Novel Perspectives on German-Language Comics Studies Lynn M. Kutch, 2016-06-15 Novel Perspectives on German Language Comics Studies History Pedagogy Theory gathers an international team of contributors from two continents whose innovative scholarship demonstrates a regard for comics and graphic novels as works of art in their own right The contributions serve as models for further research that will continue to define the relationship between comics and other traditional high art forms such as literature and the visual arts Novel Perspectives on German Language Comics Studies is the first English language anthology that focuses exclusively on the graphic texts of German speaking countries In its breadth this book functions as an important resource in a limited pool of critical works on German language comics and graphic novels The individual chapters differ significantly from one another in methodology subject matter and style Taken together however they present a cross section of comics and graphic novel scholarship being performed in North America and Europe today Moreover they help to secure a place for these works in a globalized culture of comics This volume s contributors have helped create a new critical language within which this rapidly expanding medium can be read and interpreted

Blending Spaces Arnd Witte, 2014-10-09 This book comprehensively analyzes the development of interculturally blended third spaces by the second language learner beginning with the linguistic and sociocultural imprints of the first language and culture on the mind and culminating in the proposal of a phase model of the development of intercultural competence The foundational analysis of L1 mediated constructs is followed by an analysis of forms interaction concepts of identity and constructs of culture interculture thus shifting the object of analysis from the subjective to the intersubjective levels of construction and interaction The focus of the book is on the gradual development of interculturally blended third spaces in the mind of the learner as genuinely new bases for construction This book takes an interdisciplinary approach drawing on research in cultural psychology linguistic anthropology critical theory language acquisition and second language learning and shows how culture and interculture need to be emphasized as an integral part of second language learning
