Criminal Policy In Transition Onati International Series In Law And Society:

Criminal Policy in Transition Penny Green, Andrew Rutherford, 2000-11 This work arrives at a time when the literature in criminology is short of global perspectives It aims to help fill that gap while it presents important new insights into changing penal policy and practice The authors write knowledgeably about their home societies without being prematurely bounded by comparative criteria As a result they develop a complex and uneven image of similarities and differences of divergence and convergence through time In this sense the collection offers a model of how international collaborative work should proceed

Criminal Policy in Transition Penny Green, Andrew Rutherford, 2000 The book is a product of a workshop held several years ago at the International Institute for the Sociology of Law IISL in Onati Spain Foreword **Rethinking Law, Society and Governance** Gary Wickham, George Pavlich, 2001-12 The product of a workshop held at the International Institute for the Sociology of Law in Onati Spain the nine chapters collected here re examine the idea of governmentality most often associated with the work of Michel Foucault to measure its relevance to contemporary sociolegal issues The book considers whether political involvement should be a necessary component of a governmentality approach challenging governmentality theorists who have analyzed conceptual practices without demanding that they be applied to local political systems The contributors ponder topics including liberal government and resistance to it unemployment and crime as well as issues of philosophy and methodology Distributed by ISBS Annotation copyrighted by Book News Inc Portland OR *Surveillance and Crime* Roy Coleman, Michael McCahill, 2010-10-15 Surveillance has a long standing relationship with crime and its identification prevention detection and punishment With information on each citizen spanning up to 700 databases and over 4 million CCTV cameras in the United Kingdom alone this book explores how new technologies have given rise to new forms of monitoring and control Offering a comprehensive understanding of the relationship between surveillance crime and criminal justice this book explores the development of surveillance technologies within a broad historical context how new surveillance technologies are shaped by existing social relations political practices cultural traditions and organizational contexts the implications of the use of surveillance in responding to crime including biometrics DNA samples and electronic monitoring how new surveillance technologies reinforce old social divisions particularly along the lines of class race gender and age The book draws upon theoretical debates from a range of disciplines to shed light on this topical subject Engaging and authoritative this is an important read for advanced students and academics in criminology criminal justice social policy and sociology The Key Approaches to Criminology series celebrates the removal of traditional barriers between disciplines and specifically reflects criminology's interdisciplinary nature and focus It brings together some of the leading scholars working at the intersections of criminology and related subjects Each book in the series helps readers to make intellectual connections between criminology and other discourses and to understand the importance of studying crime and criminal justice within the context of broader debates The series is intended to have appeal across the entire range of undergraduate

and postgraduate studies and beyond comprising books which offer introductions to the fields as well as advancing ideas and knowledge in their subject areas

Travels of the Criminal Question Dario Melossi, Máximo Sozzo, Richard Sparks, 2011-02-03 The expression the criminal question does not at present have much currency in English language criminology The term was carried across from Italian debates about the orientation of criminology and in particular debates about what came to be called critical criminology One definition offered early in the debate described it as an area constituted by actions institutions policies and discourses whose boundaries shift According to this writer crime and the cultural and symbolic significance carried by law and criminal justice is an integral aspect of the criminal question The criminal question draws attention to the specific location and constitution of a given field of forces and the themes issues dilemmas and debates that compose it At the same time it enables connections to be made between these embedded realities and the wider conceivably global contours of influence and flows of power with which it connects This in turn raises many questions How far do the responses to crime and punishment internationally flow from and owe their contemporary shape to the cultural and economic transformations now widely known as globalisation How can something that is in significant ways embedded situated and locally produced also travel What is not in doubt is that it does travel and travel with serious consequences The international circulation of discourses and practices has become a pressing issue for scholars who try to understand their operation in their own particular cultural contexts This collection of essays seeks a constructive comparative view of these tendencies to convergence and divergence

