Competing For A Sustainable World Building Capacity For Sustainable Innovation:

Competing for a Sustainable World Sanjay Sharma, 2017-10-03 Sustainable innovation requires more than a clear vision and commitment. It requires effective execution and implementation based on an ongoing systematic process of engaging stakeholders to generate the evolving information critical for guiding decision making, developing and implementing business logic for sustainable innovation, overcoming decision making biases by managers, creating an opportunity framework to spark creativity and developing effective organizational capabilities to build a sustainable innovation DNA within the organization. Such a capacity provides an organization with the ability to anticipate and overcome internal and external barriers and achieve competitive advantage through sustainable innovation of products, services and business models. Based on original research, current state of the knowledge and relevant examples, this book comprehensively outlines and describes the process that managers can undertake to effectively and successfully implement a sustainability strategy that will help them attract and retain managerial talent, increase operating legitimacy and reduce compliance costs, boost stakeholder support, reduce costs through increased efficiency, quality, reliability, safety and responsiveness of existing operations, foster radical innovations in processes, products, services and new markets, and promote competitive imagination of future products, services and business models.

The Oxford Handbook of Management Ideas Andrew Sturdy, Stefan Heusinkveld, Trish Reay, David Strang, 2019-03-28 Management ideas and their associated applications have become a prevalent feature of our working lives. While their focus is familiar, such as efficiency, motivation and improvement, they range from specific notions such as activity based costing to broad movements like corporate social responsibility. This Handbook brings together some of the latest research from leading international scholars on how management ideas are produced, promoted and adapted, and their effects on business and working practices and society at large. Rather than focusing on specific management ideas, this volume explores their key socio-political contexts and channels of dissemination and is organized around four core overlapping themes. The first section sets out the research field in general in terms of both an

overall system and of different perspectives and research methods The second section explores the role of different actors and channels of diffusion including the consumers and producers of management ideas and new media as well as traditional players in the management ideas field such as consultancies and business schools The third section focuses on specific features or dynamics of the management ideas system such as their adoption evolution institutionalisation and resurgence while in the final section critical and new perspectives on management ideas are examined highlighting specific socio political contexts and the possibility of alternative ideas and forms of critique With a broad range of perspectives represented this Handbook provides a comprehensive authoritative and enduring resource for those studying management innovation and organizational change as well as for those working in the management ideas industry Handbook of Research on
