The SAGE Handbook of Gender and Communication Bonnie J. Dow, Julia T. Wood, 2006-07-19 Publisher Description

Gender and Candidate Communication Dianne G. Bystrom, Terry Robertson, Mary Christine Banwart, Lynda Lee Kaid, 2005-01-01 A poll as recently as 2000 revealed that a third of the population thinks there are general characteristics about women that make them less qualified to serve as president As the public and the media rely on long held stereotypes female candidates must focus even harder on the way they want to define their own image through traditional mass media such as television and new forms such as the internet Gender and Candidate Communication digs deep into the campaigns of the last decade sifting through thousands of ads websites and newspaper articles to find out how successful candidates have been in breaking down these gender stereotypes Among their findings are that female candidates dress more formally smile more act tougher when they can and prefer scare tactics to aggressive attack ads Gender and Candidate Communication also presents the most comprehensive systematic method yet for identifying and understanding self presentation strategies on the web The internet may be the medium of the future but Bystrom has found that coverage on the web tends to draw even more heavily on old stereotypes No close observer of campaigns gender or the internet will be able to ignore their findings

Gender Stories Sonja K. Foss, Mary E. Domenico, Karen A. Foss, 2012-06-06 Essential for anyone who seeks to understand the contemporary gender landscape Gender Stories defines gender as the socially constructed meanings that are assigned to bodies The book helps readers navigate issues of gender by introducing them to the ubiquitous gender binary the problems with much of the research on gender differences and the variety of gender stories in popular culture At the heart of the book is a description of the process

of becoming a gendered person through crafting and performing gender stories Because each gender performance is unique a virtually unlimited number of genders existsnot just two as the gender binary would have us believe The same multiplicity that characterizes the gender landscape characterizes the individual who typically changes gender multiple times a day and across the lifespan In Gender Stories personal gender performances are framed within a philosophy of choice Readers are encouraged to become more conscious of the choices they have in constructing their gender identities and to allow others the same choice by respecting their gender performances Readers will easily find a place for themselves in the book regardless of their views on gender because one perspective on gender is not presented as the right one Gender Stories affirms and legitimizes diverse perspectives as providing more comprehensive knowledge about gender for everyone *Teaching Gender and Sex in Contemporary America* Kristin Haltinner,Ryanne Pilgeram,2016-04-28 This book provides innovative pedagogy theory and strategies for college and university professors who seek effective methods and materials for teaching about gender and sex to today s students It provides thoughtful reflections on the new struggles and opportunities instructors face in teaching gender and sex during what has been called the post feminist era Building off its predecessor *Teaching Race and Anti Racism in Contemporary America* this book offers complementary classroom exercises for teachers that foster active and collaborative learning Through reflecting on the gendered dimensions of the current political economic and cultural climate as well as presenting novel lesson plans and classroom activities *Teaching Gender and Sex in Contemporary America* is a valuable resource for educators *Handbook of Emotions, Fourth Edition* Lisa Feldman Barrett,Michael Lewis,Jeannette M. Haviland-Jones,2016-08-02 Recognized as the definitive reference this handbook brings together leading experts from multiple psychological subdisciplines to examine one of today s most dynamic areas of research Coverage encompasses the biological and neuroscientific underpinnings of emotions as well as developmental social and personality cognitive and clinical perspectives The volume probes how people understand experience express and perceive affective phenomena and explores connections to behavior and health across the lifespan Concluding chapters present cutting edge work on a range of specific emotions Illustrations include 10 color plates New to This Edition Chapters on the mechanisms processes and influences that contribute to emotions such as genetics the brain neuroendocrine processes language the senses of taste and smell Chapters on emotion in adolescence older age and in neurodegenerative dementias Chapters on facial expressions and emotional body language Chapters on stress health gratitude love and empathy Many new authors and topics extensively revised with the latest theoretical and methodological innovations
