Bottoming Out the Universe Richard Grossinger, 2020-04-07 An exploration into consciousness the universe and the nature of reality Draws on transdimensional physics and biology reincarnation and past life memories animal consciousness multiple identities thoughtforms soul pictures and paranormal phenomena like crop circles and poltergeists Explores the riddle of personal identity and how it differs from consciousness Reveals that consciousness is more than encompassing all that exists it also speaks to what has yet to manifest Scientific orthodoxy views the universe as conceived of matter protons neutrons electrons down to the smallest particle quarks But when you keep digging what is beneath quarks The scientific worldview does not take into account consciousness or life itself How did consciousness become part of the material universe Is it a by product of brain chemistry or a constituent of reality Or to dig deeper which is more fundamental the existence of an objective physical universe or our subjective experience of it In this investigation into consciousness the universe and the nature of reality Richard Grossinger offers a wide ranging foundation for reimagining the universe as based in consciousness rather than matter He presents in depth analysis of the standard scientific description of the universe revealing the holes in its theories Exploring the interpenetration of matter and all reality by consciousness the author looks at reincarnation and past life memories examining famous and lesser known but verifiable accounts He then explores the nature and origin of consciousness with accompanying explorations of animal consciousness the brain as a computer multiple identities thoughtforms soul pictures and paranormal phenomena like UFOs faeries and poltergeists He also examines concepts from physics that combine elements of both consciousness and matter such as collapsing waveforms and the uncertainty principle

of quantum mechanics Examining nonlocal and transpersonal modes of consciousness Grossinger looks at the difference between consciousness and personal identity He expands this discussion with reflections on Sethian cosmology using Seth's own words and Jane Roberts's and John Friedlander's interpretations He reveals that consciousness also encompasses what has yet to manifest and explains why the universe exists at all why there is something rather than nothing Skewering the materialist paradigm and placing consciousness alongside mass gravity and heat as an essential component of the universe Grossinger proposes that reality is a thoughtform where sentient beings collaborate to bring about a concrete realm vibrating at their own frequency

Human Intellect: Optimal Tuning and Control Yuri Iserlis, 2020-07-22 It is easily proved that the human brain equipped sense organs can work as an universal measuring tool and measure with sufficient accuracy after some training not only a distance mass or volume but and parameters of important personal functions Unfortunately this instrument does not have an indicator device panel and results of measurements usually hidden in the depth of subconscious part of mind To extract these results of measurements at first is needed to find an access code for this information secondly to deduce this information in a convenient for perception form and after that to decipher it Based on this approach a new method of direct measurement of intellectual parameters was used for appraisal such characteristics of intellect and mind as creativity intuition willpower stress level vital energy index etc Verification of the accuracy of measurement of some bio physical parameters measured by the same method for example number of thrombocytes in the blood is carried out by comparison with laboratory blood tests Research and physical measurements of a person's intellectual abilities have shown that they can change significantly from the influence of many external factors and first of all of light electromagnetic and sound perceptions of the senses both for the better and for the worse This allows significantly increasing the capabilities and expanding the range of use of any entrainment technology Using algorithms of multi parameter optimization the method allows increasing the level of intellect and its components in several times practically for everyone Measurement of willpower and stress opens the prospect for many people to maintain their health and activity at the proper level throughout life In the book are collected also some rules and methods allowing to support intellectual abilities of the mind on an optimum level by means of mindset management control of the subconscious mind cognitive control and control emotions Method of measurement of intellectual abilities and compatibility of team members can be used in process of the hiring searching a bride etc
