

Getting Acquainted

Congratulations upon your selection of this CASIO watch. To get the most out of your purchase, be sure to carefully read this manual and keep it on hand for later reference when necessary.

Important!

- The fishing/hunting time data, sunrise and sunset data, and moon phase indicator produced by this watch are all based on calculations that use the watch's current time, date, and Home Site settings. Therefore, first, you should make sure that the current date and time, and your Home Site data are all correct before using such data.
- When fishing or hunting, always take proper precautions to ensure your own personal safety and the personal safety of others around you.
- Note that the fishing/hunting time data, sunrise and sunset data, and moon phase indicator are all based on calculated values. They are provided only for reference purposes.
- See the "Timekeeping" section of this manual for information about setting the current time and date, and about specifying your Home Site.

This process can continue for as long as 15 seconds. Wait until the animated pattern stops before performing any other button operation.
 - The day of the week is automatically displayed in accordance with the date (year, month, and day) settings.

Home Site Data

- Moon phase indicator, fishing/hunting time data, and sunrise and sunset data will not be displayed properly unless Home Site data (GMT differential, latitude, and longitude) is configured correctly.
- The GMT differential is a value that indicates the time difference between Greenwich Mean Time and the time zone where a city is located.
 - Note that you must add one hour to the current time setting and the GMT differential of your time zone whenever you change to Daylight Saving Time (summer time). Subtract one hour when you change back to Standard Time.
 - The "Data User" provides GMT differential, latitude, and longitude information around the world.

- The fishing/hunting times shown by your watch are the times when the moon is at its highest point (upper transit), lowest point (lower transit), furthest point to the east (east transit), and furthest point to the west (west transit) of your Home Site. These are favorable times for fishing and hunting.
