Chasing Technoscience Chasing Technoscience:

Chasing Technoscience Don Ihde, Evan Selinger, 2003-06-18 an original quirky and illuminating collection of material concerning the relatively new and exciting field of technoscience studies The editors choice of multiple approaches to the work of four major figures is wholly suited to clarifying their unorthodox and consequently somewhat elusive philosophical positions Robert Scharff Although often absent from the considerations of philosophers sociologists and anthropologists the material dimension plays an important and even essential role in the practices of the sciences *Chasing Technoscience Matrix for Materiality* begins to redress this absence by bringing together four prominent figures who make technoscience or science embodied in its technologies a central theme of their work Through lively personal interviews and substantive essays the ideas of Andrew Pickering Don Ihde Donna Haraway and Bruno Latour are brought to bear on the question of materiality in technoscience The work of these theorists is then compared and critiqued in essays by colleagues *Chasing Technoscience* is a ground breaking state of the art look at current developments in technoscience

Chasing Technoscience Don Ihde, Evan Selinger, 2003 Through lively personal interviews and substantive essays the ideas of Andrew Pickering Don Ihde Donna Haraway and Bruno Latour are brought to bear on the question of materiality in technoscience The work of these theorists is then compared and critiqued in essays by colleagues

Postphenomenology Evan Selinger, 2012-02-01 Postphenomenology is the first book devoted exclusively to the interpretation and advancement of prominent phenomenologist Don Ihde s landmark contributions to history philosophy sociology science sound studies and technology studies Ihde has made a direct and lasting impact on the study of technological experience across the disciplines and acquired an international following of diverse scholars along the way many of whom contribute to Postphenomenology including Albert Borgmann who characterizes Ihde as being among the most interesting and provocative contemporary American philosophers The contributors situate assess and apply Ihde s philosophy with respect to the primary themes that his oeuvre emphasizes They not only clarify Ihde s work but also make significant contributions to the philosophy of technology phenomenology hermeneutics and the philosophy of science A comprehensive response from Ihde concludes the volume

Science, Technology and Society Wenceslao J. González, 2005 The emphasis on the realm of Science Technology and Society or Science and Technology Studies may have the same degree of relevance that the historical turn had in the past It is a social turn which affects philosophy of science as well as philosophy of technology It includes a new vision of the aims processes and results of scientific activities and technological doings because the focus of attention is on several aspects of science and technology which used to be considered as secondary or even irrelevant This turn highlights science and technology as social undertakings rather than intellectual contents According to this new vision there are several important changes as to what should be studied the objects of research how it should be studied the method and what the consequences for those studies are The new focus of attention can be seen in many changes and among them are several of

special interest a from what science and technology are in themselves mainly epistemic contents to how science and technology are made largely social constructions b from the language and structure of basic science to the characteristics of applied science and the applications of science c from technology as a feature through which human beings control their natural surroundings a step beyond technics due to the contribution of science to technology as a social practice and an instrument of power and d from the role of internal values necessary for mature science and innovative technology to the role of contextual or external values cultural political economic of science and technology Wenceslao J Gonzalez is professor of logic and philosophy of science at the University of A Coru a Spain He has been vicedean of the School of Humanities and president of the Committee of Doctoral Programs at the University He has been a visting researcher at the Universities of St Andrews M nster and London London School of Economics as well as Visiting fellow at the Center for Philosophy of Science University of Pittsburgh He has given lectures at the Universities of Pittsburgh Stanford Quebec and Helsinki The conferences in which he has participated include those organized by the Universities of Uppsala New South Wales Bologne and Canterbury New Zealand He has edited 20 volumes and published 70 papers He is the editor of the monographic issues on Philosophy and Methodology of Economics 1998 and Lakatos s Philosophy Today 2001 His writings include Economic Prediction and Human Activity An Analysis of Prediction in Economics from Action Theory 1994 On the Theoretical Basis of Prediction in Economics 1996 Rationality in Economics and Scientific Predictions A Critical Reconstruction of Bounded Rationality and its Role in Economic Predictions 1997 Lakatos s Approach on Prediction and Novel Facts 2001 Rationality in Experimental Economics An Analysis of R Selten s Approach 2003 From Erkl renVerstehen to PredictionUnderstanding The Methodological Framework in Economics 2003 and The Many Faces of Popper s Methodological Approach to Prediction 2004

