Democratizing Health Consumer Groups In The Policy Process:

Democratizing Health the late Hans Löfgren, Evelyne de Leeuw, Michael Leahy, 2011-01-01 This book examines the important role of consumer activism in health policy in different national contexts In an age of shifting boundaries between state and civil society consumer groups are potentially drivers of democratisation in the health domain The expert contributors explore how their activities bring new dynamics to relations between service providers the medical profession government agencies and other policy actors This book is unique in comprehensively analysing the opportunities and dilemmas of this type of activism including ambiguous partnerships between consumer groups and stakeholders such as the pharmaceutical industry These themes are explored within an internationally comparative framework with case studies from various countries

The Public Shaping of Medical Research Peter Wehling, Willy Viehöver, Sophia Koenen, 2014-11-27 Patient organizations and social health movements offer one of the most important and illuminating examples of civil society engagement and participation in scientific research and research politics Influencing the research agenda and initiating funding and accelerating the development of diagnostic tools effective therapies and appropriate health care for their area of interest they may champion alternative sometimes controversial programs or critique dominant medical paradigms Some movements and organizations advocate for medical recognition of contested illnesses as with fibromyalgia or ADHD while some attempt to de-medicalize others such as obesity or autism Bringing together an international selection of leading scholars and representatives from patients organizations this comprehensive collection explores the interaction between civil society groups and biomedical science technology development and research politics It takes stock of the key findings of the research conducted in the field over the past two decades and addresses emerging problems and future challenges concerning the interrelations between health movements and patient organisations on the one hand and biomedical research and research policies on the other hand Combining empirical case studies with conceptual discussion the book discusses how public participation can contribute to as well as restrict the democratization of scientific knowledge production This volume is an important reference for academics and researchers with an interest in the sociology of health and illness science and technology studies the sociology of knowledge medical ethics or healthcare management and research as well as medical researchers and those involved with health related civil society organizations

Diversity in Leadership Joy Damousi, Kim Rubenstein, Mary Tomsic, 2014-11-25 While leadership is an over used term today how it is defined for women and the contexts in which it emerges remains elusive Moreover women are exhorted to exercise leadership but occupying leadership positions has its challenges Issues of access acceptable behaviour and the development of skills to be successful leaders are just some of them Diversity in Leadership Australian women past and present provides a new understanding of the historical and contemporary aspects of Indigenous and non Indigenous women's leadership in a range of local national and international contexts It brings interdisciplinary expertise to the topic from leading scholars in a range of fields and diverse

backgrounds The aims of the essays in the collection document the extent and diverse nature of women's social and political leadership across various pursuits and endeavours within democratic political structures **Health Advocacy, Inc.** Sharon Batt, 2017-06-15 Over the past several decades a gradual reduction in state funding has pressured patient groups into forming private sector partnerships raising an important ethical question do these alliances ultimately lead to policies that are counter to the public interest Health activist scholar and cancer survivor Sharon Batt examines the issue by investigating Canada's breast cancer movement from 1990 to 2010 Health Advocacy Inc dissects the relationship between the companies that sell pharmaceuticals and the individuals who use them drawing links between neoliberalism and corporate financing and the ensuing threat to the public health care system Combining archival analysis interviews with advocacy and industry representatives and personal observation Batt argues that the resulting power imbalance continues to challenge the groups ability to put patients interests ahead of those of the funders A movement that once encouraged democratic participation in the development of health policy now eerily echoes the demands of the pharmaceutical industry Batt's thorough account of this shift defines the stakes of activism in public health today *To Fix Or To Heal* Joseph E. Davis, Ana Marta Gonzalez, 2016-02-26 Do doctors fix patients Or do they heal them For all of modern medicine's many successes discontent with the quality of patient care has combined with a host of new developments from aging populations to the resurgence of infectious diseases which challenge medicine's overreliance on narrowly mechanistic and technical methods of explanation and intervention or fixing patients The need for a better balance for more humane healing rationales and practices that attend to the social and environmental aspects of health and illness and the experiencing person is more urgent than ever Yet in public health and bioethics the fields best positioned to offer countervailing values and orientations the dominant approaches largely extend and reinforce the reductionism and individualism of biomedicine The collected essays in *To Fix or To Heal* do more than document the persistence of reductionist approaches and the attendant extension of medicalization to more and more aspects of our lives The contributors also shed valuable light on why reductionism has persisted and why more holistic models incorporating social and environmental factors have gained so little traction The contributors examine the moral appeal of reductionism the larger rationalist dream of technological mastery the growing valuation of health and the enshrining of individual responsibility as the seemingly non coercive means of intervention and control This paradigm challenging volume advances new lines of criticism of our dominant medical regime even while proposing ways of bringing medical practice bioethics and public health more closely into line with their original goals Precisely because of the centrality of the biomedical approach to our society the contributors argue challenging the reductionist model and its ever widening effects is perhaps the best way to press for a much needed renewal of our ethical and political discourse *The Politics of Maternity* Rosemary Mander, Jo Murphy-Lawless, 2013-04-12 The evidence surrounding the skills and approaches to support good birth has grown exponentially over the last two decades but so too have the obstacles facing women and midwives who

