Designing For The Common Good:

Designing for Society Nynke Tromp, Paul Hekkert, 2018-12-27 Our globalised world is encountering problems on an unprecedented scale. Many of the issues we face as societies extend beyond the borders of our nations. Phenomena such as terrorism, climate change, immigration, cybercrime, and poverty can no longer be understood without considering the complex socio-technical systems that support our way of living. It is widely acknowledged that to contend with any of the pressing issues of our time, we have to substantially adapt our lifestyles. To adequately counteract the problems of our time, we need interventions that help us actually adopt the behaviours that lead us toward a more sustainable and ethically just future. In *Designing for Society*, Nynke Tromp and Paul Hekkert provide a hands-on tool for design professionals and students who wish to use design to counteract social issues. Viewing the artefact as a unique means of facilitating behavioural change to realise social impact, this book goes beyond the current trend of applying design thinking to enhancing public services and beyond the idea of the designer as a facilitator of localised social change.

Designing in Dark Times Virginia Tassinari, Eduardo Staszowski, 2020-11-12 The architectural historian and critic Kenneth Frampton never recovered from the force of Hannah Arendt's teaching at The New School in New York. The philosopher Richard J. Bernstein considers her the most perceptive political theorist and observer of dark times, a concept which, drawing from Brecht, she made her own. Building on the revival of interest in Hannah Arendt and on the increasing turn in design towards the expanded field of the social, this unique book uses insights and quotations drawn from Arendt's major writings: *The Human Condition*, *The Origins of Totalitarianism*, *Men in Dark Times*, to assemble a new kind of lexicon for politics, designing, and acting today. Taking 56 terms from *Action*, *Beginnings*, and *Creativity*, through *Mortality*, *Nativity*, and *Play*, to *Superfluity*, *Technology*, and *Violence*, and inviting designers and scholars of design world-wide to contribute, *Designing in Dark Times: An Arendtian Lexicon* offers up an extraordinary range of short essays that use moments and quotations from Arendt's thought as the starting points for reflection on how these terms can be conceived for contemporary design and political praxis. Neither simply dictionary nor glossary, the lexicon brings together designing and political philosophy to begin to create a new language for acting and designing against dark times.

Legal Design Corrales Compagnucci, Marcelo Haapio, Helena Hagan, Margaret Doherty, Michael, 2021-10-21 This innovative book proposes new theories on how the legal system can be made more comprehensible, usable, and empowering for people through the use of design principles. Utilising key case studies and providing real-world examples of legal innovation, the book moves beyond discussion to action. It offers a rich set of examples demonstrating how various design methods, including information service, product, and policy design, can be leveraged within research and practice.

Uncovering the Constitution's Moral Design Paul R. DeHart, 2007 The U.S. Constitution provides a framework for our laws, but what does it have to say about morality? Paul DeHart ferrets out that document's implicit moral assumptions as he revisits the notion that constitutions are more than merely practical institutional arrangements. In *Uncovering the*

Constitution's Moral Design he seeks to reveal elaborate and then evaluate the Constitution's normative framework to determine whether it is philosophically sound and whether it makes moral assumptions that correspond to reality Rejecting the standard approach of the intellectual historian DeHart for the first time in constitutional theory applies the method of inference to the best explanation to ascertaining our Constitution's moral meaning He distinguishes the Constitution's intention from the subjective intentions of the framers teasing out presuppositions that the document makes about the nature of sovereignty the common good natural law and natural rights He then argues that the Constitution constrains popular sovereignty in a way that entails a real common good transcendent of human willing and promotive of human well being but he points out that while the Constitution presupposes a real common good it also implies a natural law that prescribes the common good In critiquing previous attempts at describing and evaluating the Constitution's normative framework DeHart demonstrates that the Constitution's moral framework corresponds largely to classical moral theory He challenges the logical coherency of modern moral philosophy normative positivism and other theories that the Constitution has been argued to embody and offers a groundbreaking methodology that can be applied to uncovering the normative framework of other constitutions as well This cogently argued study shows that the Constitution presupposes a natural law to which human law must conform and it takes a major step in resolving current debates over the Constitution's normative framework while remaining detached from the social issues that divide today's political arena Uncovering the Constitution's Moral Design is an original approach to the Constitution that marks a significant contribution to understanding the moral underpinnings of our form of government

Design and Destiny Ronald Cole-Turner, 2008 Scholars discuss the genetic modification of embryonic cells from the viewpoints of traditional Jewish and Christian teaching considering both the possible therapeutic benefits of this technology and moral concerns about its implementation We are approaching the day when advances in biotechnology will allow parents to design a baby with the traits they want The continuing debate over the possibilities of genetic engineering has been spirited but so far largely confined to the realms of bioethics and public policy Design and Destiny approaches the question in religious terms discussing human germline modification the genetic modification of the embryonic cells that become the eggs or sperm of a developing organism from the viewpoints of traditional Christian and Jewish teaching The contributors leading religious scholars and writers call our attention not to technology but to humanity reflecting upon the meaning and destiny of human life in a technological age Many of these scholars argue that religious teaching can support human germline modification implemented for therapeutic reasons although they offer certain moral

conditions that must be met The essays offer a surprising variety of opinions including a discussion of Judaism's traditional presumption in favor of medicine an argument that Catholic doctrine could accept germline modification if it is therapeutic for the embryo an argument implying that traditional Christian teaching permits germline modification whether for therapy or enhancement and a classical Protestant view that germline modification should be categorically opposed Contributors Lisa Sowle Cahill Nigel M de S Cameron Ronald Cole Turner Amy Michelle DeBaets Celia Deane Drummond Elliot Dorff H Tristram Engelhardt Jr Thomas A Shannon James J Walter
