Metal Shaping Processes Vukota Boljanovic, 2010 As the only comprehensive text focusing on metal shaping processes which are still the most widely used processes in the manufacture of products and structures Metal Shaping Processes carefully presents the fundamentals of metal shaping processes with their relevant applications The treatment of the subject matter is adequately descriptive for those unfamiliar with the various processes and yet is sufficiently analytical for an introductory academic course in manufacturing The text as well as the numerous formulas and illustrations in each chapter clearly show that shaping processes as a part of manufacturing engineering are a complex and interdisciplinary subject The topics are organized and presented in such a manner that they motivate and challenge students to present technically and economically viable solutions to a wide variety of questions and problems including product design It is the perfect textbook for students in mechanical industrial and manufacturing engineering programs at both the Associate Degree and Bachelor Degree programs as well a valuable reference for manufacturing engineers those who design execute and maintain the equipment and tools process engineers those who plan and engineer the manufacturing steps equipment and tooling needed in production manufacturing managers and supervisors product design engineers and maintenance and reliability managers and technicians Features Each chapter begins with a brief highlighted outline of the topics to be described Carefully presents the fundamentals of the particular metal shaping process with its relevant applications within each chapter so that the student and teacher can clearly assess the capabilities limitation and potentials of the process and its competitive aspects Features sections on product design considerations which present guidelines on design for manufacturing in many of the chapters Offers practical understandable explanations even for complex processes Includes text entries that are coded as in an outline with these numerical designations carried over the 320 related illustrations for easy cross referencing Provides a dual ISO and USA unit system Contains end of chapter Review Questions Includes a chapter on sheet metalworking covering cutting processes bending process tubes and pipe bending deep drawing processes other sheet metal forming process stretch

forming spinning rubber forming and superplastic forming and diffusion bonding Provides a useful die classification with 15 illustrations and description presses for sheet metalworking and high energy rate forming processes A chapter on nontraditional manufacturing process discusses such important processes as mechanical energy processes ultrasonic machining water jet cutting electrochemical machining processes electrochemical machining electrochemical grinding thermal energy processes electric discharge processes laser beam machining electron beam machining and chemical processes chemical milling *Huebner's Machine Tool Specs: Boring, drilling, gear making, grinding* ,1980 **Thomas Register** ,2004 *Tooling* ,1981 **Precision Abrasive Grinding in the 21st Century** Harry G. Sachsel, C.A.E.,2010-08-10 The writing of this book Precision Abrasive Grinding in the 21st Century began more than thirty five years ago with the writing of How To technical briefs that went with our abrasive products so that one has a better understanding of the product and with the application could be better used I continued to write How To technical briefs with and about new precision abrasive grinding products and systems During the day working on precision abrasive grinding applications new ideas and information were learned I wanted to retain this knowledge so I decided to write the technical briefs I wrote in the middle of the night This was a great time to write down on a large yellow pad my experiences of the day This has continued for more than twenty years resulting in these two hundred sixty plus chapters and twelve sections Unless one writes or records information it can be lost or forgotten In addition you can learn more about the application and how to improve upon it by reviewing your notes and making changes The chapters are not only a source of information for me but now in book form these can achieve abrasive product information for others While writing about my precision abrasive application experiences I wrote them in layman s language so that all could gain and learn from me Manufacturing precision abrasive grinding and life are a constant changing situation So are the materials that are being used in all the new products In the past a simple metal product could be machined heat treated and then ground if necessary but now no longer is that true Material science has developed new lightweight hard metal abrasive ceramic aerospace medical electronic materials that only abrasives can remove size shape and finish In the past the use of abrasives and precision abrasive grinding was looked upon as an art but not any longer as it has now become a true science Here I m in the year 2010 with all its problems and difficulties War unemployment and all the other problems that you can think of but here is one area with a bright light and that is manufacturing with precision abrasive grinding It has to do with increasing productivity and making a better product at a competitive cost so that work once again comes back to USA This will increase employment productivity profits and make better products This is why I m having this book published Harry G Sachsel CAE E mail hgsachsel gmail com
