Competition Case Law Digest - a Synthesis of EU and National Leading Cases 5th Edition Nicolas Charbit, 2022-01-05

Competition Case Law Digest Nicolas Charbit, 2017-09-07 This 3rd edition of the Competition Law Digest provides a synthesis of EU and national leading antitrust cases from 1990 to 2016. The book is structured in two parts: Part I deals with competition rules in general (cartels, unilateral practices, mergers), whereas Part II is dedicated to specific sectors (automobile, energy, insurance, sports). The Digest is to date the sole publication which allows lawyers, economists, in-house counsels, academics, and government officials to draw comparisons between competition case law and policies in the EU and in the Member States and in some instances US antitrust law. This is an essential guide to learn about the most recent competition law trends.

Competition Case Law Digest 5th Edition Frédéric Jenny, Nicolas Charbit, 2022-03-30 2013

Competition Case Law Digest a Synthesis of EU and National Leading Case Nicolas Charbit, Elisa Ramundo, 2012-12-01 This EU Digest 2013 is a selection of 51 essays on European competition case laws from the 27 European Union member States and neighboring States. Each essay consists in a synthesis of the leading cases from 2012 and beyond. These essays are organized in two parts: Part I deals with Competition Provisions (Cartels, Dominance, Merger, State aid), whereas Part II deals with Business Sectors (Automobile, Broadcasting, Healthcare, IT, Telecommunications, Sports). The purpose of this Digest is to provide a snapshot of the areas of convergence and remaining diversity of competition law in Europe. As noted by Frédéric Jenny in his Foreword below, while this book is not based on a comprehensive study of all national case laws, no such study is needed to identify the main trends in this area. This EU Digest highlights both convergence and divergence in various areas and sectors of European competition law, making it easy for both practitioners and academics to draw comparison between jurisdictions in various areas and sectors of European competition law.

Remedies in EU Competition Law Damien Gerard, Assimakis Komninos, 2020-07-10 By their nature, remedies are central to competition law enforcement and represent the yardstick against which the efficiency of the overall system can be measured. Yet very rarely have remedies been treated in a horizontal and comprehensive manner from the combined perspectives of substance, process, and policy. The present volume, developed in partnership with the College of Europe's Global Competition Law Centre (GCLC), provides coherent practical and authoritative commentaries by leading experts from the GCLC's incomparable network. The contributions, originally presented at the 2019 GCLC annual conference, examine remedies to assess the overall effectiveness of competition law enforcement in merger, antitrust, and State aid matters. The overall topic is presented under five headings: objectives and limitations of remedies; types of remedies in competition law enforcement; implementation and process; ex post assessment of remedies and policy lessons; and national and international approaches. The high-profile and wide-ranging group of authors includes the Director General of the European Commission's competition department, lawyers from major international firms, and well-known economists and academics specialising in competition law. With a sharp focus on how to make competition

rules work well in today's digital environment this systematic and coherent analysis illuminates an issue that we need to fully grasp and understand in order to make sense of competition policy law and enforcement in the years and decades to come

Exclusionary Practices Chiara Fumagalli, Massimo Motta, Claudio Calcagno, 2018-01-11 The most controversial area in competition policy is that of exclusionary practices where actions are taken by dominant firms to deter competitors from challenging their market positions Economists have been struggling to explain such conduct and to guide policy makers in designing sensible enforcement rules In this book authors Chiara Fumagalli Massimo Motta and Claudio Calcagno explore predatory pricing rebates exclusive dealing tying and vertical foreclosure through a blend of theory and practice They develop a general framework which builds on and extends existing economic theories drawing upon case law discussions of cases and other practical considerations to identify workable criteria that can guide competition authorities to assess exclusionary practices Along with analyses of policy implications and insights applied to case studies the book provides practitioners with non technical discussions of the issues at hand while guiding economics students with dedicated technical sections with rigorous formal models
