Japan's Holy War Walter Skya, 2009-04-03 Japan's Holy War reveals how a radical religious ideology drove the Japanese to imperial expansion and global war Bringing to light a wealth of new information Walter A Skya demonstrates that whatever other motives the Japanese had for waging war in Asia and the Pacific for many the war was the fulfillment of a religious mandate In the early twentieth century a fervent nationalism developed within State Shint This ultranationalism gained widespread military and public support and led to rampant terrorism between 1921 and 1936 three serving and two former prime ministers were assassinated Shint ultranationalist societies fomented a discourse calling for the abolition of parliamentary government and unlimited Japanese expansion Skya documents a transformation in the ideology of State Shint in the late nineteenth century and the early twentieth He shows that within the religion support for the German inspired theory of constitutional monarchy that had underpinned the Meiji Constitution gave way to a theory of absolute monarchy advocated by the constitutional scholar Hozumi Yatsuka in the late 1890s That in turn was superseded by a totalitarian ideology centered on the emperor an ideology advanced by the political theorists Uesugi Shinkichi and Kakehi Katsuhiko in the 1910s and 1920s Examining the connections between various forms of Shint nationalism and the state Skya demonstrates that where the Meiji oligarchs had constructed a quasi religious quasi secular state Hozumi Yatsuka desired a traditional theocratic state Uesugi Shinkichi and Kakehi Katsuhiko went further encouraging radical militant forms of extreme religious nationalism Skya suggests that the creeping democracy and secularization of Japan's political order in the early twentieth century were the principal causes of the terrorism of the 1930s which ultimately led to a holy war against Western civilization

The Discretionary Economy Marc Tool, 2018-10-08 The Discretionary Economy argues that we do in fact control our own political and economic destinies As a community we have discretion over policies that determine whether an economic process adequately provides for the necessities of life We also determine who participates in normative public judgments and whether decisions distinguish between what is and what ought to be Tool argues that we must continuously organize the institutional structures through which economic and political functions in the social process are

carried on We must exercise discretion by creating and modifying institutions that coordinate our behavior To exercise discretion effectively requires that we employ distinctively American economic political and philosophical theory In this volume the pivotal twentieth century contributors to this encompassing theory of political economy are Thorstein Veblen John Dewey Clarence Ayres and R Fagg Foster This volume presents in detail their analytical and philosophical perspective on social change A major purpose of this volume is to compare and contrast the American tradition with the traditions of capitalism Marxism and fascism demonstrating that the former can resolve compelling economic and political problems and the latter two cannot This book explains how to identify and analyze social economic and political problems confronted in all communities and how to go about framing and implementing structural adjustments in the political economy It will be of interest to students in non traditional courses in political economy including institutional economics contemporary social problems economics and social policy methodology and contemporary economic thought
