

COMFORT CONTROLS

Your Carrier JET is equipped with 3 wide variety of comfort features. The operation is guided by one of three buttons is referred to as "on." To start your room air conditioner, push the appropriate control button and select the desired thermostat setting. A depressed button indicates that the control is activated.

IMPORTANT: Before operating cooling controls, compare the position of the EXHAUST switch with that of the other buttons. If the EXHAUST button is depressed, cooling functions should not be activated. EXHAUSTING ALREADY COMPLETED AIR REDUCES OPERATING ECONOMY.

OFF

Simply push the OFF control button and your unit will stop running. Pushing the OFF button again will restart the unit.

SIESTA

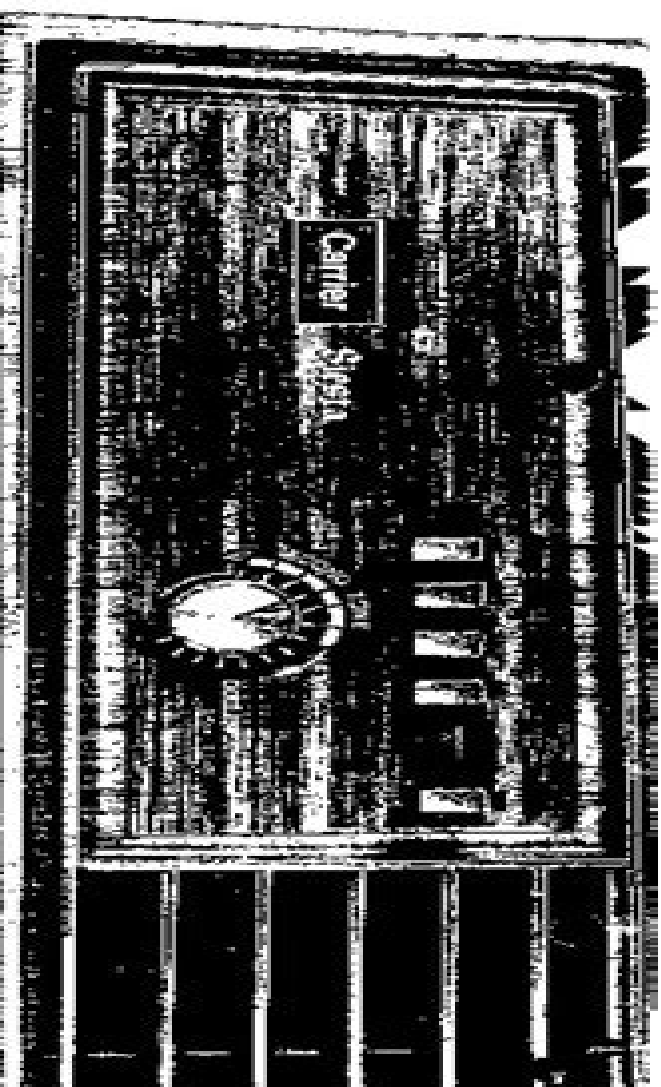

Good for "afternoon" air velocity, more frequent humidification and "Siesta" quiet operation.

NORMAL

This is the recommended day-to-day setting. Provides regular cooling and dehumidification. Good for day-to-day warm weather.

FAST

Good for maximum air velocity. The cooling is rapid, but quickly lowering cost. Temperature

is usually required once the room has cooled.

FAN ONLY

Good for hot "afternoon" air without cooling. To operate, turn the thermostat control knob counter-clockwise to FAN ONLY and push the FAN ONLY button.

THERMOSTAT

There is one rotary control labeled FAN ONLY and COOLING. The thermostat or your unit will work much like "a thermostat on a room heating system" and will be affected by the speed at how quickly the room is cooled. For more room cooling, set the control knob to FAST. To set the thermostat, turn the control knob in the direction of the arrow in the cooling setting and push the FAST button when the room begins comfortably, slowly turn the knob counter-clockwise until you hear the compressor stop. (Do not turn all the way to FAN ONLY.) To automatically maintain the temperature selected, move the control knob in this position. You may then operate the unit on FAST, NORMAL or SIESTA.

ECONO-ZONE

The thermostat dial is marked by a "V" and "Z" and a "D". The "D" is the ECONO-ZONE. By operating

your unit with the thermostat positioned within this zone, you help to reduce energy consumption by tempering between "comfort" and "cooling".

As you rotate the dial counter-clockwise toward FAN ONLY, typical energy savings can average 3-5% for each degree of temperature "drop." (Push with pressure approximately 2-3.)

AIR EXCHANGE

Your unit is equipped with an outdoor system to remove stale, warm, or stale indoor air from the room. To operate:

1. Turn the thermostat control knob to "FAN ONLY." It's indicator light will glow cooling.
2. Push the SIESTA, NORMAL, or FAST button for desired fan speed.
3. Push the EXHAUST button.

To stop exhausting air, reverse the EXHAUST button again and it will return to its original position.

AIR DIRECTION

An air direction adjustment to the right or the control before direct air is for gentle, draft free cooling. Adjust the three levers controlling the air grille to direct airflow straight ahead, to the left, or to the right.

C2 Air Conditioner Manual
