By Design Planning Research On Higher Education:

By Design Richard J. LIGHT, Judith D. Singer, John B. Willett, Richard J Light, 2009-06-30 Do students who work longer and harder learn more in college Does joining a fraternity with a more academic flavor enhance a student s academic performance These are just some more than fifty examples that Richard Light Judith Singer and John Willett explore in *By Design* a lively nontechnical sourcebook for learning about colleges and universities *Higher Education: Handbook of Theory and Research* John C. Smart, 2008-03-21 The Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities Each chapter provides a comprehensive review of research findings on a selected topic critiques the research literature in terms of its conceptual and methodological rigor and sets forth an agenda for future research intended to advance knowledge on the chosen topic **Higher Education by Design** Ernest G. Palola, Timothy Lehmann, W. R. Blischke, 1970 The two basic purposes of this study were 1 to determine the type of statewide planning done in states with relatively long experience in this activity and 2 to analyze the significance of statewide planning on the operation and development of different colleges and universities within the state Chapter I presents the conceptual framework for the study Chapter II discusses some notable historical events in the development of higher education in the U S Chapters III through VI present detailed information on planning and its importance for and impact on institutions of higher education in California Florida Illinois and New York Chapter VII discusses statewide planning and private higher education In Chapter VIII a comparative analysis is made of the different types of statewide planning and major findings are reported Chapter IX discusses problems in responsibility and authority The methodology of the study is presented in the appendix An extensive bibliography is included AF Enhancing Assessment in Higher Education Tammie Cumming, M. David Miller, 2023-07-03 Assessment and accountability are now inescapable features of the landscape of higher education and ensuring that these assessments are psychometrically sound has become a high priority for accrediting agencies and therefore also for higher education institutions Bringing together the higher education assessment literature with the psychometric literature this book focuses on how to practice sound assessment This volume provides comprehensive and detailed descriptions of tools for and approaches to assessing student learning outcomes in higher education The book is guided by the core purpose of assessment which is to enable faculty administrators and student affairs professionals with the information they need to increase student learning by making changes in policies curricula and other programs The book is divided into three sections overview assessment in higher education and case studies The central section looks at direct and indirect measures of student learning and how to assure the validity reliability and fairness of both types The first six chapters the first two sections alternate chapters written by experts in assessment in higher education and experts in psychometrics The remaining three chapters are applications of assessment practices in three higher education institutions Finally the book includes a

glossary of key terms in the field A Co Publication with AAC U and AIR *Higher Education by Design* Ernest G. Palola, Timothy Lehmann, W. R. Blischke, 1970 **Leaving College** Vincent Tinto, 2012-04-27 In this 1994 classic work on student retention Vincent Tinto synthesizes far ranging research on student attrition and on actions institutions can and should take to reduce it The key to effective retention Tinto demonstrates is in a strong commitment to quality education and the building of a strong sense of inclusive educational and social community on campus He applies his theory of student departure to the experiences of minority adult and graduate students and to the situation facing commuting institutions and two year colleges Especially critical to Tinto's model is the central importance of the classroom experience and the role of multiple college communities *Governing Academia* Ronald G. Ehrenberg, 2016-10-01 Public concern over sharp increases in undergraduate tuition has led many to question why colleges and universities cannot behave more like businesses and cut their costs to hold tuition down Ronald G Ehrenberg and his coauthors assert that understanding how academic institutions are governed provides part of the answer Factors that influence the governance of academic institutions include how states regulate higher education and govern their public institutions the size and method of selection of boards of trustees the roles of trustees administrators and faculty in shared governance at campuses how universities are organized for fiscal and academic purposes the presence or absence of collective bargaining for faculty staff and graduate student assistants pressures from government regulations donors insurance carriers athletic conferences and accreditation agencies and competition from for profit providers *Governing Academia* which covers all these aspects of governance is enlightening and accessible for anyone interested in higher education The authors are leading academic administrators and scholars from a wide range of fields including economics education law political science and public policy *Research in Education*, 1974 **Higher Education by Design** Ernest George Palola, 1970 *Remaking College* Mitchell Stevens, Michael W. Kirst, 2015-01-07 Between 1945 and 1990 the United States built the largest and most productive higher education system in world history Over the last two decades however dramatic budget cuts to public academic services and skyrocketing tuition have made college completion more difficult for many Nevertheless the democratic promise of education and the global competition for educated workers mean ever growing demand *Remaking College* considers this changing context arguing that a growing accountability revolution the push for greater efficiency and productivity and the explosion of online learning are changing the character of higher education Writing from a range of disciplines and professional backgrounds the contributors each bring a unique perspective to the fate and future of U S higher education By directing their focus to schools doing the lion's share of undergraduate instruction community colleges comprehensive public universities and for profit institutions they imagine a future unencumbered by dominant notions of traditional students linear models of achievement and college as a four year residential experience The result is a collection rich with new tools for helping people make more informed decisions about college for themselves for their children and for American society as a whole
