Demonic Males Apes And The Origins Of Human Violence:

Demonic Males Richard W. Wrangham, Dale Peterson, 1996 Whatever their virtues men are more violent than women Why do men kill rape and wage war and what can be done about it Drawing on the latest discoveries about human evolution and about our closest living relatives the great apes *Demonic Males* offers some startling new answers to these questions

Demonic Males Richard W. Wrangham, Dale Peterson, 1997-01 This is a penetrating analysis of the roots of human savagery dealing with the fundamental questions of why the majority of violence is perpetrated by men whether this is a matter of nature and whether anything can be done about it *Demonic Males* Richard W. Wrangham, Dale Peterson, 1997 This study is an analysis of the roots of human savagery dealing with the fundamental questions of why the majority of violence is perpetrated by men whether this is a matter of nature or nurture and whether anything can be done about it ,

The Voice of Public Theology Ted Peters, 2022-11-07 Public theologians are already thundering like prophets at climate change and racial injustice But the gale force winds of natural science blow through society as well The public theologian should be on storm watch **Constant Battles** Steven A. LeBlanc, Katherine E. Register, 2013-07-23 With armed conflict in the Persian Gulf now upon us Harvard archaeologist Steven LeBlanc takes a long term view of the nature and roots of war presenting a controversial thesis The notion of the noble savage living in peace with one another and in harmony with nature is a fantasy In *Constant Battles The Myth of the Peaceful Noble Savage* LeBlanc contends that warfare and violent conflict have existed throughout human history and that humans have never lived in ecological balance with nature The start of the second major U S military action in the Persian Gulf combined with regular headlines about spiraling environmental destruction would tempt anyone to conclude that humankind is fast approaching a catastrophic end But as LeBlanc brilliantly argues the archaeological record shows that the warfare and ecological destruction we find today fit into patterns of human behavior that have gone on for millions of years *Constant Battles* surveys human history in terms of social organization from hunter gatherers to tribal agriculturalists to more complex societies LeBlanc takes the reader on his own digs around the world from New Guinea to the Southwestern U S to Turkey to show how he has come to discover warfare everywhere at every time His own fieldwork combined with his archaeological ethnographic and historical research presents a riveting account of how throughout human history people always have outgrown the carrying capacity of their environment which has led to war Ultimately though LeBlanc s point of view is reassuring and optimistic As he explains the roots of warfare in human history he also demonstrates that warfare today has far less impact than it did in the past He also argues that as awareness of these patterns and the advantages of modern technology increase so does our ability to avoid war in the future

Washing the Brain □ Metaphor and Hidden Ideology Andrew Goatly, 2007-01-17 Contemporary metaphor theory has recently begun to address the relation between metaphor culture and ideology In this wide ranging book Andrew Goatly using lexical data from his database Metalude investigates how conceptual metaphor themes construct our thinking and

social behaviour in fields as diverse as architecture engineering education genetics ecology economics politics industrial time management medicine immigration race and sex He argues that metaphor themes are created not only through the universal body but also through cultural experience so that an apparently universal metaphor such as event structure as realized in English grammar is in fact culturally relative compared with e g the construal of cause and effect in the Algonquin language Blackfoot Moreover event structure as a model is both scientifically reactionary and as the basis for technological mega projects has proved environmentally harmful Furthermore the ideologies of early capitalism created or exploited a selection of metaphor themes historically traceable through Hobbes Hume Smith Malthus and Darwin These metaphorical concepts support neo Darwinian and neo conservative ideologies apparent at the beginning of the 21st century ideologies underpinning our social and environmental crises The conclusion therefore recommends skepticism of metaphor s reductionist tendencies

Human Evolution and Male Aggression , **The Causes of War and the Spread of Peace** Azar Gat,2017-04-14 Azar Gat sets out to resolve one of the age old questions of human existence why people fight and can they stop Spanning warfare from prehistory to the 21st century the book shows that neither an irresistible drive nor a cultural invention deadly violence and warfare have figured prominently in our behavioural toolkit since the dawn of our species People have always alternated between cooperation peaceful competition and violence to attain evolution shaped human desires A marked shift in the balance between these options has occurred since the onset of the industrial age Rather than modern war becoming more costly it hasn t it is peace that has become more rewarding Scrutinizing existing theories concerning the decline of war such as the democratic peace and capitalist peace Gat shows that they in fact partake of a broader Modernization Peace that has been growing since 1815 By now war has disappeared within the world s most developed areas Finally Gat explains why the Modernization Peace has been disrupted in the past as during the two World Wars and how challenges to it may still arise They include claimants to alternative modernity such as China and Russia anti modernists and failed modernizers that may spawn terrorism potentially unconventional While the world has become more peaceful than ever before there is still much to worry about in terms of security and no place for complacency
