Management of Freshwater Biodiversity Julian Reynolds, Catherine Souty-Grosset, 2011-11-10 Integrating research into freshwater biodiversity and the role of keystone species this fascinating book presents freshwater crayfish as representatives of human exacerbated threats to biodiversity and conservation It uses examples from these and other large decapod invertebrates to explore how communities function and are controlled alongside the implications of human demands and conflicts over limited resources notably the severe impacts on biodiversity The discussion is structured around three key topics the present situation of crayfish in world freshwater ecosystems the applications of science to conservation management and knowledge transfer for successful crayfish management It outlines the historic exploitation of crayfish addressing the problems caused by invasive alien forms and explaining the importance of correct identification when dealing with conservation issues Offering a global perspective on freshwater systems the book ultimately highlights how the conservation of such large and long lived species will help protect ecosystem quality in the future

A Global Overview of the Conservation of Freshwater Decapod Crustaceans Tadashi Kawai, Neil Cumberlidge, 2016-10-26 This book introduces updated information on conservation issues providing an overview of what is needed to advance the global conservation of freshwater decapods such as freshwater crabs crayfish and shrimps Biodiversity loss in general is highest in organisms that depend on intact freshwater habitats because freshwater ecosystems worldwide are suffering intense threats from multiple sources Our understanding of the number and location of threatened species of decapods and of the nature of their extinction threats has improved greatly in recent years and has enabled the development of species conservation strategies This volume focuses on saving threatened species from extinction and emphasizes the importance of the successful implementation of conservation action plans through cooperation between scientists conservationists educators funding agencies policy makers and conservation agencies

Issues in Bioinvasion

Science Laura Capdevila-Arguelles, Bernardo Zilletti, 2005-12-05 Biological invasions are a global problem whose local impact can be of great magnitude The prevention and minimization of the impact of invasive alien species has become a priority because of their negative impact on biodiversity economy and public health Effective responses are needed cooperation and coordination among countries and or different sectors of society are a must To combine and share experiences on biological invasions at international regional and local level it is essential to develop compatible approaches to common problems With this aim the GEI Grupo Species Invasoras organised the First National Conference on Invasive Alien Species in Spain in 2003 Scientists coming from different parts of the Iberian Peninsula belonging to universities public administration NGOs and environmental enterprises and world renowned experts on biological invasions from other countries responded to this call for action and participated in the conference Issues in Bioinvasion Science contains key contributions of this conference The themes included cut across different aspects of non native species invasions This volume is essential reading for anyone seeking an understanding of non native species invasions Our aim to go beyond national boundaries in order to tackle these complex biological issues