strive to achieve good birth This new book critically explores the complex issues surrounding contemporary childbirth practices in a climate which is ever more medicalised amidst greater insecurity at broad social and political levels The authors offer a rigorous and thought provoking analysis of current clinical managerial and policy making environments and how they have prevented sustaining the kind of progress we need The Politics of Maternity explores the most hopeful developments such as the abundant evidence for one to one care for women and sets these accounts against the background of changes in health service organisation and provision that block these approaches from becoming an everyday occurrence for women giving birth The book sets out the case for renewed attention to the politics of childbirth and what this politics must entail if we are to give birth back to women Designed to help professionals cope with the transition from education to the reality of the system within which they learn and practise this inspiring book will help to assist them to function and care effectively in a changing health care environment

Healthcare Activism Susi Geiger, 2021-09-09 What is the role of activists and civil society in defining and defending the collective good in healthcare especially in cases where that good seems to be heavily shaped by market dynamics Presenting conceptual and empirical studies from a variety of healthcare contexts and theoretical perspectives this book addresses this vital question by drawing together multidisciplinary scholarship from Science and Technology Studies Sociology Organisation Studies Marketing Philosophy and Public Health Healthcare has undergone three major changes over the past decades the advent of personalized medicine the marketization of public care systems and the digitalization of healthcare services This book maps these changes and illustrates the extent to which they are interlinked to produce a seemingly unstoppable move toward individualization in healthcare The book also highlights the tensions and challenges arising from these interlinkages and traces how activists react to these tensions to argue for and defend the common good It thus sketches a multifaceted picture of healthcare activism in the 21st century as civil society responds to these dynamics at the crossroads of markets and morals economic and social justifications individual and collective and digital and non digital worlds Crucially it also highlights potential solutions for heightening patient voices and broadening participation in healthcare markets in a post Covid 19 world

The Palgrave Handbook of Intersectionality in Public Policy Olena Hankivsky, Julia S. Jordan-Zachery, 2019-02-01 Grounded in black feminist scholarship and activism and formally coined in 1989 by black legal scholar Kimberl Williams Crenshaw intersectionality has garnered significant attention in the field of public policy and other disciplines fields of study The potential of intersectionality however has not been fully realized in policy largely due to the challenges of operationalization Recently some scholars and activists began to advance conceptual clarity and guidance for intersectionality policy applications yet a pressing need remains for knowledge development and exchange in relation to empirical work that demonstrates how intersectionality improves public policy This handbook fills this void by highlighting the key challenges possibilities and critiques of intersectionality informed approaches in public policy It brings together international scholars across a variety of policy sectors and disciplines to consider the state

of intersectionality in policy research and analysis. Importantly, it offers a global perspective on the added value and how to use intersectionality to inform policy approaches that aim to advance equity and social justice. **Europeanization in Sweden**

Anna Meeuwisse, Roberto Scaramuzzino, 2018-12-17. Notwithstanding its many successes since 1945, the project of European integration currently faces major difficulties from financial crises and mass immigration to the departure of the UK from the European Union. At the same time, these challenges have spurred civil society organizations within and across Europe, revealing a shared public sphere in which citizens can mobilize around refugee rights, opposition to austerity policies, and other issues. **Europeanization in Sweden** assembles new empirical research on how these processes have played out in one of the continent's wealthiest nations, providing insights into whether and how the Swedish model can guide European integration. **Civil Society and Health** Scott L. Greer, Matthias Wismar, Gabriele Pastorino, Monika Kosinska, 2017-11-20

Civil Society Organizations (CSOs) can make a vital contribution to public health and health systems, but harnessing their potential is complex in a Europe where government-CSO relations vary so profoundly. This study is intended to outline some of the challenges and assist policy makers in furthering their understanding of the part CSOs can play in tandem and alongside government. To this end, it analyses existing evidence and draws on a set of seven thematic chapters and six mini case studies. They examine experiences from Austria, Bosnia Herzegovina, Belgium, Cyprus, Finland, Germany, Malta, the Netherlands, Poland, the Russian Federation, Slovenia, Turkey, and the European Union, and make use of a single assessment framework to understand the diverse contexts in which CSOs operate. The evidence shows that CSOs are ubiquitous, varied, and beneficial, and the topics covered in this study reflect such diversity of aims and means: anti-tobacco advocacy, food banks, refugee health, HIV/AIDS prevention and cure, and social partnership. CSOs make a substantial contribution to public health and health systems with regards to policy development, service delivery, and governance. This includes evidence provision, advocacy, mobilization, consensus building, provision of medical services, and of services related to the social determinants of health, standard setting, self-regulation, and fostering social partnership. However, in order to engage successfully with CSOs, governments do need to make use of adequate tools and create contexts conducive to collaboration. To guide policy makers working with CSOs through such complications and help avoid some potential pitfalls, the book outlines a practical framework for such collaboration. This suggests identifying key CSOs in a given area, clarifying why there should be engagement with civil society, being realistic as to what CSOs can or will achieve, and an understanding of how CSOs can be helped to deliver.
