Constructivism Narrative And Foreign Policy Analysis A Case Study Of Finland:

Constructivism, Narrative and Foreign Policy Analysis Christopher S. Browning, 2008 Building on constructivist approaches to international relations this book develops a narrative theory of identity action and foreign policy which is then applied to account for the evolution of Finnish foreign policy The book adopts an innovative approach by showing how foreign policy orientations need to be seen as grounded in overlapping and competing sets of identity narratives that reappear in different forms through history By emphasising the dynamism implicit within identity narratives the book not only challenges traditional rationalist materialist approaches to foreign policy analysis but also the current tendency to depict the story of Finnish foreign policy identity and history as one of a gradual move towards a Western location Rather the book emphasises elements of multiplicity and contingency whilst re establishing foreign policy as a highly political process concerned with power and the right to define reality and national subjectivity *The European Neutrals and NATO* Andrew

Cottey, 2017-12-05 This book provides the first detailed comparative analysis of the unusual partnership between the main European neutral states and NATO Neutrality and alliance membership are fundamentally incompatible but through the vehicle of NATO's post Cold War partnerships the European neutral states and NATO have found a way to bridge this gap and cooperate with one another Based on case studies of Austria Finland Ireland Sweden and Switzerland written by leading experts this book explores the detail of each country's relationship with NATO the factors shaping those relationships and whether any of these states are likely to abandon neutrality and join NATO The book also contributes to broader work on foreign policy by exploring different explanations of the European neutral states foreign and security policy choices This book will be of interest to scholars of the European neutral states NATO and European security as well as to those interested in understanding the dynamics behind states foreign policy choices **Dividing United Europe** Aline Sierp, Christian

Karner, 2020-06-29 Pictures of Angela Merkel in a Nazi uniform the burning of German flags newspaper articles portraying Southern Europe as work shy and Northern Europe as tight fisted The Eurozone crisis has thrown up old stereotypes often digging into well established historical images of the other The conscious or tacit abuse of national prejudices by politicians and parts of the media and the strong emotional reactions among European citizens have caused a lot of public concern about the likely negative implications of such reawakening of national clichés and the newly hardening boundaries they construct for the process of European integration It is evident that current and recent crises confront European citizens with profound dilemmas which they seek to make sense of and in response to which much new political mobilisation takes place At the same time some of the interpretative and political reactions thus generated also have the potential to become very destructive processes putting into question years of integration efforts This book brings together scholars who examine the nexus between economic crisis national identities and the use of historical images and prejudices and stereotypes by focusing particularly on media and political discourses in different European countries In addition to detailed empirical discussions

covering diverse national settings across Europe the different contributions discuss and offer a variety of conceptual and methodological approaches within the inter disciplinary study of national identities prejudice and stereotyping in the context of socio economic and political crises This book was originally published as a Special Issue of National Identities *Famines in European Economic History* Declan Curran,Lubomyr Luciuk,Andrew Newby,2015-04-24 This volume explores economic social and political dimensions of three catastrophic famines which struck mid nineteenth and early twentieth century Europe the Irish Famine An Gorta M r of 1845 1850 the Finnish Famine Suuret N lk vuodet of the 1860s and the Ukrainian Famine Holodomor of 1932 1933 In addition to providing new insights into these events on international national and regional scales this volume contributes to an increased comparative historiography in historical famine studies The parallel studies presented in this book challenge and enhance established understandings of famine tragedies including famine causation and culpability social and regional famine vulnerabilities core periphery relationships between nations and regions degrees of national autonomy and self sufficiency as well as famine memory and identity *Famines in European Economic History* advocates that the impact and long term consequences of famine for a nation should be understood in the context of evolving geopolitical relations that extend beyond its borders Furthermore regional structures within a nation can lead to unevenness in both the severity of the immediate famine crisis and the post famine recovery This book will be of interest to those in the fields of economic history European history and economic geography **European 'Security' Governance** George Christou,Stuart Croft,2014-06-11 This book argues that we can understand and explain the EU as a security and peace actor through a framework of an updated and deepened concept of security governance It elaborates and develops on the current literature on security governance in order to provide a more theoretically driven analysis of the EU in security Whilst the current literature on security governance in Europe is conceptually rich there still remains a gap between those that do security governance and those that focus on security per se A theoretical framework is constructed with the objective of creating a conversation between these two literatures and the utility of such a framework is demonstrated through its application to the geospatial dimensions of EU security as well as specific cases studies in varied fields of EU security This book was originally published as a special issue of European Security Russia and the Arctic Geir Hønneland,2020-01-09 The world is currently witnessing an Arctic Scramble as the major powers compete to demarcate and occupy Arctic territory The region is known to be home to large gas and oil reserves and its position at the top of the globe holds significant trading and military advantages Yet the territorial boundaries of the region remain ill defined and Russia under the increasingly bold foreign policy of Vladimir Putin has emerged as a forceful power in the region Geir H nneland investigates the political contexts and international tensions surrounding Russia s actions focusing especially on the disputes which have emerged in the Barents Sea where European and Russian interests compete directly Skillfully delineating Russian policy in the region and analyzing the mineral and environmental consequences of the recent treaty agreements *Russia and the Arctic* is a crucial

addition to our understanding of contemporary International Relations concerning the Polar North This new updated edition takes into account Russia's recent moves in the Arctic region and the development of the Arctic council

