Doron A. Peled, Yih-Kuen Tsay, 2005-09-19 The Automated Technology for Verification and Analysis ATVA international symposium series was initiated in 2003 responding to a growing interest in formal verification spurred by the booming IT industry particularly hardware design and manufacturing in East Asia. Its purpose is to promote research on automated verification and analysis in the region by providing a forum for interaction between the regional and the international research industrial communities of the field. ATVA 2005 the third of the ATVA series was held in Taipei Taiwan October 4-7 2005. The main theme of the symposium encompasses significant complexities, tools and applications of automated methods for verification and analysis. The symposium was co-located and had a two day overlap with FORTE 2005 which was held October 2-5 2005. We received a total of 95 submissions from 17 countries. Each submission was assigned to three Program Committee members who were helped by their subreviewers for rigorous and fair evaluation. The final deliberation by the Program Committee was conducted over email for a duration of about 10 days after nearly all review reports had been collected. In the end 33 papers were selected for inclusion in the program. ATVA 2005 had three keynote speeches given respectively by Amir Pnueli joint with FORTE 2005 Zohar Manna and Wolfgang Thomas. The main symposium was preceded by a tutorial day consisting of three two hour lectures given also by the keynote speakers.
