**European Union and the End of Politics**, European Union Constitutionalism in Crisis Nicole Scicluna, 2014-10-17 Several years after the first Greek bailout the integration project of the European Union faces an interlocking set of political economic legal and social challenges that go to the very core of its existence Austerity is the order of the day and citizens in both debtor and creditor states increasingly turn to the political movements of the far left and right anti politics and street protests to vent their frustration This book demonstrates the limits of constitutionalism in the EU It explores the twin crises the failure of the Constitutional Treaty in 2005 and the more recent Eurozone crisis to illuminate both the possibilities and pitfalls of the integration project It argues that European integration overburdened law in an attempt to overcome deep seated political deficiencies It further contends that the EU shifted from an unsuccessful attempt at democratisation via politicisation the Constitutional Treaty to an unintended politicisation without democratisation the Eurozone crisis only a few years later The book makes the case that this course is unsustainable and threatens the goal of European unity This text will be of key interest to students and scholars in the fields of EU studies EU law democracy studies constitutional studies and international relations

Constitutionalising Europe Michael Longo, 2017-03-02 The European Union is in a state of transformation with its constitutional future the subject of much heated debate This book provides a durable authoritative and comprehensive account of constitutional development examining the pivotal roles of law and judicial politics in establishing the EU constitutional edifice Michael Longo demonstrates and substantiates the arguments for and against constitutionalization through the development of a theoretical framework drawing on theories and empirical research in both law and political science to understand this new process of European integration

Constitutionalizing Secession in Federalized States Miodrag A. Jovanović, 2007 This book is a thorough and professional study about secession Starting from the perspective of contemporary political philosophy the book explores the relevance of this issue for the theory and practice of federalism as well as its status under current public international law and concludes with a comparative constitutional

analysis of the subject matter In the final chapter it provides a constitutionalized procedure of secession based on fundamental liberal democratic values The book argues that a liberal democratic response to the secession controversy might consist of the constitutionalization of a right to secession While a number of recent works in political theory point to the fact that under certain circumstances the moral right of a group to secession should be recognized only a few of them are ready to defend the institutionalization of that right through the instruments of constitutional law This topical and thought provoking book is a welcome contribution to the ongoing debate on secession and will be of interest to academics in a variety of disciplines such as law history politics international relations philosophy and applied ethics and to politicians and constitution drafters

*Europe Without Borders* Isaac Stanley-Becker, 2025-01-14 The contested creation of free movement for people and goods in the Schengen area of Europe Europe is a place of free movement among nations or is it The Schengen area established in 1985 and today encompassing twenty nine European countries allows people goods and capital to cross borders without restraint Schengen transformed European life advancing both a democratic project of transnational citizenship and a neoliberal project of international free trade But the right of free movement always excluded non Europeans especially migrants of color from former colonies of the Schengen states In *Europe without Borders* Isaac Stanley Becker explores the contested creation of free movement in Schengen from treaty making at European summits and disputes in international courts to the street protests of undocumented immigrants who claimed free movement as a human right Schengen laid the groundwork for the making of a single market and the founding of the European Union Yet its emergence is one of the great untold stories of modern European history one hidden in archives long embargoed Stanley Becker is among the first to have access to records of the treaty making such as letters between France's François Mitterrand and West Germany's Helmut Kohl and *Europe without Borders* offers a pathbreaking account of Schengen's creation Stanley Becker argues that Schengen gave a humanist cast to a market paradigm but even in pairing the border crossing of human beings with the principles of free market exchange this vision of free movement was hedged by alarm about foreign migrants Meanwhile these migrants the *sans papiers* saw in the promise of a borderless Europe only a neocolonial enterprise