Mechademia 3 Frenchy Lunning, 2014-11-01 Dramatic advances in genetics cloning robotics and nanotechnology have given rise to both hopes and fears about how technology might transform humanity As the possibility of a posthuman future becomes increasingly likely debates about how to interpret or shape this future abound In Japan anime and manga artists have for decades been imagining the contours of posthumanity creating dazzling and sometimes disturbing works of art that envision a variety of human nonhuman hybrids biological mechanical human animal and human monster Anime and manga offer a constellation of posthuman prototypes whose hybrid natures require a shift in our perception of what it means to be human Limits of the Human the third volume in the Mechademia series maps the terrain of posthumanity using manga and anime as guides and signposts to understand how to think about humanity s new potentialities and limits Through a wide range of texts the folklore inspired monsters that populate Mizuki Shigeru s manga Japan s Gothic Lolita subculture Tezuka Osamu s original cyborg hero Atom and his manga version of Fritz Lang s Metropolis along with tomo Katsuhiro s 2001 anime film adaptation the robot anime Gundam and the notion of the uncanny in Ghost in the Shell 2 Innocence among others the essays in this volume reject simple human nonhuman dichotomies and instead encourage a provocative rethinking

The Philosophy of Expertise Evan Selinger, Robert P. Crease, 2006 From the use of expert testimony in the courtroom to the advice we rely on to solve key economic political and social problems expertise is an essential part of our decision making process However the extent to which experts can be trusted is a subject of persistent and contentious debate The Philosophy of Expertise is the first collection to explore the fundamental philosophical issues surrounding these authorities and their expert knowledge Part 1 considers the problems surrounding the issue of trust and deference part 2 launches a phenomenological clarification of expertise that pinpoints the universal structures embodied in cognition and affect and part 3 examines the consequences of the social and technical externalization of expertise Contributors including Edward Said Alvin Goldman Peter Singer Hubert Dreyfus Julia Annas Harry Collins and Don Ihde draw on a number of intellectual approaches to explore the justification of expert authority the potentially dangerous role of expertise in a liberal democratic society how laypeople can critique experts and the social and ideological character of expert advice The contributors also discuss the reasoning process of judges and juries the ancient Greek view of moral conduct and the incorporation of experts into governmental bureaucracy By honestly tackling the legitimacy and consistency of various positions this volume sheds much needed light on the theoretical dimensions of a controversial and pervasive practice Contributors Alvin I Goldman Don Ihde Edward Said Evan Selinger and John Mix Evan Selinger and Robert P Crease H M Collins and Robert Evans H I ne Mialet Hubert Dreyfus John Hardwig Julia Annas Paul Feyerabend Peter Singer Scott Brewer Steve Fuller Steven Turner

Age of System Hunter Heyck, 2015-09 In the years after World War II a new generation of scholars redefined the central concepts and practices of social science in America Before the Second World War social scientists struggled to define and defend their disciplines After the war high modern social scientists harnessed new resources in a quest to create a unified

understanding of human behavior and to remake the world in the image of their new model man In Age of System Hunter Heyck explains why social scientists shaped by encounters with the ongoing organizational revolution and its revolutionary technologies of communication and control embraced a new and extremely influential perspective on science and nature one that conceived of all things in terms of system structure function organization and process He also explores how this emerging unified theory of human behavior implied a troubling similarity between humans and machines with freighted implications for individual liberty and self direction These social scientists trained a generation of decision makers in schools of business and public administration wrote the basic textbooks from which millions learned how the economy society polity culture and even the mind worked and drafted the position papers books and articles that helped set the terms of public discourse in a new era of mass media think tanks and issue networks Drawing on close readings of key texts and a broad survey of more than 1 800 journal articles Heyck follows the dollars and the dreams of a generation of scholars that believed in the system He maps the broad landscape of changes in the social sciences focusing especially intently on the ideas and practices associated with modernization theory rational choice theory and modeling A highly accomplished historian Heyck relays this complicated story with unusual clarity

Sustainability in the Anthropocene Róisín Lally, 2019-04-29 We are facing an environmental crisis that some say is ushering a new geological epoch the Anthropocene one that threatens not only a great deal of life on the planet but also our understanding of who we are and our relation to the natural world In the face of this crisis it has become clear that we need a more sustainable culture In fact the language of sustainability has become pervasive in our culture and has deeply ingrained itself in our understanding of what living a good life would entail Sustainability however is a contested word and it carries with it often implicitly and unacknowledged deep philosophical claims that are entangled with all kinds of assumptions and power relations some of them very problematic This book attempts to set this urgent goal of sustainability free from its more reductive and harmful interpretations and to thereby apply a more thoughtful environmental ethics to current and emerging technologies particularly those involving reproduction and the harnessing of energy that dominate our elemental relations to sun and air wind and water earth and forest The book is divided into 4 sections 1 Sustainability A Contested Term 2 Sustainability and Renewable Technologies Sun Air Wind Water 3 Sustainability and Design and 4 Sustainability and Ethics The first section sets the context for our studies and opens a space for thinking sustainability in a more thoughtful way than is often the case in contemporary discussions The next two sections are the heart of our contribution to postphenomenology and technoscience and the essays here turn to concrete examinations of particular technologies and questions of technological design in the light of our environmental crisis The fourth section closes the book by drawing some more general implications for ethics from the intersection of the foregoing themes
