The use of set technologies and automatic control devices that results in the automatic operation and control of industrial processes without significant human intervention to achieve superior performance compared to manual control.

INDUSTRIAL IoT (IIoT)

Also referred to as Industry 4.0 or Industrial 4.0, this is a sub-discipline of IoT, encompassing connected large-scale machinery and industrial systems such as factory-floor monitoring, HVAC, smart lighting, and security. This includes machine-to-machine communication where equipment can send real-time information to an application so operators can better understand how efficiently that equipment is running.
