César Félix-Brasdefer, 2025-06-10 This book presents a pragmatic perspective on the development of intercultural communicative competence and intercultural understanding by language learners in the foreign language classroom and in study abroad contexts Using data from role play interactions intercultural episodes and student reflections including both US learners of Spanish and multilingual learners of other languages the book examines how a focus on pragmatics and metapragmatic awareness aids the development of intercultural competence It also addresses current topics such as intercultural impoliteness the negotiation of and reflection on speech acts at the discourse level pragmatic competence agency and pragmatic resistance The book concludes with a reflection on what it means to be an intercultural speaker along with suggestions for both teaching and assessment **Frontiers of Language and Teaching, Vol.2: Proceedings of the 2011 International Online Language Conference (IOLC 2011)** , Interpreting Communicative Language Teaching Sandra J. Savignon, 2008-10-01 The emergence of English as a global language along with technological innovations and the growing need for learner autonomy is changing language teaching rapidly and profoundly With these changes come new demands and challenges for teaching education programs This authoritative collection of writings highlights some of the best work being done today in the United States and abroad to make communicative competence an attainable goal The contributors examine what has come to be known as communicative language teaching or CLT from the perspectives of teachers and teacher educators The book documents current reform initiatives in Japan the United States Hong Kong Taiwan and continental Europe to provide a global perspective on language teaching for communicative competence Four major themes recur throughout the volume the multifaceted nature of language teaching the highly contextualized nature of CLT the futility of defining a native speaker in the postcolonial postmodern world and the overwhelming influence of high stakes tests on language teaching The book is a useful and valuable tool for language teachers teacher educators and policymakers *Speech Act Theory and Communication* Phyllis Kaburise, 2011-05-25 Speech Act Theory A Univen Study was undertaken to investigate the pragmatic value of the utterances of selected students at the University of Venda South Africa Utterances

of second language users of a language reflect the wealth of their language experiences and hence caution has to be exercised when conducting an investigation into such utterances. It is within this background that this investigation was conducted into the meaning creation strategies and abilities of the participants in this study. The very idiosyncratic utterances investigated demonstrated vividly the multi-dimensional thought process exploited by the creators of these samples. Also demonstrated by the analyses is the nature of communication and the amount of linguistic interaction necessary for interlocutors to create meaning.
