Community Orchards Handbook:

Community Orchards Angela King, Susan Clifford, 2008 Drawing on twenty years of championing orchards and the experiences of many people who have created Community Orchards The Handbook offers philosophy and practical advice to those inspired to become Community Orchardists Common Ground wants Britain to be a prominent fruit growing country once again for environmental aesthetic social cultural and economic reasons and believes that Community Orchards can help spearhead a revival At a time of unprecedented alienation from nature and knowledge about where our food comes from Community Orchards are reviving interest in fruit growing They provide a way to share knowledge and horticultural skills and stimulate us into growing our food again In the face of climate change the need to reduce food miles makes the provision of locally grown food ever more urgent

The Home Orchard Handbook Cem Akin, Leah Rottke, 2011-08 Start growing your own fruit trees wherever you are with The Home Orchard Handbook

The Community Food Forest Handbook Catherine Bukowski, John Munsell, 2018 Collaboration and leadership strategies for long term success Fueled by the popularity of permaculture and agroecology community food forests are capturing the imaginations of people in neighborhoods towns and cities across the United States Along with community gardens and farmers markets community food forests are an avenue toward creating access to nutritious food and promoting environmental sustainability where we live Interest in installing them in public spaces is on the rise People are the most vital component of community food forests but while we know more than ever about how to design food forests the ways in which to best organize and lead groups of people involved with these projects has received relatively little attention In The Community Food Forest Handbook Catherine Bukowski and John Munsell dive into the civic aspects of community food forests drawing on observations group meetings and interviews at over 20 projects across the country and their own experience creating and managing a food forest They combine the stories and strategies gathered during their research with concepts of community development and project management to outline steps for creating lasting public food forests that positively impact communities Rather than rehash food forest design which classic books such as Forest Gardening and Edible Forest Gardens address in great detail The Community Food Forest Handbook uses systems thinking and draws on social change theory to focus on how to work with diverse groups of people when conceiving of designing and implementing a community food forest To find practical ground the authors use management phases to highlight the ebb and flow of community capitals from a project s inception to its completion They also explore examples of positive feedbacks that are often unexpected but offer avenues for enhancing the success of a community food forest The Community Food Forest Handbook provides readers with helpful ideas for building and sustaining momentum working with diverse public and private stakeholders integrating assorted civic interests and visions within one project creating safe and attractive sites navigating community policies positively affecting public perception and managing site evolution and adaptation Its concepts and examples showcase the complexities of community

food forests highlighting the human resilience of those who learn and experience what is possible when they collaborate on a shared vision for their community

Orchards Claire Masset, 2012-07-20 Some of Britain's surviving orchards are almost six hundred years old and whether laden with summer fruit or stripped bare by the winter are places of great beauty. Throughout history they have played an important role in life both rural and urban providing not just food and drink but also a haven for wildlife and a setting for age-old customs and social gatherings. But when did orchards first appear? What is wassailing and who did it? Why has England lost almost two thirds of its orchards since 1950 and what is being done about it today? This beautifully illustrated book reveals the engaging story and rich diversity of Britain's apple, pear and cherry orchards.
