Model Driven Engineering Languages and Systems

Dorina C. Petriu, Nicolas Rouquette, Oystein Haugen, 2010-09-22 The MODELS series of conferences is the premier venue for the exchange of novative technical ideas and experiences focusing on a very important new te nical discipline model driven software and systems engineering The expansion of this discipline is a direct consequence of the increasing signi cance and success of model based methods in practice Numerous e orts resulted in the invention of concepts languages and tools for the de nition analysis transformation and veri cation of domain speci c modeling languages and general purpose modeling language standards as well as their use for software and systems engineering MODELS 2010 the 13th edition of the conference series took place in Oslo Norway October 3-8 2010 along with numerous satellite workshops symposia and tutorials The conference was fortunate to have three prominent keynote speakers Ole Lehrmann Madsen Aarhus University Denmark Edward A Lee UC Berkeley USA and Pamela Zave AT T Laboratories USA To provide a broader forum for reporting on scienti c progress as well as on experience stemming from practical applications of model based methods the 2010 conference accepted submissions in two distinct tracks Foundations and Applications The primary objective of the rst track is to present new research results dedicated to advancing the state of the art of the discipline whereas the second aims to provide a realistic and veri able picture of the current state the practice of model based engineering so that the broader community could be better informed of the capabilities and successes of this relatively young discipline This volume contains the nal version of the papers accepted for presentation at the conference from both tracks

The Oil & Gas Year Trinidad and Tobago 2019

The Energy Year, 2019-07-22 TOGY is pleased to present The Oil Gas Year Trinidad and Tobago 2019 published in partnership with the Ministry of Energy and Energy Industries and the Energy Chamber of Trinidad and Tobago The Oil Gas Year Trinidad and Tobago 2019 analyses this changing landscape and the approaches the country can take to maintain its competitive edge in the mid to long term including the development of NiQuan Energy's GTL plant and the establishment of the island nation as a logistics and training hub for Guyana's burgeoning oil and gas industry This fifth edition covers efforts to resolve continued gas curtailments via cross border deals and negotiations with Grenada Venezuela and Guyana as well as through renegotiated contracts between producers and the National Gas Company of Trinidad and Tobago and new gas production from super major BP and local player DeNovo Energy The book also showcases the expansion of the main ports at Point Lisas and Galeota NOC Petrotrin's challenges and subsequent restructuring and the domestic EPC landscape With gas coming on line from the startup of new developments throughout 2018 gas production has begun to rise steadily back up to previous levels More gas is expected to come from offshore areas such as acreage currently being explored by BHP Group Trinidad and Tobago is awaiting the March 2019 start of commercial production at Caribbean Gas Chemical's complex which

will increase the country's competitiveness against other methanol producers in the Western Hemisphere. However, slowed gas production and feedstock supplies could potentially see the island nation pushed out of its position as the world's top methanol producer. The Caribbean energy landscape is also shifting with countries such as Grenada, the Bahamas, Jamaica, and most notably Guyana delving deeper into their own oil and gas activities, looking to offset production gaps resulting from the current instability of regional heavyweight Venezuela. Extensive in-depth analysis is supported by comprehensive maps, illustrations, and graphs to create a market guide essential for players seeking to either expand their operations in or enter the Trinidadian market.
