Chase, 2009-05-01 Heroism is having to do something drastic to keep from getting killed That's what security consultant Pete Avakian tells his dinner date Dr Judy Rose on a night out in Beijing Little does he know that his words are about to be illustrated in graphic detail Just as they are getting to know each other chaos erupts in the street China has launched missiles at Taiwan a long history of tension has given way to war Suddenly Pete and Judy are confronted by hostile youths and an act of self defense puts them on the run from the authorities in a country crazed by war Pursued by the Chinese police the Americans race toward the Mongolian border Their only chance of survival is to work together to escape a country gone mad even if that means taking drastic action **Magic in Britain** Robin Melrose, 2018-03-08 Magic both benevolent white and malign black has been practiced in the British Isles since at least the Iron Age 800 BCE CE 43 Curse tablets metal plates inscribed with curses intended to harm specific people date from the Roman Empire The Anglo Saxons who settled in England in the fifth and sixth centuries used ritual curses in documents and wrote spells and charms When they became Christians in the seventh century the new magicians were saints who performed miracles When William of Normandy became king in 1066 there was a resurgence of belief in magic The Church was able to quell the fear of magicians but the Reformation saw its revival with numerous witchcraft trials in the late 16th and 17th centuries Convergent Evolution George R. McGhee, Jr., 2011-11-04 An analysis of convergent evolution from molecules to ecosystems demonstrating the limited number of evolutionary pathways available to life Charles Darwin famously concluded On the Origin of Species with a vision of endless forms most beautiful continually evolving More than 150 years later many evolutionary biologists see not endless forms but the same or very similar forms evolving repeatedly in many independent species lineages A porpoise's fishlike fins for example are not inherited from fish ancestors but are independently derived convergent traits In this book George McGhee describes the ubiquity of the phenomenon of convergent evolution and connects it directly to the concept of evolutionary constraint the idea that the number of evolutionary pathways available to life are not endless but quite limited Convergent evolution occurs on all levels from tiny organic molecules to entire ecosystems of species McGhee demonstrates its ubiquity in animals both herbivore and carnivore in plants in ecosystems in molecules including DNA proteins and enzymes and even in minds describing problem solving behavior and group behavior as the products of convergence For each species example he provides an abbreviated list of the major nodes in its phylogenetic classification allowing the reader to see the evolutionary relationship of a group of species that have independently evolved a similar trait by convergent evolution McGhee analyzes the role of functional and developmental constraints in producing convergent evolution and considers the
