Competing For A Sustainable World Building Capacity For Sustainable Innovation:

Competing for a Sustainable World Sanjay Sharma, 2017-10-03 Sustainable innovation requires more than a clear vision and commitment. Rather than focusing on specific management ideas, this volume explores their key socio-political contexts and channels of dissemination and is organized around four core overlapping themes. The first section sets out the research field in general in terms of both an

overall system and of different perspectives and research methods The second section explores the role of different actors and channels of diffusion including the consumers and producers of management ideas and new media as well as traditional players in the management ideas field such as consultancies and business schools The third section focuses on specific features or dynamics of the management ideas system such as their adoption evolution institutionalisation and resurgence while in the final section critical and new perspectives on management ideas are examined highlighting specific socio political contexts and the possibility of alternative ideas and forms of critique With a broad range of perspectives represented this Handbook provides a comprehensive authoritative and enduring resource for those studying management innovation and organizational change as well as for those working in the management ideas industry Handbook of Research on
