Communication Criticism Rhetoric Social Codes Cultural Studies:

Communication Criticism Malcolm Osgood Sillars, Bruce E. Gronbeck, 2001 This introduction to criticism teaches students critical skills whether examining television fiction nonfiction visual arts or oral and written discourse Three introductory chapters provide a foundation to explore nine approaches to critical study The perspectives presented bridge disciplinary boundaries and include asking questions about how audiences process communication understanding human symbol systems and social relations as vehicles for comprehending the world value and narrative analysis and psychoanalytic and ideological criticism The discussions of using each approach contain questions critics are most likely to ask assumptions governing the approach an exploration of sample analyses that reveal vocabulary most frequently used and a review of the problems encountered by critics

The Rhetorical Power of Popular Culture Deanna D. Sellnow, 2010 This introductory textbook unites the study of rhetoric with the persuasive potential of today's texts in popular culture By providing students with a means by which to understand why popular texts are important to study as well as how to examine these texts underlying messages from a variety of rhetorical perspectives Deanna Sellnow helps readers become critical consumers of the many popular culture texts that influence them in their daily lives Features Benefits This textbook unites rhetorical criticism with mediated popular cultural texts e.g. film television rap music in ways that relate directly to the experiences of people in society today Each chapter is devoted to one theoretical perspective e.g. narrative dramatic Marxist feminist illusion of life visual pleasure media effects Each chapter provides a an explanation of a particular rhetorical theory b examples of messages the theory reveals when applied to various contemporary popular culture texts c embedded applying what you've learned opportunities for students to practice examining a specific film television program song or advertisement using the theory d one or two scholarly articles that use the theory to examine a popular culture text e one or two sample student papers that use the theory to examine a popular culture text and f an end of chapter challenge posed to students to examine in depth a contemporary artifact using the concepts described in the chapter Each chapter opens with reflective questions to guide students to about specific examples as read the chapter

Literary Communication as Dialogue Roger D. Sell, 2020-11-15 As traced by Roger D. Sell literary communication is a process of community making As long as literary authors and those responding to them respect each other's human autonomy literature flourishes as an enjoyable though often challenging mode of interaction that is truly dialogical in spirit This gives rise to author respondent communities whose members represent existential commonalities blended together with historical differences These heterogeneous literary communities have a larger social significance in that they have long served as counterweights to the hegemonic tendencies of modernity and more recently to postmodernity's well intentioned but restrictive politics of identity In post postmodern times their ethos is increasingly one of pleasurable egalitarianism The despondent anti hedonism of the twentieth century intelligentsia can now seem rather dated Some of the papers selected for this volume develop Sell's ideas

in mainly theoretical terms But most of them offer detailed criticism of particular anglophone writers ranging from Shakespeare Ben Jonson and other poets and dramatists of the early modern period through Wordsworth and Coleridge to Dickens Pinter and Rushdie *The Rhetoric of Social Intervention* Susan K. Opt, Mark A. Gring, 2009 The first ever thorough exploration and discussion of the rhetorical model of social invention RSI initially conceived by rhetorical theorist William R Brown for today's students and scholars **Communicational Criticism** Roger D. Sell, 2011-08-17 Further developing the line of argument put forward in his *Literature as Communication* 2000 and *Mediating Criticism* 2001 Roger D Sell now suggests that when so called literary texts stand the test of time and appeal to a large and heterogeneous circle of admirers this is because they are genuinely dialogical in spirit Their writers rather than telling other people what to do or think or feel invite them to compare notes and about topics which take on different nuances as seen from different points of view So while such texts obviously reflect the taste and values of their widely various provenances they also channel a certain respect for the human other to whom they are addressed So much so that they win a reciprocal respect from members of their audience In Sell's new book this ethical interplay becomes the focus of a post postmodern critique which sees literary dialogicality as a possible catalyst to new non hegemonic kinds of globalization The argument is illustrated with major reassessments of Shakespeare Pope Wordsworth Dickens Churchill Orwell and Pinter and there are also studies of trauma literature for children and of ethically oriented criticism itself **The SAGE Encyclopedia of Communication Research Methods** Mike Allen, 2017-04-11 Communication research is evolving and changing in a world of online journals open access and new ways of obtaining data and conducting experiments via the Internet Although there are generic encyclopedias describing basic social science research methodologies in general until now there has been no comprehensive A to Z reference work exploring methods specific to communication and media studies Our entries authored by key figures in the field focus on special considerations when applied specifically to communication research accompanied by engaging examples from the literature of communication journalism and media studies Entries cover every step of the research process from the creative development of research topics and questions to literature reviews selection of best methods whether quantitative qualitative or mixed for analyzing research results and publishing research findings whether in traditional media or via new media outlets In addition to expected entries covering the basics of theories and methods traditionally used in communication research other entries discuss important trends influencing the future of that research including contemporary practical issues students will face in communication professions the influences of globalization on research use of new recording technologies in fieldwork and the challenges and opportunities related to studying online multi media environments Email texting cellphone video and blogging are shown not only as topics of research but also as means of collecting and analyzing data Still other entries delve into considerations of accountability copyright confidentiality data ownership and security privacy and other aspects of conducting an ethical research program Features 652 signed entries are contained in an

