**Pro Application Lifecycle Management with Visual Studio 2012** Joachim Rossberg, Mathias Olausson, 2012-11-27  
You can have the best coders in the world working in your teams but if your project management isn't up to scratch your project is almost certain to be delayed to come in over budget and in some cases to fail entirely. By taking precise control of your application development process you can make changes both large and small throughout your project's life cycle that will lead to better quality finished products that are consistently delivered on time and within budget. Application lifecycle management (ALM) is an area of rapidly growing interest within the development community. Because its techniques allow you to deal with the process of developing applications across many areas of responsibility and across many different disciplines its effects on your project can be wide ranging and pronounced. It is a project management tool that has practical implications for the whole team from architects to designers from developers to testers. *Pro Application Lifecycle Management with Visual Studio 2012* focuses on the most powerful ALM tool available for the Microsoft .NET Framework: Visual Studio Team Foundation Server. It demonstrates the key concepts and techniques of ALM at first with a guide to the overall methodology and then delves into architecture and testing illustrating all of the concepts, tips and tricks using the tools TFS provides. The book serves as a complete guide to the ALM style with no fluff and many relevant code samples and examples. After reading the book you will understand how TFS can be used to generate continuous meaningful reporting on your project's health for the decision makers on your team as well as for your project's sponsors. *Beginning Build and Release Management with TFS 2017 and VSTS* Chaminda Chandrasekara, 2017-06-01 Master build and release management with Team Foundation Service and Visual Studio Team Services to facilitate the continuous delivery of software updates to your development team.
