Christianity In Evolution An Exploration:

Christianity in Evolution Jack Mahoney, 2011-08-01 Evolution has provided a new understanding of reality with revolutionary consequences for Christianity In an evolutionary perspective the incarnation involved God entering the evolving human species to help it imitate the trinitarian altruism in whose image it was created and counter its tendency to self absorption Primarily however the evolutionary achievement of Jesus was to confront and overcome death in an act of cosmic significance ushering humanity into the culminating stage of its evolutionary destiny the full sharing of God s inner life Previously such doctrines as original sin the fall sacrifice and atonement stemmed from viewing death as the penalty for sin and are shown not only to have serious difficulties in themselves but also to emerge from a Jewish culture preoccupied with sin and sacrifice that could not otherwise account for death The death of Jesus on the cross is now seen as saving humanity not from sin but from individual extinction and meaninglessness Death is now seen as a normal process that affect all living things and the religious doctrines connected with explaining it in humans are no longer required or justified Similar evolutionary implications are explored affecting other subjects of Christian belief including the Church the Eucharist priesthood and moral behavior

Theology, Science and Life Carmody Grey, 2023-01-26 Offering a bold intervention in the ongoing debate about the relationship between theology and science Theology Science and Life proposes that the strong demarcation between the two spheres is unsustainable theology occurs within and not outside what we call science and science occurs within and not outside theology The book applies this in a penetrating way to the most topical contentious and philosophically charged science of late modernity biology Rejecting the easy dualism of expressions such as theology and science theology or science modern biology is examined so as to illuminate the nature of both In making this argument the book achieves two further things It is the first major English language reception and application of the thought of philosopher Hans Jonas in theology and it makes a decisive contribution to the unfolding reception of Radical Orthodoxy one of the most influential schools in contemporary Anglophone theology

Creation Through Evolution Austriaco Op Nicanor Pier Giorgio, Nicanor Pier Giorgio Austriaco, 2024-11-29 Written and revised over the past three years *Creation through Evolution* contains ten new essays that directly respond to the most common philosophical and theological objections put forward by Catholics who are skeptical about evolutionary theory Significantly the authors use the conceptual framework of St Thomas Aquinas as a starting point to engage in the faith and science dialogue and they take the Catechism of the Catholic Church as their starting point The contributors believe that the solutions proposed by these essays to the disputed questions raised by skeptics are novel and robust The contents of the essays were presented at colloquia at the University of Oxford and Providence College and were revised in response to criticisms and comments raised by the other participants at these meetings The chapters were written to respond to Catholic skeptics of Darwinian evolution They are meant to be read not only by scholars but also by graduate and undergraduate students *Creation through Evolution* will be of interest to the

informed Catholic reader who is struggling to reconcile evolutionary theory with the claims of the Catechism of the Catholic Church

Reading Richard Dawkins Gary Keogh, 2014 Theological reactions to the rise of the new atheist movement have largely been critically hostile or defensively deployed apologetics to shore up the faith against attack Gary Keogh contends that focusing on scholarly material that is inherently agreeable to theology will not suffice in the context of modern academia Theology needs to test its boundaries and venture into dialogue with those with antithetical positions Engaging Richard Dawkins as the embodiment of such a position illustrates how such dialogue may offer new perspectives on classical theological problems such as the relationship of science and religion the existence of God creation natural suffering and theodicy Keogh demonstrates how a dialogical paradigm may take shape rather than merely discussing it as a theoretical framework A dialogue between such opposing hermeneutics may provide a new paradigm of theological scholarship one which is up to the task of facing its critics in the public and pluralistic context of modern academia

Understanding the Christianity-Evolution Relationship Michael Ruse, 2023-06-01 The relationship between science and religion is a topic that runs rife with misconceptions misunderstandings and debates Are science and religion always in conflict Is Darwin's theory of evolution through natural selection atheistic How does history shape current debates around science and religion This book explores these questions in a neutral and balanced way focusing on the Christianity evolution relationship It shows that two paradigms the world as an organism and the world as a machine have critically informed and guided the discussions The author uses his deep understanding of the history and philosophy of science particularly Darwinian evolutionary theory and its controversies through the past 150 years to bring fresh ideas to the debate and to wider discussions such as environmental issues and hate Understanding the Christianity Evolution Relationship provides a lively and informative analysis and lays out multiple views so that readers can make their own judgements to increase their understanding

Confluence of Evolutionary Science and Christian Faith Joseph Fortier, 2011-11-15 In this book I have attempted to chart a path for the reader toward understanding how rigorous empirical scientific thought and solid informed as well as inspired religious faith are in fact congruent with respect to evolution The instruments that are used in this book to chart this path include 1 the findings of scripture scholars regarding the Genesis creation narratives 2 the basic biology of evolution and genetics 3 the basics of the sciences of complexity 4 the philosophy and theology behind the positions people take with respect to evolution and religious faith 5 the thinking of Pierre Teilhard de Chardin on evolution and God and 6 the evolutionary theology of John Haught In the remote wilderness there are two clearwater streams that at close range apparently flow from different mountaintops but which when viewed from farther away can be seen to flow from two ridges of the same mountain Somewhere in the wilds the two streams join become confluent The purpose of this book is to find this confluence