International Politics in the Arctic Geir Hønneland, 2017-10-30 As the ice around the Arctic landmass recedes the territory is becoming a flashpoint in world affairs New trade routes cutting thousands of miles off journeys are available and the Arctic is thought to be home to enormous gas and oil reserves The territorial lines are new and hazy This book looks at how Russia deals with the outside world vis a vis the Arctic Given Russia's recent bold foreign policy interventions these are crucial issues and the realpolitik practiced by the Russian state is essential for understanding the Arctic's future Here Geir Hønneland brings together decades of cutting edge research investigating the political contexts and international tensions surrounding Russia's actions Hønneland looks specifically at region building and environmental politics of fishing and climate change on nuclear safety and nature preservation and also analyses the diplomatic relations surrounding clashes with Norway and Canada as well as at the governance of the Barents Sea The Politics of the Arctic is a crucial addition to our understanding of contemporary International Relations concerning the Polar North

African Constructions of China Kwaku Opoku Dankwah, 2023-12-12 Marking a constructivist turn in Africa China scholarship this book explores African constructions of China Using Ghana and Kenya as case studies the book outlines the role of diverse state and non state actors in defining what China represents to the region and how it compares to Western powers Resisting Sino and state centric analysis of China Africa relations this book emphasises the importance of African agency in shaping the discourse The book demonstrates that the identity construction of a foreign state such as China takes place both at the international level and at a domestic intrastate level Domestic constructions of China in Ghana and Kenya reflect internal tensions about future directions for African political and socioeconomic development and these constructions in turn help to justify government policies towards China The book concludes by questioning the idea of a straightforward win win relationship and suggests that exploitative hierarchical relations conventionally associated with North South interactions may continue in South South relations This book's important analysis of the role of domestic non state actors in shaping African policymaking extends much needed nuance to a sometimes polarised debate It will be of interest to researchers across the fields of politics international relations global development and African and Chinese Studies

International Relations in the Arctic Leif Christian Jensen, 2015-10-12 As the ice around the Arctic landmass recedes progressively further each year the territory has become a flashpoint in world affairs New and lucrative trade routes from East to West are now becoming accessible for shipping lanes and military deployment and the Arctic is known to be home to large gas and oil reserves Yet the territorial boundaries of the region remain ill defined In response to these geographical changes the Scandinavian countries especially Denmark and Norway have begun staking large proprietary claims in the face of pressure from the major powers Russia Canada the US and China for the trade routes to be designated as International Waters Here Norwegian scholar Leif

Christian Jensen shows how Norway has undergone a positional shift after declaring its assertive position on the Arctic in 2005. Its disputes with Russia have created a new foreign policy dilemma and a new set of red lines in Norwegian policy. Is Norway as it would like to be seen an environmentally friendly peaceful enlightened nation? Or does this geopolitical shift in world affairs necessitate a new and more aggressive Scandinavia? *International Relations in the Arctic* makes a timely contribution to the turn to the North in International Relations and Political Science. Legacies of the International Criminal Tribunal for the Former Yugoslavia Carsten Stahn, Carmel Agius, Serge Brammertz, Colleen Rohan, 2020-06-10. The International Criminal Tribunal for the former Yugoslavia (ICTY) is one of the pioneering experiments in international criminal justice. It has left a rich legal institutional and non-judicial legacy. This edited collection provides a broad perspective on the contribution of the tribunal to law, memory and justice. It explores some of the accomplishments, challenges and critiques of the ICTY, including its less visible legacies. The book analyses different sites of legacy: the expressive function of the tribunal; its contribution to the framing of facts, events and narratives of the conflict in the former Yugoslavia; and investigative and experiential legacies. It also explores lesser-known aspects of legal practice, such as defence, investigative ethics, judgment, drafting, contempt cases against journalists, interpretation and translation, outreach, approaches to punishment and sentencing, the tribunal's impact on domestic legal systems and ongoing debates over impact and societal reception. The volume combines voices from inside the tribunal with external perspectives to elaborate the rich history of the ICTY, which continues to be written to this day.

Unveiling the Magic of Words: A Review of "**Constructivism Narrative And Foreign Policy Analysis A Case Study Of Finland**"

In some sort of defined by information and interconnectivity, the enchanting power of words has acquired unparalleled significance.
