Heath, H. Dan O'Hair, 2020-10-28 The Handbook of Risk and Crisis Communication explores the scope and purpose of risk and its counterpart crisis to facilitate the understanding of these issues from conceptual and strategic perspectives Recognizing that risk is a central feature of our daily lives found in relationships organizations governments the environment and a wide variety of interactions contributors to this volume explore such questions as What is likely to happen to whom and with what consequences To what extent can science and vigilance prevent or mitigate negative outcomes and What obligation do some segments of local national and global populations have to help other segments manage risks shedding light on the issues in the quest for definitive answers The Handbook offers a broad approach to the study of risk and crisis as joint concerns Chapters explore the reach of crisis and risk communication define and examine key constructs and parse the contexts of these vital areas As a whole the volume presents a comprehensive array of studies that highlight the standard principles and theories on both topics serving as the

largest effort to date focused on engaging risk communication discussions in a comprehensive manner Now available in paperback the Handbook of Risk and Crisis Communication can be readily used in graduate coursework and individual research programs With perspectives from psychology sociology anthropology political science economics and communication the Handbook provides vital insights for all disciplines studying risk and is required reading for scholars and researchers investigating risk and crisis in various contexts Contemporary Issues in Social Science Simon Grima,Ercan Özen,Hakan Boz,2021-05-25 This international exploration on different economic systems provides a comprehensive account which brings a wide range of countries to the forefront in terms of both comparability and accountability this study shines a light on the differences in systems between states and provides information to equip readers to minimize those differences

Cross-Cultural Differences in Risk Perception,But Cross-Cultural Similarities in Attitudes Towards Perceived Risk Christopher K. Hsee,2011 In this study respondents from the P R C U S A Germany and Poland were found to differ in risk preference as measured by buying prices for risky financial options Chinese respondents were significantly less risk averse in their pricing than Americans when risk preference was assessed in the traditional expected utility framework However these apparent differences in risk preference were associated primarily with cultural differences in the perception of the risk of financial options rather than with cultural differences in attitude towards perceived risk In all cultures and equal proportion the majority of respondents was willing to pay more for options perceived as less risky i e were perceived risk averse These results are most naturally explained within a risk return conceptualization of risky choice They have practical implications for cross cultural negotiation and commerce by suggesting the locus of cultural differences in risky choice that may allow for the creation of joint gains **Enabling People-Centered Risk Communication for Geohazards**

Alessandro Amato,Sally H. Potter,Anna Scolobig,Eric M. Thompson,2024-07-18 In the field of natural hazards communicating science with the public and stakeholders involves entering the challenging and complex world of hazard and risk communication the ultimate purpose of which is to reduce the impact of impending hazards on people at risk According to the Sendai Framework 2015 2030 it is important to strengthen the utilization of media including social media traditional media big data and mobile phone networks to support national measures for successful disaster risk communication Sometimes risk communication has collateral and unexpected side effects that may lead to the adoption of inadequate behaviors In some instances this can even result in legal actions being taken against scientists and or emergency managers The role of the media should be to facilitate the accurate communication of hazard and risk information but such communication is often hampered by the fact that journalists have different agendas and priorities than scientists risk communicators and emergency managers This does not always support people in their decision making Accurate communication of hazard and risk is especially important when decisions have to be made within contexts where uncertainty is very high This is often the case with geohazards such as earthquakes tsunamis volcanic eruptions and landslides