Regulating Deviance Bernadette McSherry, Alan Norrie, Simon Bronitt, 2008-12-12 The criminal attacks that occurred in the United States on 11 September 2001 have profoundly altered and reshaped the priorities of criminal justice systems around the world Domestic criminal law has become a vehicle for criminalising new terrorist offences and other transnational forms of criminality Preventative detention regimes have come to the fore balancing the scales in favour of security rather than individual liberty These moves complement already existing shifts in criminal justice policies and ideologies brought about by adjusting to globalisation economic neo liberalism and the shift away from the post war liberal welfare settlement This collection of essays by leading scholars in the fields of criminal law and procedure criminology legal history law and psychology and the sociology of law focuses on the future directions for the criminal law in the light of current concerns with state security and regulating deviant behaviour

Imaginary Boundaries of Justice Ronnie Lippens, 2005-01-14 It has become increasingly difficult to speak or even think social or legal justice in an age when words have left their moorings Perhaps images are more stable than words maybe images and imagery possess a certain viscosity even a sensory quality which prevents them from evaporating This maybe is what this book is about The contributors to this collection explore the issue of how the Imaginary images imagery imagination has a role in the production and reproduction of visions of legal and social justice It argues that visions of justice are inevitably bounded Boundaries of visions of justice however are also imaginary They emerge within

imaginary spaces and as they are imaginary they are inherently unstable The book captures an emerging interest in the humanities and social sciences in images and the visual or the Imaginary more broadly This collection will appeal to scholars and students of social and legal theory visual culture justice and governance studies media studies and criminology

Luhmann on Law and Politics Michael King, Chris Thornhill, 2006-02-27 Perhaps more than any other social theorist in recent history Niklas Luhmann's work has aroused extreme and often antagonistic responses It has generated controversies about its political implications its resolute anti humanism and its ambitious critique of more established definitions of society social theory and sociology Now however a steadily growing number of scholars working in many different disciplines have begun to use aspects of Luhmann's sociology as an important methodological stimulus and as a theoretical framework for reorientating their studies This collection of essays includes critical and reconstructive contributions by a number of distinguished social theorists political theorists legal scholars and empirical sociologists Together they provide evidence of Luhmann's extensive and diverse relevance to the issues facing contemporary society and at the same time they enhance our understanding of the challenges posed by his theoretical paradigm to more traditional conceptions of social theory

Rethinking Equality Projects in Law Rosemary Hunter, 2008-08-01 The concept of equality has been a key animating principle of modern feminism and has been highly productive for feminist legal thought and feminist politics concerning law Today however given the failure to achieve material and psychic equality for women feminists have come to challenge the usefulness of equality as a concept a particular definition or a basis for strategising The papers in this collection reflect these concerns primarily in the context of English speaking common law cultures Collectively the papers analyse a range of equality projects across a number of areas of public and private law considering both competing conceptions of equality and alternatives to it In taking stock across a century and a half and around the globe the book illustrates the range of ways in which equality projects in law have been challenged by and remain a challenge for feminism

Contractual Certainty in International Trade Volkmar Gessner, 2008-12-19 Global business interacts efficiently despite the heterogeneity of social economic and legal cultures which according to widespread assumptions cause insecurities and uncertainties Breaches of contracts may occur more frequently and business relationships may be terminated more often in international than in domestic trade But most business people engaged in exporting or importing products or services seem to operate in a sufficiently predictable environment allowing successful ventures into the global market The apparent paradox presented by cultural institutional diversity and contractual efficiency in cross border business transactions is the focus of this volume of essays The wide range of approaches adopted by contributors to the volume include the Weberian concept of law as a tool for avoiding the risk of opportunism economic sociology which treats networks and relationships between contractual parties as paramount representatives of new institutional economics who discuss law as well as private governance institutions as most efficient responses to risk comparative economic sociologists who point to the varieties of legal cultures in the social

organisation of trust and national and international institutions such as the World Bank which try to promote legal certainty in the economy The purpose of the volume is to build on this interdisciplinary exercise by adding empirical evidence to ongoing debates regarding enabling structures for international business and by critically reviewing and discussing some of the propositions in the literature which contain interesting hypotheses on the effects of the internationalization of markets on market co ordination institutions and on the role of the state in the globalising economy

Enjoying the Tune of Expression: An Mental Symphony within **Criminal Policy In Transition Onati International Series In Law And Society**

In some sort of used by screens and the ceaseless chatter of quick communication, the melodic elegance and emotional symphony created by the written word often fade into the background, eclipsed by the relentless noise and disruptions that permeate our lives.