authoritative work spanning four volumes available in choice of electronic or print formats Although organized A to Z front matter includes a Reader s Guide grouping entries thematically to help students interested in a specific aspect of communication research to more easily locate directly related entries Back matter includes a Chronology of the development of the field of communication research a Resource Guide to classic books journals and associations a Glossary introducing the terminology of the field and a detailed Index Entries conclude with References Further Readings and Cross References to related entries to guide students further in their research journeys The Index Reader s Guide themes and Cross References combine to provide robust search and browse in the e version The Ethics of Listening Elizabeth S. Parks,2018-11-16

There are ways of being in the world that create a flourishing life and other ways that restrict that life both for ourselves and others Listening is one of these ways of being Listening gives shape to speaking inviting other people into a dialogue that impacts our everyday lives Our acts of listening like all communication are shaped by our cultural and individual differences Unfortunately as people consider ways to ethically listen they often abide by a set of conversational rules that do not reflect or benefit their own or others unique contexts and communities In this book Parks responds to gaps in scholarship related to listening in communication research and difference in ethics scholarship Rather than imposing a rigid ethical norm that is unresponsive to diverse cultural practices her proposed listening ethic is one that is highly contextualized and pluralistic and yet dares to make normative claims Using discourse research methods that are both qualitative and quantitative Parks goes beyond describing what listening is in a given context to what ethical listening should be Empirical findings about listening from multiple communities that represent diverse ethnic gender and disability orientations are interwoven with insights from communication ethics to develop the first ever dialogic ethics of listening that is empirically based culturally grounded and normative Ten shared values emerge as guidelines for good listening in this ethic be open cultivate understanding practice authenticity engage in critical thinking invest in relationship care for the dialogue focus on what matters be intentionally present remember the ongoing story and be responsive to need These values while shared across cultures may be expressed in a diverse and sometimes conflicting communicative practices Ultimately Parks proposes that ethical listening is best conceptualized as pursuit of sustainable hospitality in our dialogic interactions within and across difference By understanding the ways that different people share listening values yet practice them differently we can learn to trust each other and attest to the hope that ethical dialogue is possible **Methods of Historical Analysis in Electronic Media**

Donald G. Godfrey,2006-08-15 **Methods of Historical Analysis in Electronic Media** provides a foundation for historical research in electronic media by addressing the literature and the methods traditional and the eclectic methods of scholarship as applied to electronic media It is about history broadcast electronic media history and history that has been broadcast and also about the historiography research written and the research yet to be written Divided into five parts this book addresses the challenges in the application of the historical methods to broadcast history reviews the various methods appropriate for

electronic media research based on the nature of the object under study suggests new approaches to popular historical topics takes a broad topical look at history in broadcasting and provides a broad overview of what has been accomplished a historian s challenges and future research Intended for students and researchers in broadcast history *Methods of Historical Analysis in Electronic Media* provides an understanding of the qualitative methodological tools necessary for the study of electronic media history and illustrates how to find primary sources for electronic media research *Television and the Self* Kathleen M. Ryan, Deborah A. Macey, 2013-04-05 Sitting prominently at the hearth of our homes television serves as a voice of our modern time Given our media saturated society and television s prominent voice and place in the home it is likely we learn about our society and selves through these stories These narratives are not simply entertainment but powerful socializing agents that shape and reflect the world and our role in it *Television and the Self Knowledge Identity and Media Representation* brings together a diverse group of scholars to investigate the role television plays in shaping our understanding of self and family This edited collection s rich and diverse research demonstrates how television plays an important role in negotiating self and goes far beyond the treacly very special episodes found in family sit coms in the 1980s Instead the authors show how television reflects our reality and helps us to sort out what it means to be a twenty first century man or woman **Dissent, Discourse, and Democracy** Joshua Guitar, 2021-10-01 Government whistleblowers contest authoritarian power Yet critical scholars have only minimally examined whistleblower discourses and hesitate to substantively interrogate the ideology of statism In *Dissent Discourse and Democracy Whistleblowers as Sites of Political Contestation* the author addresses this exigency and critiques government whistleblowing discourses through an Anarchist lens reifying a pattern of discursive statist behaviors Upon exposing government malfeasance whistleblowers and their corresponding symbolic designations endure an erasure of agency via abstraction Joshua Guitar conceptualizes the totality of abstraction identifying it both as a rhetorical manifestation of ideology and a method of critical rhetorical inquiry The author reveals how whistleblowing a quintessential tool of dissent within democracy has been systematically constrained within the public forum and weaponized for statist interests Scholars of political communication and rhetoric will find this book particularly interesting
