Coherence And Cohesion In Written And Spoken Discourse:

Coherence and Cohesion in Spoken and Written Discourse Olga Dontcheva-Navratilova, Renata Povolná, 2020-07-13

Coherence and Cohesion in Spoken and Written Discourse provides new insights into the various ways coherence works in a wide spread of spoken and written text types and interactional situations all of which point to the dynamics and subjectivity of its nature. Despite the variety of approaches the authors adopt they share an understanding of language as a dynamic and heterogeneous system mediating interaction in social and cultural contexts and explain how coherence and cohesion are reflected in different contextually bound aspects of human communication. The chapters of the book comprise essays by linguists working in the fields of pragmatics, discourse analysis and stylistics which explore features contributing to the perception of cohesion and coherence in spoken and written varieties of English, namely impromptu academic and political discourse within the former variety and media academic and fictional discourse within the latter. This volume which combines theoretical insights with practical analyses of different varieties of spoken and written English discourse will be of interest to a wide range of researchers, scholars and students of English.

Coherence in Spoken and Written Discourse Wolfram Bublitz, Uta Lenk, Eija Ventola, 1999. Until very recently coherence, unlike cohesion, was widely held to be a rather mystical notion. However, taking account of new trends representing a considerable shift in orientation, this volume aims at helping relieve coherence of its mystifying aura. The general bibliography which concludes the book bears witness to this intriguing development and the rapidly changing scene in coherence research. Preceding this comprehensive up-to-date Bibliography on Coherence are 13 selected papers from the 1997 International Workshop on Coherence at the University of Augsburg, Germany. They share a number of theoretical and methodological assumptions and reflect a trend in text and discourse analysis to move away from reducing coherence to a product of formally represented cohesion and/or semantically established connectivity. Instead, they start from a user and context-oriented interpretive understanding and rely on authentic data throughout in relating micro-linguistic to macro-linguistic issues. The first group of papers looks at the re-creation of coherence in inter alia reported speech, casual conversation, argumentative writing, news reports and conference contributions. The second group describes the negotiation of coherence in oral examinations, text summaries and other situations that require special efforts on the part of the recipient to overcome misunderstandings and other disturbances. The third group discusses theoretical approaches to the description of coherence.
