Iveta Silova, Daphne P. Hobson, 2014-05-01 Globalization has a profound effect on the mission and goals of education worldwide One of its most visible manifestations is the worldwide endorsement of the idea of education for global citizenship which has been enthusiastically supported by national governments politicians and policy makers across different nations Increasingly the educational institutions feel under pressure to respond to globalization forces by preparing students to engage competitively and successfully with this new realm lest their nations be left in the dust What is the role of international schools in implementing the idea of education for global citizenship How do these schools create a culturally unbiased global curriculum when the adopted models have been developed by Western societies and at the very least are replete with Western cultural values traditions and biases This collection of essays attempts to grapple with these complex issues while highlighting that culture and politics closely intertwine with schooling and curriculum as parents administrators teachers and students of different backgrounds and interests negotiate definitions of self and each other to construct knowledge in particular contexts The goal is to examine the complexity of factors that drive the global demand for education for global citizenship and de construct the contested nature of global citizenship by examining how the phenomenon is understood interpreted and modified in different cultural settings The authors provide not only a thick description of their cases but also a critical assessment of various attempts to initiate and implement educational reforms aimed at the development of globally minded citizens in various national settings

Education and Social Change Geoffrey Elliott, Chahid Fourali, Sally Issler, 2013-02-14 Education policy and practice has historically been developed within the national regional context However globalization has prompted educationalists to review their practice in the light of international influences World issues such as global warming conflict and the depletion of earth resources have also contributed to an increased awareness of the role that education can play in resolving these problems The contributors focus on how education can bring about social change while connecting with theory at the level of

cultural impact and policy implications They investigate the potential for creating a transnational value system in education focusing on some key human rights issues both at home and overseas Truly international in scope this text lays the groundwork for future research by exposing the commonalities and differences in approaches to knowledge production and its dissemination drawing together contributions from a variety of cross cultural contexts An Introduction to the Study of Education David Matheson,2014-01-14 What is education This core textbook will help students in pursuit of this question by providing a comprehensive gentle and reflective introduction to the initial study of education Updated in line with the latest policies reforms and issues within education this third edition includes full exploration of the historical sociological philosophical and psychological roots of education a focus on all levels of education pre school primary secondary post 16 and lifelong learning the latest controversies and debates within education new material on compulsory education special educational needs and post 16 developments clear insights into the role and background of research within education

Education and Disability in the Global South Nidhi Singal,Paul Lynch,Shruti Taneja Johansson,2018-12-13 Education and Disability in the Global South brings together new and established researchers from a variety of disciplines to explore the complexities and dilemmas encountered in providing education to children and young people with disabilities in countries in South Asia and Africa Applying a range of methodological theoretical and conceptual frameworks across different levels of education systems from pre school to higher education the contributors examine not just the barriers but also the opportunities within the educational systems in order to make strong policy recommendations Together the chapters offer a comprehensive overview of a range of issues including a nuanced appreciation of the tensions between the local and global in relation to key developments in the field critiquing a globalized notion of inclusive education as well as proposing new methodological advancements in taking the research agenda forward Empirical insights are captured not just from the perspectives of educators but also through engaging with children and young people with disabilities who are uniquely powerful in providing insights for future developments
