Compiler Technology Derek Beng Kee Kiong, 2012-12-06 Compiler technology is fundamental to computer science since it provides the means to implement many other tools It is interesting that in fact many tools have a compiler framework they accept input in a particular format perform some processing and present output in another format Such tools support the abstraction process and are crucial to productive systems development The focus of Compiler Technology Tools Translators and Language Implementation is to enable quick development of analysis tools Both lexical scanner and parser generator tools are provided as supplements to this book since a hands on approach to experimentation with a toy implementation aids in understanding abstract topics such as parse trees and parse conflicts Furthermore it is through hands on exercises that one discovers the particular intricacies of language implementation Compiler Technology Tools Translators and Language Implementation is suitable as a textbook for an undergraduate or graduate level course on compiler technology and as a reference for researchers and practitioners interested in compilers and language implementation

Parallel Language and Compiler Research in Japan Lubomir Bic, Alexandru Nicolau, Mitsuhiro Sato, 1995-08-31 Parallel Language and Compiler Research in Japan offers the international community an opportunity to learn in depth about key Japanese research efforts in the particular software domains of parallel programming and parallelizing compilers These are important topics that strongly bear on the effectiveness and affordability of high performance computing systems The chapters of this book convey a comprehensive and current depiction of leading edge research efforts in Japan that focus on parallel software design development and optimization that could be obtained only through direct and personal interaction with the researchers themselves

High Performance Computing for Computational Science - VECPAR 2002 José M.L.M. Palma, Jack Dongarra, Vicente Hernández, A. Augusto Sousa, Marina Waldén, 2003-08-03 The 5th edition of the VECPAR series of conferences marked a change of the conference title The full conference title now reads VECPAR 2002 5th International Conference on High Performance Computing for Computational Science This reflects more accurately what has been the main emphasis of the conference since its early days in 1993 the use of computers for solving problems in science and engineering The present postconference book includes the best papers and invited talks presented during the three days of the conference held at the Faculty of Engineering of the University of Porto Portugal June 26-28 2002 The book is organized into 8 chapters which as a whole appeal to a wide research community from those involved in the engineering applications to those interested in the actual details of the hardware or software implementation in line with what in these days tends to be considered as Computational Science and Engineering CSE The book comprises a total of 49 papers with a prominent position reserved for the four invited talks and the two first prizes of the best student paper competition

Software Architecture Richard N. Taylor, Nenad Medvidovic, Eric Dashofy, 2009-01-09 Software architecture is foundational to the development of large practical software

intensive applications This brand new text covers all facets of software architecture and how it serves as the intellectual centerpiece of software development and evolution Critically this text focuses on supporting creation of real implemented systems Hence the text details not only modeling techniques but design implementation deployment and system adaptation as well as a host of other topics putting the elements in context and comparing and contrasting them with one another Rather than focusing on one method notation tool or process this new text reference widely surveys software architecture techniques enabling the instructor and practitioner to choose the right tool for the job at hand Software Architecture is intended for upper division undergraduate and graduate courses in software architecture software design component based software engineering and distributed systems the text may also be used in introductory as well as advanced software engineering courses
