This system is comprised of 1 center speaker and 2 rear speakers.

English

BEFORE OPERATION

- Thank you for buying this PIONEER product.
- Read the operating instructions carefully before using these speakers so that you can operate them properly. After you have finished reading the instructions, put them away in a safe place for future reference.
- The rated impedance of these speakers is 8 Ohms. They must be connected to a stereo amplifier which accepts this type of load (minimum and maximum impedances accepted by the amplifier are generally indicated near the loudspeaker outlets : for example "4-16 Ω " or "6-16 Ω ").
- To guard against damage to these speakers due to an electric power overload, take the following precautions :
 - Do not supply more than the maximum permitted power to the speakers (see Specifications).
 - Any connection or switching on or off of part of the audio system (CD player, tuner etc.) must be carried out after switching off the amplifier or at least with the loudspeaker outlets disconnected (if the amplifier allows). Interference caused by these operations will otherwise reach the speakers and may damage the treble loudspeaker units.
 - When boosting ... ricular frequencies using a graphic equaliser or bass and treble controls, make sure that you do not increase the amplifier volume excessively, as the speakers will be overloaded more quickly.
 - Do not force a low-power amplifier to produce a high level of sound as harmonic distortion increases rapidly in this situation and may pose a danger to the treble loudspeaker units.
- Avoid touching the diaphragms and suspensions of loudspeakers as they are fragile.

The loudspeaker units in these speakers are magnetically shielded. However, colours may blur if the speakers are positioned too close to a television screen. If this happens, switch off the television and switch it back on again after 15 to 30 minutes. If the problem persists, move the speakers away from the television set.

INSTALLATION PRECAUTIONS

- Do not install these speakers close to an oven or heating appliance. Avoid exposing them to direct sunlight. High temperatures can distort the structure of the enclosure and adversely affect the sound.
- These speakers are heavy and fragile, and it is therefore dangerous to install them in an unstable position.
- For optimum effect, install the rear speakers slightly above ear level. Install the center speaker above or below the TV so that the sound of the center channel is localized at the TV screen. For low frequencies, it is possible to increase the level of bass sounds by positioning the speakers close to a wall (the maximum increase being obtained for a position in a corner of the listening room).

CONNECTIONS

1. Switch off the amplifier power supply (OFF).
2. Connect the cables to the input terminals on the rear of the speakers. Connect the neutral cable to the "-" terminal and the live cable to the "+" terminal. Do not forget that the red input terminal has positive polarity and that the black input terminal has negative polarity.
3. Connect the cables to the loudspeaker outlet terminals of the amplifier. Connect the live cable to the "+" terminal and the neutral cable to the "-" terminal.

① Strip the insulation at the tip of the cord and twist the strands.

② Connect the common-side speaker cord to the (-) terminal.

③ Depress the input terminal lever, and insert the tip of the cord into the hole and then release the lever so that it springs back into position.

④ Connect the hi-side speaker cord to the (+) terminal.

REMARKS :

- Check that the cables are securely connected to the terminals. A loose connection may cause not just intermittent or distorted sound but short-circuiting and breakdown of the amplifier.
- If the cables of one of the speakers have been connected with the wrong polarities, you will find when listening to a stereo recording that bass sounds are weakened and the stereo effect normally obtained between the two speakers does not exist.

MAINTENANCE OF THE ENCLOSURE

- Use a cloth to wipe away dust and dirt.
- If the enclosure is very dirty, wipe with a soft cloth dipped in a neutral detergent diluted five to six times with water, then wipe again with the dry cloth. Do not use thinner, benzene, cleaning sprays or other chemical products on or near the enclosures as the surfaces could be adversely affected.

USING THE ACCESSORIES

Confirm that the following accessories are in the box when you open it :

- 2 Mounting panel + 1 Polybag including 4 screws
- This mounting panel will enable you to set the speaker system on your interior's walls. Before screwing the mounting panel to the back of the cabinet, make sure that cables are properly connected to the input terminal. The 2 screws that hold the speaker system must be fixed into the dedicated insert structures of the speaker system.
