Community Architecture Routledge Revivals How People Are Creating Their Own Environment:

Community Architecture (Routledge Revivals) Nick Wates, Charles Knevitt, 2013-09-05 First published in 1987 this title was one of the first to explore the emerging popular movement of Community Architecture championed by Prince Charles which gained momentum throughout Britain in the 1970s and 1980s The conceptual framework rests fundamentally on the principle that the built environment is most effective when those who live in a particular area are actively engaged with its creation and daily administration A work that has influenced policy makers and planning legislation Community Architecture remains one of the key reference works for student architects and planners *Community Architecture (Routledge Revivals)*

Nick Wates, Charles Knevitt, 2013-09-05 First published in 1987 this title was one of the first to explore the emerging popular movement of Community Architecture championed by Prince Charles which gained momentum throughout Britain in the 1970s and 1980s The conceptual framework rests fundamentally on the principle that the built environment is most effective when those who live in a particular area are actively engaged with its creation and daily administration A work that has influenced policy makers and planning legislation Community Architecture remains one of the key reference works for student architects and planners **Applying Leadership and Management in Planning** Janice Morphet, 2015-05-06

Planning is central to economic social and environmental life but its practice is frequently criticised by all who engage in it Seen as too restrictive by those who promote development and too weak by those opposing it planners who advise on proposals cannot sit on the fence Is it the planning system that is problematic or is it the planners who work within it This valuable book examines these issues at the continuing professional development level and discusses the ways in which management theories tools and techniques can be applied to planning practice and used by all who engage in it Written by an experienced author and widely respected academic the book includes case studies and question and answer sections and will be valuable through both initial and continuous professional education helping candidates prepare for examinations and subsequent management Doing Disability Differently Jos Boys, 2014-05-23 This ground breaking book aims to take a new

and innovative view on how disability and architecture might be connected Rather than putting disability at the end of the design process centred mainly on compliance it sees disability and ability as creative starting points for the whole design process It asks the intriguing question can working from disability actually generate an alternative kind of architectural avant garde To do this Doing Disability Differently explores how thinking about disability opens up to critical and creative investigation our everyday social attitudes and practices about people objects and space argues that design can help resist and transform underlying and unnoticed inequalities introduces architects to the emerging and important field of disability studies and considers what different kinds of design thinking and doing this can enable asks how designing for everyday life in all its diversity can be better embedded within contemporary architecture as a discipline offers examples of what doing disability differently can mean for architectural theory education and professional practice aims to embed into architectural

practice attitudes and approaches that creatively and constructively refuse to perpetuate body norms or the resulting inequalities in access to and support from built space Ultimately this book suggests that re addressing architecture and disability involves nothing less than re thinking how to design for the everyday occupation of space more generally **The Good, the Bad and the Ugly (Routledge Revivals)** Rod Hackney,2014-06-05 First published in 1990 this title presents the personal reflections of renowned community architect Rod Hackney who served for many years as President of both the Royal Institute of British Architects and the International Union of Architects Educated in the Modernist tradition of architecture in Britain and Denmark Hackney s return to England in the 1970s changed his outlook completely Cities like Birmingham and Sheffield had been ruined by ill conceived planning whole communities had been torn apart by massive destruction of Victorian terraces and relocated to grim tower block estates To those communities that he has rescued from the threat of redevelopment Rod Hackney is a local hero Determined to save Britain s inner cities he has been a major influence on Prince Charles and a powerful spokesman for the silent majority of the urban poor who often have no say as to where and how they live **Housing Fit For Purpose** Fionn Stevenson,2019-10-22 Housing Fit for Purpose sets out a research focused approach to looking at the challenges facing the built environment in approaching the design construction and management of housing This book uses original research by the author on housing performance evaluation and distils it for built environment professionals arguing that learning from feedback should be taking place at every stage of the housing project lifecycle improving outcomes for end users Drawing on active research this book shows why and how the design construction and management of housing can be linked to feedback and actual evidence of how people choose and learn to use their homes It examines the key concepts which underlie participatory design occupancy feedback and learning and includes a practical primer on how to undertake housing occupancy feedback **The Government of Space (Routledge Revivals)** Alison Ravetz,2013-09-13 Britain s planning system began as town and country planning to repair the ravages of unplanned industrialism and promote ideal environments for the future Steering a course between left and right public control and for profit development it survived successive booms and busts broadening to include new concerns like ecology conservation and community participation By the 1986 when this book was first published the system s survival beyond the year 2000 was in doubt It did endure but it is now under serious threat from the right which sees it as obstructing enterprise and the restoration of growth It has been stripped of some of its core aims and mechanisms while as yet there is no agenda distinguishing growth that will be sustainable from growth which self evidently is not The Government of Space was written as a concise guide for the non specialist to the origins and evolution of British planning its intellectual pedigree achievements and cruxes It is an invaluable background to the state of planning and the cases for and against it today **Professional Practice in Facility Programming (Routledge Revivals)** Wolfgang Preiser,2015-06-11 This compelling resource which was first published in 1993 was the first book on facility programming to design parameters and specifications over a broad

range of project types The book's practical how to approach is exceedingly beneficial to professionals and students involved with a wide variety of building types from corporate facilities to parks day care centres health centres and correctional facilities It also covers the fine points of working with clients The contributors provide real world case studies endowing the reader with the tools necessary to reap a deeper understanding and a more critical assessment of the major programming approaches today Professional Practice in Facility Programming is a uniquely current self contained resource that will prove invaluable to a wide cross section of practitioners and students

Design Intervention (Routledge Revivals) Wolfgang F. E. Preiser, Jacqueline Vischer, Edward White, 2015-05-15 Design Intervention Toward a More Humane Architecture first published in 1991 intends to demonstrate that interest in social issues is alive and well in architecture that there is a small but effective cadre of dedicated professionals who continue to commit themselves to solving social problems and that architecture is being applied to the alleviation of the social ills of our time The editors and contributors in this book have all grappled with their own definitions of design innovation and express in practical and useful ways their ideas for contributing to a better and less needy world through the architecture they describe This book will be of interest to students of architecture

Architecture of Schools: The New Learning Environments Mark Dudek, 2012-09-10 This is the standard design guide on schools architecture providing vital information on school architecture Mark Dudek views school building design as a particularly specialised field encompassing ever changing educational theories the subtle spatial and psychological requirements of growing children and practical issues that are unique to these types of building He explores the functional requirements of individual spaces such as classrooms and shows how their incorporation within a single institution area are a defining characteristic of the effective educational environment Acoustics impact damage the functional differentiation of spaces such as classrooms music rooms craft activities and gymnasium within a single institution are all dealt with More esoteric factors such as the effects on behaviour of colour light surface texture and imagery are considered in addition to the more practical aspects of designing for comfort and health Chapter 4 comprises 20 case studies which address those issues important in the creation of modern school settings They are state of the art examples from all parts of the world These examples include Pokstown Down Primary Bournemouth Haute Vallee School Jersey Heinz Galinski School Berlin Anne Frank School Papendract Netherlands Seabird Island School British Columbia and The Little Village Academy Chicago
