

A photograph of a vast desert landscape under a clear blue sky. The foreground and middle ground are dominated by sand dunes with distinct, wavy ripples. A series of dark footprints leads from the bottom left towards the top center of the frame, disappearing into the distance. The overall tone is warm and arid.

Climate And Human Migration Past Experiences Future Challenges:

Climate and Human Migration Robert A. McLeman, 2014 The first comprehensive review of the interaction between climate change and migration for advanced students researchers and policy makers Environmental Migration and Social Inequality Robert McLeman, Jeanette Schade, Thomas Faist, 2015-12-16 This book presents contributions from leading international scholars on how environmental migration is both a cause and an outcome of social and economic inequality It describes recent theoretical methodological empirical and legal developments in the dynamic field of environmental migration research and includes original research on environmental migration in Bangladesh Burkina Faso China Ghana Haiti Mexico and Turkey The authors consider the implications of sea level rise for small island states and discuss translocality gender relations social remittances and other concepts important for understanding how vulnerability to environmental change leads to mobility migration and the creation of immobile trapped populations Reflecting leading edge developments this book appeals to advanced undergraduate and graduate students researchers and policymakers

International Handbook of Population and Environment Lori M. Hunter, Clark Gray, Jacques Véron, 2022-02-07 This handbook presents a timely and comprehensive overview of theory data methods and research findings that connect human population dynamics and environmental context It presents regional summaries of empirical findings on migration and environmental connections and summarizes environmental impacts of migration such as urbanization and deforestation It also offers background on the health implications of environmental conditions such as climate change natural disasters scarcity of natural resources as well as on resource scarcity and fertility gender considerations in population and environment and the connections between population size growth composition and carbon emissions This handbook helps readers to better understand the complexities within population environment connections in addition to some of the opportunities and challenges within environmental demography As such this collection is an invaluable resource for students researchers and policy analysts in the areas of demography migration fertility health and mortality as well as environmental global and development studies **Population Geography** Helen D. Hazen, Heike C. Alberts, Kazimierz J.

Zaniewski, 2023-07-06 Population Geography Social Justice for a Sustainable World surveys the ways in which geographic approaches may be applied to population issues exploring how human populations are embedded in natural and social environments It encourages students to evaluate population issues critically given that population topics are at the heart of many of today's most contentious subjects Through introducing students to different lenses of analysis ecological economic and social equity the authors ask students to consider how different perspectives can lead to different conclusions on the same issue Identifying and tackling today's population problems therefore requires an understanding of these diverging and sometimes conflicting perspectives The text covers all the key background information critical to any book on population geography population size distribution and composition fertility mortality and migration population and resources but also

pushes students to think critically about the materials they have covered using the perspectives of sustainability and social justice In this way students move beyond simple fact learning toward higher level skills such as analysis synthesis and evaluation of materials This textbook will be a valuable resource for students of human geography population geography demography and diaspora studies Climate Migration Calum Nicholson,Benoit Mayer,2023-09-21 This book investigates the epistemological and ethical challenges faced by studies exploring the relations between climate change and human migration At the heart of the contemporary preoccupation with climate change is a concern for its societal impacts Among these its presumed effect on human migration is perhaps the most politically resonant regardless of whether that politics is oriented towards human or national security There is however a problem research on the causal link between climate change and migration has shown it to be a highly equivocal one By extension it remains unclear what if any response is required from law and policy Carefully structured to guide the reader through the issue of climate migration in a logical and rigorous manner this book is the first to bring together key critiques caveats and cautions in order to systematically examine the challenges facing law policy and research on the topic At a time in which both the effects of climate change and the causes of migration are of great public and political interest and in which these interests are often fraught with sentiment and freighted with politics the book brings dispassionately critical perspectives to bear on a topic that desperately needs it

The Other of Climate Change Andrew Baldwin,2022-08-31 If the predictions are correct climate change will force millions of people from their homes threatening a future of humanitarian crises political violence and strife In *The Other of Climate Change* Andrew Baldwin intervenes in the international political debate about climate change and human migration to tell a different story He argues that international attempts to govern those who stand to be displaced by climate change are as much or more to do with resuscitating European humanism at a moment in which geophysical phenomena like climate change and the Anthropocene threaten to extinguish the human altogether Through detailed interpretations of the figure of the climate migrant refugee Baldwin traces the contours of an emerging form of planetary racial rule racial futurism unfolding in the context of the climate change crisis He shows how racial futurism takes shape as a political response to the crisis of humanism that is said to lay at the heart of the climate change crisis Along the way he examines numerous themes that are at the forefront of contemporary thinking about climate change and politics including the political humanism sovereignty neoliberalism the international and race Ultimately the book is a plea for scholars activists and policymakers to take seriously the way race and racism are bound up with the political discourse on climate change and migration and to ask what this means for the wider political debate about climate change and the future The Economic Consequences of Climate Change OECD,2015-11-03 This report provides a new detailed quantitative assessment of the consequences of climate change on economic growth through to 2060 and beyond Environmental Management Chris Barrow,2024-04-29 This comprehensively updated third edition explores the nature and role of environmental management and offers an

introduction to this rapidly expanding and changing field It focuses on challenges and opportunities and core concepts including sustainable development The book is divided into five parts Part I Introduction to Environmental Management four introductory chapters cover the justification for environmental management its theory scope goals and scientific background Part II Practice explores environmental management in economics law and business and environmental management s relation with environmentalism international agreements and monitoring Part III Global Challenges and Opportunities examines resources challenges and opportunities both natural and human caused or human aggravated Part IV Responses to Global Challenges and Opportunities explores mitigation vulnerability resilience adaptation and how technology social change and politics affect responses to challenges Part V The Future the final chapter considers the way ahead for environmental management in the future With its well structured coverage effective illustrations and foundation for further more focused interest this book is easily accessible to all It is an essential reference for undergraduates and postgraduates studying environmental management and sustainability and an important resource for many students on courses including environmental science environmental studies and human geography

Climate Change 2022 - Impacts, Adaptation and Vulnerability Intergovernmental Panel on Climate Change (IPCC), 2023-06-22 The Working Group II contribution to the Sixth Assessment Report of the Intergovernmental Panel on Climate Change IPCC provides a comprehensive assessment of the scientific literature relevant to climate change impacts adaptation and vulnerability The report recognizes the interactions of climate ecosystems and biodiversity and human societies and integrates across the natural ecological social and economic sciences It emphasizes how efforts in adaptation and in reducing greenhouse gas emissions can come together in a process called climate resilient development which enables a liveable future for biodiversity and humankind The IPCC is the leading body for assessing climate change science IPCC reports are produced in comprehensive objective and transparent ways ensuring they reflect the full range of views in the scientific literature Novel elements include focused topical assessments and an atlas presenting observed climate change impacts and future risks from global to regional scales Available as Open Access on Cambridge Core

Climate Change and Society Riley E. Dunlap, Robert J. Brulle, 2015-08-24 Climate change is one of the most critical issues of the twenty first century presenting a major intellectual challenge to both the natural and social sciences While there has been significant progress in natural science understanding of climate change social science analyses have not been as fully developed *Climate Change and Society* breaks new theoretical and empirical ground by presenting climate change as a thoroughly social phenomenon embedded in behaviors institutions and cultural practices
