Conservation In Africa Conservation In Africa:

Conservation in Africa David Anderson, Richard H. Grove, 1987 This book provides a new inter disciplinary look at the practice and policies of conservation in Africa Bringing together social scientists anthropologists and historians with biologists for the first time the book sheds some light on the previously neglected but critically important social aspects of conservation thinking To date conservation has been very much the domain of the biologist but the current ecological crisis in Africa and the failure of orthodox conservation policies demand a radical new appraisal of conventional practices This new approach to conservation the book argues cannot deal simply with the survival of species and habitats for the future of African wildlife is intimately tied to the future of African rural communities Conservation must form an integral part of future policies for human development The book emphasises this urgent need for a complementary rather than a competitive approach It covers a wide range of topics important to this new approach from wildlife management to soil conservation and from the Cape in the nineteenth century to Ethiopia in the 1980s It is essential reading for all those concerned about people and conservation in Africa

The Myth of Wild Africa Jonathan S. Adams, Thomas O. McShane, 1996 Africa s wildlife heritage is under siege and its worst enemy may be traditional conservation methods The authors tell of new conservation programs that include more Africans in the planning execution and financial benefits of this multi billion dollar business

Wildlife Conservation in Africa S.S. Ajayi, 2019-05-29 Wildlife Conservation in Africa A Scientific Approach presents comprehensive management strategies for the consumptive and non consumptive utilization of wildlife across Sub Saharan Africa It describes African economies that are currently dependent on wildlife resources and prescribes strategies for conserving biodiversity in both forests and animals in ecosystems across the continent The book covers the history and current status of how Africa s culture traditions healthcare and food sources are woven intricately around the local wildlife and resources It is a necessary resource for researchers and practitioners in wildlife and ecological conservation but is also useful for administrators and managers of protected areas

Voices from Africa Dale M. Lewis, Nick Carter, 1993

The Violence of Conservation in Africa Ramutsindela,

Maano, Matose, Frank, Mushonga, Tafadzwa, 2022-01-11 Offering insights on violence in conservation this timely book demonstrates how and why the state in Africa pursues conservation objectives to the detriment of its citizens It focuses on how the dehumanization of black people and indigenous groups the insertion of global green agendas onto the continent a lack of resource sovereignty and neoliberal conservation account for why violence is a permanent feature of conservation in Africa

Transfrontier Conservation in Africa Maano Ramutsindela, 2007 Transfrontier conservation is a global concept which encompasses the protection of biodiversity spanning the borders of two or more countries in ways that support local economic development international relations and peace Nowhere is this more relevant but highly debatable than in Africa which is home to a third of the world s terrestrial biodiversity while at the same time hosting its poorest nations This is one of

the first books to account for the emergence of transfrontier conservation in Africa against international experiences in bioregional planning The roles of the state and local populations are analysed as well as the ecological socio economic and political implications

Conservation Biology in Sub-Saharan Africa Richard Primack,Johnny W. Wilson,2019-09-10 Conservation Biology in Sub Saharan Africa comprehensively explores the challenges and potential solutions to key conservation issues in Sub Saharan Africa Easy to read this lucid and accessible textbook includes fifteen chapters that cover a full range of conservation topics including threats to biodiversity environmental laws and protected areas management as well as related topics such as sustainability poverty and human wildlife conflict This rich resource also includes a background discussion of what conservation biology is a wide range of theoretical approaches to the subject and concrete examples of conservation practice in specific African contexts Strategies are outlined to protect biodiversity whilst promoting economic development in the region Boxes covering specific themes written by scientists who live and work throughout the region are included in each chapter together with recommended readings and suggested discussion topics Each chapter also includes an extensive bibliography Conservation Biology in Sub Saharan Africa provides the most up to date study in the field It is an essential resource available on line without charge for undergraduate and graduate students as well as a handy guide for professionals working to stop the rapid loss of biodiversity in Sub Saharan Africa and elsewhere

Conservation Agriculture in Africa Saidi Mkomwa,Amir H. Kassam,2022-01-11 Tillage agriculture has led to widespread soil and ecosystem degradation globally and more particularly in the developing regions This is especially so in Africa where traditional agricultural practices have become unsustainable due to severe exploitation of natural resources with negative impacts on the environment and food system In addition agricultural land use in Africa today faces major challenges including increased costs climate change and a need to transform to more sustainable production intensification systems Conservation Agriculture has emerged as a major alternative sustainable climate smart agriculture approach in Africa and has spread to many African countries in the past decade as more development and research including in sustainable mechanization has enabled its extension and uptake It is key to transforming Africa s agriculture and food system given its ability to restore soil health biodiversity and productivity of millions of smallholder farms as well as larger scale farms This book is aimed at all agricultural stakeholders in the public private and civil sectors in Africa engaged in supporting the transformation of conventional tillage agriculture to Conservation Agriculture The book will be of interest to researchers academics students development stakeholders public and private sector investors and policy makers as well as institutional libraries across the world

Protected Areas and Tourism in Southern Africa Lesego Senyana Stone,Moren Tibabo Stone,Patricia Kefilwe Mogomotsi,Goemeone E.J. Mogomotsi,2022-03-23 This volume discusses the complex relationship between Protected Areas and tourism and their impact on community livelihoods in a range of countries in Southern Africa Protected areas and tourism have an enduring and symbiotic relationship While protected areas offer a desirable setting for tourism products

tourism provides revenue that can contribute to conservation efforts This can bring benefits to local communities but it can also have a negative impact with the establishment of protected areas leading to the eviction of local communities from their original places of residence while also preventing them from accessing the natural resources they once enjoyed Taking a multi disciplinary approach this book addresses the opportunities and challenges faced by communities and other stakeholders as they endeavour to achieve their conservation goals and work towards improving community livelihoods Case studies from Botswana Malawi Namibia South Africa Tanzania Zambia and Zimbabwe address key issues such as human wildlife conflicts ecotourism wildlife based tourism landscape governance wildlife crop raiding and trophy hunting including the high profile case of Cecil the lion Chapters highlight both the achievements and positive outcomes of protected areas but also the challenges faced and their impact on how protected areas are viewed and also conservation priorities more generally The volume gives these issues affecting protected areas local communities managers and international conservation efforts centre stage in order inform policy and improve practice going forward This book will be of great interest to students and scholars of conservation natural resource management tourism sustainable development and African studies as well as professionals and policymakers involved in conservation policy
