Company Law and Capitalism

Second Edition

Tom Hadden

This book approaches company law from a radically new angle by dealing separately with three main types of company: the small incorporated business, the larger unquoted 'family company' and the large modern corporation. The standard material is incorporated into this framework in a way which makes the result and the proposals for reform which are included wholly convincing. The book also brings into the open the political and economic assumptions about the nature of the capitalist system which are embedded in traditional company law, and shows clearly how they have been overtaken by commercial and economic developments. This new edition has been thoroughly revised and brought up to date. In particular it contains a detailed analysis of the experience of industrial democracy in Europe and of the current proposals in Britain, including the Bullock Report.

'... a highly topical book which should be regarded as essential reading for the serious student, ...'
MODERN LAW REVIEW

Tom Hadden is a Part-time Lecturer in Law at the Queen's University of Belfast. He is the author of *The Control of Company Fraud* and co-author of *Law and State: the case of Northern Ireland*.

Behind the Law in Context series is a desire to broaden the study of law by proceeding beyond the exposition of legal doctrine to consider critically the law-in-action in its social and economic context. A contextual approach involves treating legal subjects from a broader base than has been normal in the past, using material from other social sciences, from business studies and from any other discipline that helps to explain the operation *in practice* of the subject under discussion. This orientation is both more stimulating and more realistic than the bare exposition of legal rules.
